The Borderlands of Southeast Asia James Clad, Sean M. McDonald, Bruce Vaughn, 2011 As an academic field in its own right, the topic of border studies is experiencing a revival in university geography courses as well as in wider political commentary. Until recently, border studies in contemporary Southeast Asia appeared as an afterthought at best to the politics of interstate rivalry and national consolidation. The maps set out all agreed postcolonial lines. Meanwhile, the physical demarcation of these boundaries lagged. Large slices of territory, on land and at sea, eluded definition or delineation. That comforting ambiguity has disappeared. Both evolving technologies and price levels enable rapid resource extraction in places, and in volumes, once scarcely imaginable. The beginning of the 21st century's second decade is witnessing an intensifying diplomacy, both state-to-state and commercial, over offshore petroleum. In particular, the South China Sea has moved from being a rather arcane area of conflict studies to the status of a bellwether issue. Along with other contested areas in the western Pacific and south Asia, the problem increasingly defines China's regional relationships in Asia, and with powers outside the region, especially the United States. Yet intraregional territorial differences also hobble multilateral diplomacy to counter Chinese claims, and daily management of borders remains burdened by a lot of retrospective baggage. The contributors to this book emphasize this mix of heritage and history as the primary leitmotif for contemporary border rivalries and dynamics. Whether the region's 11 states want it or not, their bordered identity is falling into ever sharper definition, if only because of pressure from extraregional states. This book aims to provide new ways of looking at the reality and illusion of bordered Southeast Asia.

The Art of Not Being Governed James C. Scott, 2009-01-01 From the acclaimed author and scholar James C. Scott, the compelling tale of Asian peoples who until recently have stemmed the vast tide of state-making to live at arm's length from any organized state society For two thousand years the disparate groups that now reside in Zomia (a mountainous region the size of Europe that consists of portions of seven Asian countries) have fled the projects of the organized state societies that surround them—slavery, conscription, taxes, corvée labor, epidemics, and warfare. This book, essentially an “anarchist history,” is the first-ever examination of the huge literature on state-making whose author evaluates why people would deliberately and reactively remain stateless. Among the strategies employed by the people of Zomia to remain stateless are physical dispersion in rugged terrain; agricultural practices that enhance mobility; pliable ethnic identities; devotion to prophetic, millenarian leaders; and maintenance of a largely oral culture that allows them to reinvent their histories and genealogies as they move between and around states. In accessible language, James Scott, recognized worldwide as an eminent authority in Southeast Asian, peasant, and agrarian studies, tells the story of the peoples of Zomia and their unlikely odyssey in search of self-determination. He redefines our views on Asian politics, history, demographics, and even our fundamental ideas about what constitutes civilization, and challenges us with a radically different approach to history that presents events from the perspective of stateless peoples and redefines state-making as a form of “internal colonialism.” This new perspective requires a radical reevaluation of the civilizational narratives of the lowland states. Scott's work on Zomia represents a new way to think of area studies that will be applicable to other runaway, fugitive, and marooned communities, be they Gypsies, Cossacks, tribes fleeing slave raiders, Marsh Arabs, or San-Bushmen.

Secession and Security Ahsan I. Butt, 2017-11-15 In Secession and Security, Ahsan I. Butt argues that states rather than separatists determine whether a secessionist struggle will be peaceful, violent, or genocidal. He investigates the strategies, ranging from negotiated concessions to large-scale repression, adopted by states in response to separatist movements. Variations in the external security environment, Butt argues, influenced the leaders of the Ottoman Empire to use peaceful concessions against Armenians in 1908 but escalated to genocide against the same community in 1915; caused Israel to reject a Palestinian state in the 1990s; and shaped peaceful splits in Czechoslovakia in 1993 and the Norway-Sweden union in 1905. Butt focuses on two main cases—Pakistani reactions to Bengali and Baloch demands for independence in the 1970s and India's responses to secessionist movements in Kashmir, Punjab, and Assam in the 1980s and 1990s. Butt's deep historical approach to his subject will appeal to policymakers and observers interested in the last five decades of geopolitics in South Asia, the contemporary Israeli-Palestinian conflict, and ethno-national conflict, separatism, and nationalism more generally.

Building the Tatmadaw Maung Aung Myoe, 2009-01-22 Ever since Myanmar regained her independence in January 1948, the Tatmadaw (Myanmar Armed Forces) has been crucial in restoring and maintaining law and order. It is one of the most important institutions in Myanmar politics. Various aspects of the Tatmadaw have been studied. The most notable area of study has been the political role of the military. This study looks at the organizational development of the Myanmar armed forces. It analyses four different aspects of the Tatmadaw: military doctrine and strategy, organization and force structure, armament and force modernization, and military training and officer education. It sets out security perceptions and policies, charting developments in each phase against the situation at the time, and also notes the contributions of the leading actors in the process. Since early 1990s, the Tatmadaw has implemented a force modernization programme. This work studies rationales and strategy behind the force modernization programme and examines the military capabilities of the Tatmadaw. Drawing extensively from archival sources and existing literature, this empirically grounded research argues that, while the internal armed security threat to the state continues to play an important role, it is the external security threat that gives more weight to the expansion and modernization of the Tatmadaw since 1988. It also argues that, despite its imperfections, the Tatmadaw has transformed from a force essentially for counter-insurgency operations into a force capable of fighting in limited conventional warfare.

The Ethics of Identity Kwame Anthony Appiah,2023-10-03 A bold vision of liberal humanism for navigating today's complex world of growing identity politics and rising nationalism Collective identities such as race, nationality, religion, gender, and sexuality clamor for recognition and respect, sometimes at the expense of other things we value. To what extent do they constrain our freedom, and to what extent do they enable our individuality? Is diversity of value in itself? Has the rhetoric of human rights been overstretched? Kwame Anthony Appiah draws on thinkers through the ages and across the globe to explore such questions, developing an account of ethics that connects moral obligations with collective allegiances and that takes aim at clichés and received ideas about identity. This classic book takes seriously both the claims of individuality—the task of making a life—and the claims of identity, these large and often abstract social categories through which we define ourselves.

Freedom in the World Dale Bricker,1992 Today, perhaps more than any other time in history, are people conscious of the importance of political and civil liberties. The astonishing events of the last few years have opened eyes and drawn attention across the world to countless struggles for freedom. In this volume, Freedom House, the nation's leading human rights advocacy group, presents among other information the findings of the nineteenth Comparative Survey of Freedom. The background of freedom in each of the nations of the world is presented along with an account of the impact of current events. The status of political and civil liberties is assessed and the country is assigned a rating based on the assessment. The results of the survey are graphically presented in the colorful Map of Freedom, a wonderful display of the shifting geography of freedom. In addition to the country-by-country rating, the book offers invaluable resource information including tables and charts which show at a glance the major changes that have taken place over the last year. Regional overviews of Asia, Africa, the United States, etc. by acknowledged experts summarize the year's major events for different parts of the world.

Development and Ethnocide Sita Venkateswar,2004 This book is an ethnographic account of colonialism in the Andaman Islands, Bay of Bengal, India. It examines the links between colonialism and development under British and Indian administrations, and analyses how the different indigenous groups (the Andamanese, the Onge, the Jarawa and the Sentinelese) have responded differently and been affected in different ways by colonization and the everyday dynamics of colonial administrative practices. It emphasizes particularly the dynamics of power and gender. The books also looks at the present situation of the Jarawa who, until recently, were known as a people that avoided contact with the surrounding society. The book concludes with a section on current advocacy initiatives being spearheaded by civil society organizations and scholars aimed at securing the Jarawas' right to territory and to choose for themselves which future they want. The book includes an appendix containing the 2003 'Draft Policy on the Jarawas' (by Shri K.B. Saxena, member of the Expert Committee on the Jarawas) as well as an alternative Jarawa policy framework drafted by a group of independent experts and observers, of which the author is a member.

Regionalism in Southeast Asia Nicholas Tarling,2006-09-27 Regionalism in Southeast Asia provides the reader with an historical analysis of Southeast Asia from the distinct perspective of regionalism. Southeast Asian history is usually written from a national point of view, which underplays the links between neighbouring states and nations and the effects of these bonds on the development of regionalism. This innovative book begins by defining the meaning of 'region' and 'regionalism' and then applies it to periods in history in Southeast Asia, looking at how patterns of regionalism have shifted through time to the present day. By focusing on the regional perspective Nicholas Tarling gives an original treatment of Southeast Asian history, its political dynamics and its international realtions. Regionalism in Southeast Asia completes a trilogy of books on Southeast Asia by Nicholas Tarling published by Routledge, the other two are Nationalism in Southeast Asia and Imperialism in Southeast Asia.

Autism in Adolescents and Adults Eric Schopler,Gary B. Mesibov,1983-02-28 The state of North Carolina has had a longstanding concern and com mitment to the understanding and treatment of autistic, communications handicapped children and their families. This commitment found expres sion in the only comprehensive statewide program for families confronted with this disability, Division for the Treatment and Education of Autistic and related Communication handicapped CHildren (Division TEACCH). Our program staff has been privileged to respond to this commitment by developing and providing the needed services, and to engage in research informed by our clinical experience. Although many of the problems con cerning these developmentally disabled children remain to be solved, substantial progress has been made during this past decade of collabo ration among professionals, parents, and their government representa tives. The TEACCH staff has resolved to mark the effectiveness of this collaboration by holding a series of annual conferences focused on the several major issues confronting these children and their families. The conferences are held in order to bring together the best research knowl edge available to us from throughout the country, and to encourage par ticipation by the different professional disciplines and concerned parents. In addition these annual meetings form the basis for a series of books based on the conference theme. These books are, however, not merely the published proceedings of the presented papers: some chapters are expanded from conference presentations and many others were solicited from experts in the related areas of research and their service application.

Human Insecurity in East Asia Michio Umegaki,Lynn Thiesmeyer,Atsushi Watabe,2009 Threats to human security do not necessarily take cataclysmic forms such as war or natural disaster, nor does human insecurity exist solely within a suspended living environment like refugee camps. This publication explores less obvious threats to human security and how people and communities face them.--Publisher's description.

Dictionary of Languages Andrew Dalby,2015-10-28 Covering the political, social and historical background of each language, Dictionary of Languages offers a unique insight into human culture and communication. Every language with official status is included, as well as all those that have a written literature and 175 'minor' languages with special historical or anthropological interest. We see how, with the rapidly increasing uniformity of our culture as media's influence spreads, more languages have become extinct or are under threat of extinction. The text is highlighted by maps and charts of scripts, while proverbs, anecdotes and quotations reveal the features that make a language unique.
