Typing Academy Delmer Rohner,2021-08-11 Touch typing is typing without looking at the keyboard. The fundamental idea is that each finger is given its section of the keyboard and your fingers learn the location of the keyboard through practicing regularly and gaining muscle memory to eventually build up speed whilst typing. Learning to touch-type with this method takes only 10 hours. You will reap the benefits for a lifetime, whether you are using a keyboard at work or home. The easy-to-use lessons are provided into manageable one-hour blocks and there are plenty of exercises to consolidate what you have learned. And touch-typing is a skill that can make you money as well as saving you time.

Typing and Keyboarding for Everyone with Typing Tutor 6 Nathan Levine,1998 36 easy lessons to improve speed and accuracy. With Typing Tutor 12 CM CD.

Zoom-Type Renee R Ellison,2004-02-03 Teach yourself how to type in 5 days instead of wasting all year on it. Zoom-Type is a revolutionary breakthrough in teaching touch-typing FAST by using the right brain. 100s of quick snapshots and a musical finger march get you seeing, saying, and tapping the correct keys with the correct fingers in just 5 days (each session lasts 5 minutes). For ages 4 to 94. Totally portable-no computer necessary. This is the only right-brain typing course on the market. You'll be speed-typing while students trying other programs are still just getting started. Most computer-based programs designed to teach typing are still in the dark ages, pedagogically. The brain learns best by pictures. This typing course is unique in 3 ways: (1) Spaced repetition-five-minute lessons, several times a day! Away with hour-long drudgery! Rapid-fire quick imprints of the autonomic nervous system gets the job done. (2) Right brain-uses the picture side of the brain, not just the left side as other typing methods do. With Zoom-Type, you subconsciously learn where the letters LIVE, not just what they ARE. (3) Splintered skills-you learn each skill separately, in small increments, and then when you put them together all the brain has to do is jump the synapses between the already acquired mini-skills. The brain is tricked into thinking the whole task is super EASY. THIS VERSION IS ONLY THE PAPERBACK BOOK. IT IS POSSIBLE TO LEARN THIS PROGRAM WITH ONLY THIS BOOK, BUT USING THE AUDIO FILES IS HIGHLY RECOMMENDED. Contact Homeschool How-Tos at HOMESCHOOLHOWTOS.COM to order those MP-3 files for immediate download via WeTransfer.com after you received this book.

Touch Typing in Ten Lessons Ruth Ben'Ary,1982 Do you need to learn how to type in a hurry? Or do you just need a refresher course to practice with and tone up your skills? This is the shortest typing course that covers all of the fundamental skills of touch typing. This classic handbook, which has literally taught more than a million people the basics of typing, can teach you to type too. Touch Typing in 10 Lessons starts by teaching you the basic combinations for fingering the keyboard, and then helps you master the entire alphabet. Once you've learned the alphabet, the book jumps right into capitals, punctuation, and numbers. Learning the keyboard is just the beginning. The book will teach you how to set up professional business letters and tricks to help you get the most out of your typewriter (or word processor). There are dozens of drills that will help you develop the accuracy and speed you need in school and at the office. Finally, there are practice tests that will help you get over fears concerning typing tests and that will build up your speed on the keyboard. Book jacket.

Course in Nepali David Matthews,2013-01-11 Nepali has also been adopted by peoples of the Himalayan region who belong to different linguistic groups, and is now understood throughout the whole of Nepal, the Darjeeling region of West Bengal, Sikkim, Bhutan and parts of Tibet, where it has functioned as a language of trade and commerce for well over two centuries. The aim of this course, which covers the whole grammar and all the constructions of modern Nepali, is to present a full description of both the spoken and written forms of modern standard Nepali, and to enable the student to understand, speak and read most types of Nepali he or she is likely to encounter. The earlier lessons concentrate mainly on the spoken style, and the conversation passages whilst the later lessons

concern religious, political and literary topics. Nepal is a land which already provides great enjoyment to the increasing number of visitors from the west. A knowledge of the language leads to a deeper understanding of the culture of its people, and the object of A Course in Nepali is to provide the means of learning it without much difficulty. Earlier editions of this course have been the standard book for students at the School of Oriental and African Studies, and it is without question the established market leader.

The All-levels Typing Tutor Lorna Dulieu,198?

Lifelong Kindergarten Mitchel Resnick,2018-08-28 How lessons from kindergarten can help everyone develop the creative thinking skills needed to thrive in today's society. In kindergartens these days, children spend more time with math worksheets and phonics flashcards than building blocks and finger paint. Kindergarten is becoming more like the rest of school. In Lifelong Kindergarten, learning expert Mitchel Resnick argues for exactly the opposite: the rest of school (even the rest of life) should be more like kindergarten. To thrive in today's fast-changing world, people of all ages must learn to think and act creatively—and the best way to do that is by focusing more on imagining, creating, playing, sharing, and reflecting, just as children do in traditional kindergartens. Drawing on experiences from more than thirty years at MIT's Media Lab, Resnick discusses new technologies and strategies for engaging young people in creative learning experiences. He tells stories of how children are programming their own games, stories, and inventions (for example, a diary security system, created by a twelve-year-old girl), and collaborating through remixing, crowdsourcing, and large-scale group projects (such as a Halloween-themed game called Night at Dreary Castle, produced by more than twenty kids scattered around the world). By providing young people with opportunities to work on projects, based on their passions, in collaboration with peers, in a playful spirit, we can help them prepare for a world where creative thinking is more important than ever before.
