The 21st Century from the Positions of Modern Science: Intellectual, Digital and Innovative Aspects Elena G. Popkova, Bruno S. Sergi, 2019-11-02 These proceedings gather the best papers presented at the "10th International Scientific and Practical Conference – the 21st Century from the Positions of Modern Science: Intellectual, Digital and Innovative Aspects," which was organized by the non-profit organization "Institute of Scientific Communications." The conference took place on May 23–24 in Nizhny Novgorod, Russia, with support from Minin Nizhny Novgorod State Pedagogical University. The chief advantage of these proceedings are their multidisciplinary character – they include articles and empirical studies addressing various fields, including economics, the social sciences, and law. Accordingly, the target audience is broad, covering scholars, researchers, independent experts, entrepreneurs, and government workers, who are interested in issues concerning: measuring and accelerating socio-economic development; the formation and evolution of the digital society and digital economy; the role of economic systems and economic subjects in the 21st-century technological revolution (the fourth industrial revolution); development and implementation of AI; development and application of intellectual resources in economic activities; and innovations in the economy.

Ion Channels as Marine Drug Targets Jean-Marc Sabatier, 2020-12-23 Marine Drugs is glad to announce its first Special Issue book on "ion channels" related research: Under the great stewardship of the Guest Editor, Dr. Jean-Marc Sabatier, four advanced research articles and three comprehensive review papers were collected in the Special Issue "Ion Channels as Marine Drug Targets". Join us to explore the advanced research outcomes in this field: α -Conotoxin RgIA and a potent analog, RgIA4, in treatment of pain; botulinum toxin-chitosan nanoparticles in treatment of atrial fibrillation; 27-amino acid (aa)-long δ -conotoxin TxVIA that modulates mammalian CaV3.x; first venomomics study of *Conus tulipa* venom; review on marine toxins targeting Kv1 channels; review on synthetic approaches to zetekitoxin AB; and review on marine natural products and drug resistance in latent tuberculosis. The second edition of this Special Issue is open for submissions, we look forward to your contribution.

Ubiquitous Computing and the Internet of Things: Prerequisites for the Development of ICT Elena G. Popkova, 2019-05-15 This book gathers the outcomes of several scientific events that were organized and conducted by the Institute of Scientific Communications (Volgograd, Russia) and the leading universities of the Volgograd region. The contributing authors include more than 700 scholars from various cities and regions of Russia. 124 works were selected out of 3,000 papers on the preconditions of formation, transformation, and legal provision of social institutes, topics that are in high demand in connection with a core aspect of digital modernization – the Internet of Things. The book is intended for a broad target audience, including scholars of various generations and various disciplines. These include young researchers (undergraduates and postgraduates) and recognized scholars (professors and lecturers) who study the socio-economic and legal consequences of the emergence and dissemination of digital technologies, including the Internet of Things. In addition, the book will benefit all those who are interested in the development of the information society, information and telecommunication, and digital technologies. The content is divided into three logical parts, the first of which is devoted to the essence of the process of institutionalization and legal regulation of the information society. In the second part, the digital economy is analyzed in view of the spheres of the national economy. In the third, the authors study the peculiarities of state and corporate regulation, infrastructural provision and support for the security of entrepreneurship, which are currently developing on the basis of the Internet of Things.

Advances in Network Clustering and Blockmodeling Patrick Doreian, Vladimir Batagelj, Anuska Ferligoj, 2020-02-03 Provides an overview of the developments and advances in the field of network clustering and blockmodeling over the last 10 years This book offers an integrated treatment of network clustering and blockmodeling, covering all of the newest approaches and methods that have been developed over the last decade. Presented in a comprehensive manner, it offers the foundations for understanding network structures and processes, and features a wide variety of new techniques addressing issues that occur during the partitioning of networks across multiple disciplines such as community detection, blockmodeling of valued networks, role assignment, and stochastic blockmodeling. Written by a team of international experts in the field, *Advances in Network Clustering and Blockmodeling* offers a plethora of diverse perspectives covering topics such as: bibliometric analyses of the network clustering literature; clustering approaches to networks; label propagation for clustering; and treating missing network data before partitioning. It also examines the partitioning of signed networks, multimode networks, and linked networks. A chapter on structured networks and coarsegrained descriptions is presented, along with another on scientific coauthorship networks. The book finishes with a section covering conclusions and directions for future work. In

addition, the editors provide numerous tables, figures, case studies, examples, datasets, and more. Offers a clear and insightful look at the state of the art in network clustering and blockmodeling Provides an excellent mix of mathematical rigor and practical application in a comprehensive manner Presents a suite of new methods, procedures, algorithms for partitioning networks, as well as new techniques for visualizing matrix arrays Features numerous examples throughout, enabling readers to gain a better understanding of research methods and to conduct their own research effectively Written by leading contributors in the field of spatial networks analysis Advances in Network Clustering and Blockmodeling is an ideal book for graduate and undergraduate students taking courses on network analysis or working with networks using real data. It will also benefit researchers and practitioners interested in network analysis.

Scientific and Technical Revolution: Yesterday, Today and Tomorrow Elena G. Popkova, Bruno S. Sergi, 2020-06-05 This book presents a system view of the digital scientific and technological revolution, including its genesis and prerequisites, current trends, as well as current and potential issues and future prospects. It gathers selected research papers presented at the 12th International Scientific and Practical Conference, organized by the Institute of Scientific Communications. The conference “Artificial Intelligence: Anthropogenic Nature vs. Social Origin” took place on December 5–7, 2019 in Krasnoyarsk, Russia. The book is intended for academic researchers and independent experts studying the social and human aspects of the Fourth Industrial Revolution and the associated transition to the digital economy and Industry 4.0, as well as the creators of the legal framework for this process and its participants – entrepreneurs, managers, employees and consumers. It covers a variety of topics, including “intelligent” technologies and artificial intelligence, the digital economy, the social environment of the Fourth Industrial Revolution and its consequences for humans, the regulatory framework of the Fourth Industrial Revolution, and the “green” consequences, prospects and financing of the Fourth Industrial Revolution.

Novel Developments in Uncertainty Representation and Processing Krassimir T. Atanassov, Oscar Castillo, Janusz Kacprzyk, Maciej Krawczak, Patricia Melin, Sotir Sotirov, Evdokia Sotirova, Eulalia Szmidt, Guy De Tré, Sławomir Zadrozny, 2015-10-23 This volume contains, first of all, the papers presented at the Fourteenth International Workshop on Intuitionistic Fuzzy Sets and Generalized Nets (IWIFSGN-2015) held on October 26–28, 2015 in Cracow, Poland. Moreover, the volume contains some papers of a particular relevance not presented at the Workshop. The Workshop is mainly devoted to the presentation of recent research results in the broadly perceived fields of intuitionistic fuzzy sets and generalized nets initiated by Professor Krassimir T. Atanassov whose constant inspiration and support is crucial for such a widespread growing popularity and recognition of these areas. The Workshop is a next edition of a series of the IWIFSGN Workshops organized for years by the Systems Research Institute, Polish Academy of Sciences, Warsaw, Poland, Institute of Biophysics and Biomedical Engineering, Bulgarian Academy of Sciences, Sofia, Bulgaria, and WIT -- Warsaw School of Information Technology, Warsaw, Poland, and co-organized by: Matej Bel University, Banská Bystrica, Slovakia, Universidad Pública de Navarra, Pamplona, Spain, Universidade de Trás-os-Montes e Alto Douro, Vila Real, Portugal, Prof. Asen Zlatarov University, Burgas, Bulgaria, Complutense University, Madrid, Spain, and the University of Westminster, Harrow, UK.

Optical Coherence Tomography and Its Non-medical Applications Michael Wang, 2020-05-27 Optical coherence tomography (OCT) is a promising non-invasive non-contact 3D imaging technique that can be used to evaluate and inspect material surfaces, multilayer polymer films, fiber coils, and coatings. OCT can be used for the examination of cultural heritage objects and 3D imaging of microstructures. With subsurface 3D fingerprint imaging capability, OCT could be a valuable tool for enhancing security in biometric applications. OCT can also be used for the evaluation of fastener flushness for improving aerodynamic performance of high-speed aircraft. More and more OCT non-medical applications are emerging. In this book, we present some recent advancements in OCT technology and non-medical applications.

Reliability and Statistics in Transportation and Communication Igor Kabashkin, Irina Yatskiv, Olegas Prentkovskis, 2022-02-22 This book reports on cutting-edge theories and methods for analyzing complex systems, such as transportation and communication networks and discusses multi-disciplinary approaches to dependability problems encountered when dealing with complex systems in practice. The book presents the most noteworthy methods and results discussed at the 21st International Multidisciplinary Conference on Reliability and Statistics in Transportation and Communication (RelStat), which took place remotely from Riga, Latvia, on October 14 – 15, 2021. It spans a broad spectrum of topics, from mathematical models and design methodologies, to software engineering, data security and financial issues, as well as practical problems in technical systems, such as transportation and telecommunications, and in engineering education.

The Turkmen Lake Altyn Asyr and Water Resources in Turkmenistan Igor S. Zonn, Andrey G. Kostianoy, 2013-10-17 This book offers a concise description of the environment and water resources in Turkmenistan. The focus is on the water bodies of Turkmenistan – the Caspian Sea, Kara-Bogaz-Gol Bay, Sarykamysh Lake, Amu Darya River, and the Karakum Canal. Respected experts from six different countries cover the landscape-geographical features, the Karakum Desert, biodiversity (especially of birds and fishes) and ecosystems, as well as regional climate change. Special attention is paid to the Altyn Asyr Lake water reclamation project, to the morphometric characteristics of the Karashor Depression, and to the four-year-long satellite monitoring of the construction area in the vicinity of the Karashor Depression. The information presented is based on observational data and scientific literature, mainly published in Russian. This is the first English book on the Altyn Asyr Project. It addresses specialists working in various fields of environmental problems and ecology, water resources and management, land reclamation and agriculture, regional climate change, and international cooperation in the water sector in Turkmenistan and Central Asia.

Innovative Trends in International Business and Sustainable Management Elena I. Lazareva, Anton D. Murzin, Baiba A. Rivza, Victoria N. Ostrovskaya, 2022-09-26 This book describes the current innovative tendencies characteristic of multifaceted scientific research and practical developments in the field of international business development and sustainable management. This book shows how companies are forced to change development strategies and business models, which actualizes new priorities for scientific research in the field of international business and sustainable management. Therefore, completely new subject areas of research are being formed; management guidelines are being transformed; new business development tools are being developed; the very system of academic research is changing. This book “Innovative Trends in International Business and Sustainable Management” is devoted to the discussion of these and other issues related to all major areas of international business development and sustainable management. This book systematically describes multidimensional trends, challenges, and opportunities for the development of international business and sustainable management in the context of a global pandemic. In this sense, it is unique and relevant for both scientific researchers and modern business practitioners. This book uniquely highlights new priorities of scientific and practical research in the field of international business and sustainable management that require a systematic knowledge of the ongoing transformations of trends, challenges, and opportunities for the development. Aimed at scholars and practitioners, the book provides illustrations of international best practice for conducting business beyond borders. The main goals of the book are firstly to provide opinions on current innovative approaches and technologies for solving modern problems of international business, as well as on the formation of a multi-level system of sustainable management of the socioeconomic systems’ development, secondly, to integrate research from academia, as well as practitioners in order to form priorities, approaches and models of company management in the context of globalization, strategies for the development of management systems in the context of the “new reality”, thirdly, to find the most relevant new areas of research, the results of which can be useful to companies for making management decisions, and concludes to analyze new tools for the

development of international business, their capabilities, and areas of application

Challenges of the Modern Economy Yakhya G. Buchaev,Arsen S. Abdulkadyrov,Julia V. Ragulina,Arutyun A. Khachatryan,Elena G. Popkova,2023-07-03 The book focuses on a systemic study of the challenges of the modern economy and related problems and areas of sustainable development of countries, regions, and businesses, with particular attention paid to the new prospects offered by the spread of digital technology. The book’s contribution to the literature is that it reveals the specifics and digital perspectives of supporting the SDGs in the economy at every level of the economy: country, regional, and corporate, considering sectoral specificities—this is reflected in six parts of the book. Part 1 identifies contemporary challenges of the modern economy as barriers to sustainable development. Part 2 reflects the future direction of sustainable development of the countries. Part 3 considers the problems and prospects for sustainable development of regions. Part 4 focuses on the problems and prospects for the sustainable development of enterprises and industries. Part 5 sheds light on the economic and legal foundations and cooperative mechanisms of sustainable development. Part 6 offers recommendations for enhancing the use of digital technologies offered by Industry 4.0 to support the SDGs. Scientists whose research interests include sustainable economic development are the primary target audience for this book. For the primary target audience, the book forms a systemic view of the global challenges of sustainable development and offers a set of scientific and methodological recommendations to provide an effective response to these challenges at every level of the economy. An additional audience for the book is practicing experts, who will find international best practices and applied recommendations to support sustainable economic development and implementation of the SDGs in the practice of state (national regulation and public administration of the region) and corporate (in various industries) management.

Proceedings of the Third International Scientific Conference “Intelligent Information Technologies for Industry” (IITI’18) Ajith Abraham,Sergey Kovalev,Valery Tarassov,Vaclav Snasel,Andrey Sukhanov,2018-12-06 This book contains papers presented in the main track of IITI 2018, the Third International Scientific Conference on Intelligent Information Technologies for Industry held in Sochi, Russia on September 17–21. The conference was jointly co-organized by Rostov State Transport University (Russia) and VŠB – Technical University of Ostrava (Czech Republic) with the participation of Russian Association for Artificial Intelligence (RAAI). IITI 2018 was devoted to practical models and industrial applications related to intelligent information systems. It was considered as a meeting point for researchers and practitioners to enable the implementation of advanced information technologies into various industries. Nevertheless, some theoretical talks concerning the state-of-the-art in intelligent systems and soft computing were also included into proceedings.

14th International Congress for Applied Mineralogy (ICAM2019) Sergey Glagolev,2019-01-01 This open access proceedings of the 14th International Council for Applied Mineralogy Congress (ICAM) in Belgorod, Russia cover a wide range of topics including applied mineralogy, advanced and construction materials, ore and industrial minerals, mineral exploration, cultural heritage, etc. It includes contributions to geometallurgy, industrial minerals, oil and gas reservoirs as well as stone artifacts and their preservation. The International Congress on Applied Mineralogy strengthens the relation between the research on applied mineralogy and the industry.

"Smart Technologies" for Society, State and Economy Elena G. Popkova,Bruno S. Sergi,2020-10-15 This proceedings book presents a comprehensive view of “smart” technologies and perspectives of their application in various areas of economic activity. The authors of the book combined the results of the cutting-edge research on the topic of “smart” technologies in the digital economy and Industry 4.0 and developed a unified scientific concept. The current experience has been considered, and the prospects for the application of “smart” technologies in society to promote social advance have been identified. “Smart” technologies in public administration and law, as well as the experience in development of e-government, have been examined. “Smart” technologies in business activity have been studied, and the transition from digital business to business 4.0 has been justified. The book contains the collection of the best works following the results of the 13th International Research-to-Practice Conference “Smart Technologies” for society, state and economy which was run by the Institute of Scientific Communications (ISC) and was held on July 2–3, 2020. The target audience of this book includes researchers investigating fundamental and applied problems of development of “smart” technologies, as well as concerned parties outside the academic community, in particular, representatives of the digital society, high-tech business entities and officials regulating the digital economy and Industry 4.0.
