**International Financial Statistics, February
2015** International Monetary Fund. Statistics
Dept., 2015-01-30 This monthly issue of
International Financial Statistics (IFS) is a
standard source of statistics on all aspects of
international and domestic finance. Information is
presented in tables for specific countries and in
tables for area and world aggregates. Quarterly
issues of this publication provide, for 160
countries, tables with current data (or estimates)
on the value of imports from and exports to their
most important trading partners. In addition,
similar summary tables for the world, industrial
countries, and developing countries are included.
The yearbook provides, for the most recent seven
years, detailed trade data by country for
approximately 184 countries, the world, and major
areas. This annual publication provides detailed
data on transactions in revenue, expense, net
acquisition of assets and liabilities, other
economic flows, and balances of assets and
liabilities of general government and its
subsectors. The data are compiled according to the
framework of the 2001 Government Finance
Statistics Manual, which provides for several
summary measures of government fiscal performance.
In IFS, exchange rates are expressed in time

series of national currency units per SDR and national currency units per US dollar, or vice versa.

Additionally, many universities and educational institutions have their own digital libraries that provide free access to PDF books and manuals.
