Wave Fields in Real Media José M. Carcione,2014-12-08 Authored by the internationally renowned José M. Carcione, *Wave Fields in Real Media: Wave Propagation in Anisotropic, Anelastic, Porous and Electromagnetic Media* examines the differences between an ideal and a real description of wave propagation, starting with the introduction of relevant stress-strain relations. The combination of this relation and the equations of momentum conservation lead to the equation of motion. The differential formulation is written in terms of memory variables, and Biot's theory is used to describe wave propagation in porous media. For each rheology, a plane-wave analysis is performed in order to understand the physics of wave propagation. This book contains a review of the main direct numerical methods for solving the equation of motion in the time and space domains. The emphasis is on geophysical applications for seismic exploration, but researchers in the fields of earthquake seismology, rock acoustics, and material science - including many branches of acoustics of fluids and solids - may also find this text useful. New to this edition: This new edition presents the fundamentals of wave propagation in Anisotropic, Anelastic, Porous Media while also incorporating the latest research from the past 7 years, including that of the author. The author presents all the equations and concepts necessary to understand the physics of wave propagation. These equations form the basis for modeling and inversion of seismic and electromagnetic data. Additionally, demonstrations are given, so the book can be used to teach post-graduate courses. Addition of new and revised content is approximately 30%. Examines the fundamentals of wave propagation in anisotropic, anelastic and porous media Presents all equations and concepts necessary to understand the physics of wave propagation, with examples Emphasizes geophysics, particularly, seismic exploration for hydrocarbon reservoirs, which is essential for exploration and production of oil

The Scottish Covenanter Genealogical Index - (1630-1712) Isabelle MacLean,2007-02-22 This work evolved out of a love for my ancestors, one being John Whitelaw, the Covenanter Monkland Martyr, who was executed for his religious beliefs in Edinburgh, 1683. While searching for his records I came across reference to thousands of other Scottish Covenanters. This Index lists those Covenanters found in some books written about the period between 1630 and 1712. There are many, many more Covenanters, whose names need to be added to this work, and, God willing, I will do it. The Covenanters were steadfast in their Presbyterian beliefs and refused to take an oath unto the King stating that he was the head of the church. They believed that Christ was the Head of the Church and their loyalty to this belief allowed them to lay their lives down for it. The Royalists and Dragoons, who were seeking to bring them into obedience to the King, relentlessly chased the Covenanters from glen to glen. This disregard for their civil rights was brutally carried out basically in the Lowlands of Scotland. Many of their records were destroyed along with their lives and their stories only live in family lore and books that were written about them. I have extracted some of their names and created The Scottish Covenanter Genealogical Index, which is by no means complete, but is a work in progress.
