Pathways to Careers in Health Care Christopher T. King, Philip Young P. Hong, 2019-12-16 This book provides analyses and evaluations of the Health Profession Opportunity Grants (HPOG) program, a federal government demonstration project that is targeted at providing career opportunities in the health care field for individuals in low-wage populations.

Ontology Learning and Population Paul Buitelaar, Philipp Cimiano, 2008 The promise of the Semantic Web is that future web pages will be annotated not only with bright colors and fancy fonts as they are now, but with annotation extracted from large domain ontologies that specify, to a computer in a way that it can exploit, what information is contained on the given web page. The presence of this information will allow software agents to examine pages and to make decisions about content as humans are able to do now. The classic method of building an ontology is to gather a committee of experts in the domain to be modeled by the ontology, and to have this committee.

The Computer Contradictionary Stan Kelly-Bootle, 1995 Ascertain the meaning before consulting this dictionary, warns the author of this collection of deliberately satirical misdefinitions. New computer cultures and their jargons have burgeoned since this book's progenitor, *The Devil's DP Dictionary*, was published in 1981. This updated version of Stan Kelly-Bootle's romp through the data processing lexicon is a response to the Unix pandemic that has swept academia and government, to the endlessly hyped panaceas offered to the MIS, and to the PC explosion that has brought computer terminology to a hugely bewildered, lay audience.' The original dictionary, a pastiche of Ambrose Bierce's famous work, parried chiefly the mainframe and mini-folklore of the 1950s, 1960s and 1970s. This revision adds over 550 new entries and enhances many of the original definitions. Key targets are a host of new follies crying out for cynical lexicography including: the GUI-Phooey iconoclasts, object orienteering and the piping of BLObs down the Clinton-Gore InfoPike.

The Anatomy of Terrorism David E. Long, 1990 The author maintains that without full government cooperation on an international basis, terrorism will not be kept at bay. And to achieve this, one of the first steps is full understanding of the entire subject.

Oak Ridge National Laboratory Leland Johnson, Daniel Schaffer, 1994 Leland Johnson and Daniel Schaffer begin their narrative in 1943 when the U.S. Army Corps of Engineers built ORNL in the hills of East Tennessee to produce plutonium for atomic weapons. After World War II, ORNL became a center for fundamental scientific research under the successive management of the Atomic Energy Commission, the Energy Research and Development Administration, and the Department of Energy.

Language Contact at the Romance-Germanic Language Border Jeanine Treffers-Daller, Roland Willemyns, 2002 The current volume brings together sociolinguistic analyses of language contact along the Romance Germanic Language Border, shedding more light on the variable and the universal elements in language contact and shift. It covers the whole range of the border, from French Flanders through South Tirol. Every part of it has been treated by outstanding experts. They describe the current state of the art in 'their' portion of the language border and include information on the legal and/or practical status of the language border and the status and function of all languages concerned. Attitudinal and language planning initiatives as well as the standardisation status of the regionally official and minority languages are discussed. Language borrowing, code switching and other language contact phenomena are analysed in detail.

Pro Full-Text Search in SQL Server 2008 Hilary Cotter, Michael Coles, 2009-01-29 Businesses today want actionable insights into their data—they want their data to reveal itself to them in a natural and user-friendly form. What could be more natural than human language? Natural-language search is at the center of a storm of ever-increasing web-driven demand for human-computer communication and information access. SQL Server 2008 provides the tools to take advantage of the features of its built-in enterprise-level natural-language search engine in the form of integrated full-text search (iFTS). iFTS uses text-aware relational queries to provide your users with fast access to content. Whether you want to set up an enterprise-wide Internet or intranet search engine or create less ambitious natural-language search applications, this book will teach you how to get the most out of SQL Server 2008 iFTS: Introducing powerful iFTS features in SQL Server, such as the FREETEXT and CONTAINS predicates, custom thesauruses, and stop lists Showing you how to optimize full-text query performance through features like full-text indexes and iFilters Providing examples that help you understand and apply the power of iFTS in your daily projects

The Age of Addiction David T. Courtwright, 2019-05-06 We live in an age of addiction, from compulsive gaming and shopping to binge eating and opioid abuse. What can we do to resist temptations that insidiously and deliberately rewire our brains? Nothing, David Courtwright says, unless we understand the global enterprises whose "limbic capitalism" creates and caters to our bad habits.

Computer-Related Risks Peter G. Neumann, 1994-10-18 This sobering description of many computer-related failures throughout our world deflates the hype and hubris of the industry. Peter Neumann analyzes the failure modes, recommends sequences for prevention and ends his unique book with some broadening reflections on the future. —Ralph Nader, Consumer Advocate This book is much more than a collection of computer mishaps; it is a serious, technically oriented book written by one of the world's leading experts on computer risks. The book summarizes many real events involving computer technologies and the people who depend on those technologies, with widely ranging causes and effects. It considers problems attributable to hardware, software, people, and natural causes. Examples include disasters (such as the Black Hawk helicopter and Iranian Airbus shootdowns, the Exxon Valdez, and various transportation accidents); malicious hacker attacks; outages of telephone systems and computer networks; financial losses; and many other strange happenstances (squirrels downing power grids, and April Fool's Day pranks). Computer-Related Risks addresses problems involving reliability, safety, security, privacy, and human well-being. It includes analyses of why these cases happened and discussions of what might be done to avoid recurrences of similar events. It is readable by technologists as well as by people merely interested in the uses and limits of technology. It is must reading for anyone with even a remote involvement with computers and communications—which today means almost everyone. Computer-Related Risks: Presents comprehensive coverage of many different types of risks Provides an essential system-oriented perspective Shows how technology can affect your life—whether you like it or not!

Consuming Cultural Hegemony Harisur Rahman, 2019-11-22 This book examines the circulation and viewership of Bollywood films and filmi modernity in Bangladesh. The writer poses a number of fundamental questions: what it

means to be a Bangladeshi in South Asia, what it means to be a Bangladeshi fan of Hindi film, and how popular film reflects power relations in South Asia. The writer argues that partition has resulted in India holding hegemonic power over all of South Asia's nation-states at the political, economic, and military levels—a situation that has made possible its cultural hegemony. The book draws on relevant literature from anthropology, sociology, film, media, communication, and cultural studies to explore the concepts of hegemony, circulation, viewership, cultural taste, and South Asian cultural history and politics.

Youth Gambling Jeffrey L. Derevensky, Daniel T. L. Shek, Joav Merrick, 2011-10-27 Youth gambling represents a potentially serious public policy and health issue. Nevertheless, the rise in youth gambling issues and problems in the global context is not matched with a parallel increase in research on adolescent gambling. As such, there is an urgent need to conduct more studies on adolescent gambling behaviour. Recently significant advances in the knowledge of the risk factors associated with adolescent problems has emerged. This book addresses issues related to prevalence, assessment, prevention and treatment of youth gambling problems as well as concerns related to technological changes associated with youth problem gambling.

Political Violence in South Asia Ali Riaz, Zobaida Nasreen, Fahmida Zaman, 2018-09-24 Political violence has remained an integral part of South Asian society for decades. The region has witnessed and continued to encounter violence for achieving political objectives from above and from below. Violence is perpetrated by the state, by non-state actors, and used by the citizens as a form of resistance. Ethnic insurgency, religion-inspired extremism, and ideology-driven hostility are examples of violent acts that have emerged as challenges to the states which have responded with violence in the form of civil war and through violations of human rights disregarding international norms. This book explores various dimensions of political violence in South Asia, namely in Bangladesh, India, Nepal, Pakistan, and Sri Lanka. Each chapter either speaks to an important aspect of the political violence or provides an overall picture of the nature and scope of political violence in the respective country. Political violence is understood in the larger sense of political, that is, above and beyond institutions, and also as an integral part of social relationships where social norms and the role of individual agency play seminal roles. The contributions in this book incorporate both institutional and non-institutional dimensions of political violence. Exploring how everyday life in South Asian states and societies is transformed by the engagement with violence through direct and indirect methods, this book adopts an interdisciplinary framework; diverse methods are employed – from ethnographic readings to more macro level analyses. The phenomenon is explored from historical, sociological, and political perspectives. This book will be useful as a supplementary text in courses on South Asian Studies in general and South Asian Politics in particular.

Art Arktis Dietmar Baum, Tini Papamichalis, 2015 'Art Arktis' explores the fragility and variety of a majestic, untouched world through a collection of fine-art photography. Dietmar Baum and Tini Papamichalis embarked on a three-week expedition, capturing landscapes otherwise guarded from the sights of mankind by ice with the help of Hasselblad's latest camera technology. Using their trained eyes and artistic points of view, the two have created seemingly surreal images--as if a scene from another planet was painted. The goal of this Antarctic excursion in February 2014 was to give insight into this fragile and pristine land, transporting the viewer to these solitary vistas. The stunning array of images of Antarctica evokes a lasting impression--to undoubtedly preserve this region because of its indisputable role in our planet's life. SELLING POINTS: * Following successful exhibitions the images can now be seen in a large-format coffee table book * Explore the wonders of Antarctica * A must for any enthusiast of polar landscapes 120 colour photographs

Language, Borders and Identity Dominic Watt, 2014-10-12 Identifying and examining political, socio-psychological and symbolic borders, Language, Borders and Identity encompasses a broad, geographically diverse spectrum of border contexts, taking a multi-disciplinary approach by combining sociolinguistics research with human geography, anthropology and social psychology.
