Pesticides in the Diets of Infants and Children

National Research Council, Division on Earth and Life Studies, Commission on Life Sciences, Committee on Pesticides in the Diets of Infants and Children, 1993-02-01

Many of the pesticides applied to food crops in this country are present in foods and may pose risks to human health. Current regulations are intended to protect the health of the general population by controlling pesticide use. This book explores whether the present regulatory approaches adequately protect infants and children, who may differ from adults in susceptibility and in dietary exposures to pesticide residues. The committee focuses on four major areas: Susceptibility: Are children more susceptible or less susceptible than adults to the effects of dietary exposure to pesticides? Exposure: What foods do infants and children eat, and which pesticides and how much of them are present in those foods? Is the current information on consumption and residues adequate to estimate exposure? Toxicity: Are toxicity tests in laboratory animals adequate to predict toxicity in human infants and children? Do the extent and type of toxicity of some chemicals vary by species and by age? Assessing risk: How is dietary exposure to pesticide residues associated with response? How can laboratory data on lifetime exposures of animals be used to derive meaningful estimates of risk to children? Does risk accumulate more rapidly during the early years of life? This book will be of interest to policymakers, administrators of research in the public and private sectors, toxicologists, pediatricians and other health professionals, and the pesticide industry.

Silent Partners Amy M. Froide,2017 Women were active participants in London's first stock market beginning in the 1690s and continuing through the eighteenth century. Whether playing the state lottery, investing in government funds or speculating in company stocks, women regularly comprised between a fifth and a third of public investors. There was no single female investor type, rather some women ran risks and speculated in stocks while others sought out low-risk, low-return options for their retirement years.

The Battle for the Keys Justin W Bass, 2014-04-01

There has been a lack of serious historical investigation of the famous creedal statement 'Christ descended into hell' that was universally affirmed by the church for the first 1,500 years of Church history. This book is an in-depth investigation of the history of the doctrine of Christ's descent and how Revelation 1:18 alludes to Christ's descent. COMMENDATION In *The Battle for the Keys* Justin Bass leads us through an exceptional exegetical, historical, and theological exploration of the question of both the whether and whither of the Christ's descensus ad infernos. Whatever doubters or believers choose to do with Dr Bass's competent and convincing evidence, arguments and conclusions, they cannot choose to ignore them. -
