**Invisible Punishment** Meda Chesney-Lind, Marc

Mauer, 2011-05-10 In a series of newly commissioned essays from the leading scholars and advocates in criminal justice, *Invisible Punishment* explores, for the first time, the far-reaching consequences of our current criminal justice policies. Adopted as part of “get tough on crime” attitudes that prevailed in the 1980s and ’90s, a range of strategies, from “three strikes” and “a war on drugs,” to mandatory sentencing and prison privatization, have resulted in the mass incarceration of American citizens, and have had enormous effects not just on wrong-doers, but on their families and the communities they come from. This book looks at the consequences of these policies twenty years later.

**Empires and Diversity** Gregory E. Areshian, 2013-12-31

For more than four thousand years, empires have been geographically the largest polities on Earth, shaping in many respects the human past and present in different epochs and on different continents. Covering the time span from the second millennium B.C.E. to the sixteenth century C.E., and geographic areas from China to South America, the case studies included in this volume demonstrate the necessity to combine perspectives from the *longue duree* and global comparativism with the theory of agency and an understanding of specific contexts for human actions.

Contributions from leading scholars examine salient aspects of the Hittite, Assyrian, Ancient Egyptian, Achaemenid and Sasanian Iranian, Zhou to Han Dynasty Chinese, Inka, and Mughal empires.

*The Masculine Civilization* Rene Hirsch, 2013-10-20

For thousands of years, men have struggled to establish their supremacy. At first, they used spirits to secure for themselves a function in a natural world that seemed to have taken sides with the feminine. Eventually, they created an all-mighty divinity, and

established their status as second to none other than that highest of all authority. Sailing through history, we show that the way procreation was perceived has determined how men and women positioned themselves in the universe. It has wielded consequences that have deeply affected our evolution, from the primal vision of an all-encompassing natural world in which Mother Nature represented the source of all life, to the subjection of nature and woman, with God the Father sitting at the summit of the creation. This emphasis on gender and nature brings into perspective the current social and economic resurgence of women and the new attitude towards environment that needs to be protected from our own deeds. These intricate leitmotifs make us witness a turning point in our history.

### **Phytochemistry: An in-silico and in-vitro Update**

Shashank Kumar, Chukwuebuka Egbuna, 2019-06-25

Phytochemistry is the branch of science that deals with the study of plant-derived chemicals or compounds, which are also known as phytochemicals or plant-derived secondary metabolites. Plants are known to produce phytochemicals that are essential for their growth and reproduction, as they protect them from insects, pathogens, and herbivores. Some of the major groups of plant-derived secondary metabolites are phenolics, flavonoids, terpenoids, alkaloids, tannin etc. Plant-derived phytochemicals are pharmacologically active and have the potential to cure various human diseases and disorders. Natural plant products have been known for their medicinal properties for untold years, and form the basis of several medicinal systems such as Chinese, Unani, and Ayurvedic Medicine. This book offers an essential introduction to phytochemicals and their synthetic analogues. It discusses various in silico approaches used to identify pharmacologically active phytochemicals and their biological activities, as well as in vitro and in vivo models/assays that have been utilized for the pharmacological profiling of plant-derived products to combat cancer, diabetes, cardiovascular diseases and

neurological disorders. The intended audience includes upper-level undergraduate and graduate students; researchers and scientists from the pharmaceutical/food chemistry/nutrition sciences/biochemistry, and clinical biochemistry fields; and medical students. Sharing the latest findings, the book will familiarize these readers with the concepts, chemistry, and tremendous potential of phytochemistry.

Dionne Jr. When *The Culture of Narcissism* was first published in 1979, Christopher Lasch was hailed as a “biblical prophet” (Time). Lasch’s identification of narcissism as not only an individual ailment but also a burgeoning social epidemic was groundbreaking. His diagnosis of American culture is even more relevant today, predicting the limitless expansion of the anxious and grasping narcissistic self into every part of American life. *The Culture of Narcissism* offers an astute and urgent analysis of what we need to know in these troubled times.

*Re-Creating Anthropology* David N. Gellner,Dolores P. Martinez,2022-04-26 This book makes a notable contribution to discussions of what anthropology is and should be in the twenty-first century through a reconsideration, from diverse sub-disciplinary and interdisciplinary perspectives, of the interactions between sociality, matter, and the imagination. It explores the imagination in its social contexts, how it is put to work, and how, in its embodied and material forms, it works in practice. The chapters provide detailed case studies, including film-making in Egypt; spirit-possession/exorcism in Italy; Theosophy and the production of knowledge about UFOs; the role of mistakes or glitches in public performances; humans' varying relationships to the environment; post-coloniality, time, and crisis in anthropology; and artistic creativity.

*Social Death* Lisa Marie Cacho,2012-11-12 Winner of the

2013 John Hope Franklin Book Prize presented by the American Studies Association *Social Death* tackles one of the core paradoxes of social justice struggles and scholarship—that the battle to end oppression shares the moral grammar that structures exploitation and sanctions state violence. Lisa Marie Cacho forcefully argues that the demands for personhood for those who, in the eyes of society, have little value, depend on capitalist and heteropatriarchal measures of worth. With poignant case studies, Cacho illustrates that our very understanding of personhood is premised upon the unchallenged devaluation of criminalized populations of color. Hence, the reliance of rights-based politics on notions of who is and is not a deserving member of society inadvertently replicates the logic that creates and normalizes states of social and literal death. Her understanding of inalienable rights and personhood provides us the much-needed comparative analytical and ethical tools to understand the racialized and nationalized tensions between racial groups. Driven by a radical, relentless critique, *Social Death* challenges us to imagine a heretofore “unthinkable” politics and ethics that do not rest on neoliberal arguments about worth, but rather emerge from the insurgent experiences of those negated persons who do not live by the norms that determine the productive, patriotic, law abiding, and family-oriented subject.
