Routledge Encyclopedia of Translation Technology Sin-Wai Chan, 2014-11-13 The Routledge Encyclopedia of Translation Technology provides a state-of-the-art survey of the field of computer-assisted translation. It is the first definitive reference to provide a comprehensive overview of the general, regional and topical aspects of this increasingly significant area of study. The Encyclopedia is divided into three parts: Part One presents general issues in translation technology, such as its history and development, translator training and various aspects of machine translation, including a valuable case study of its teaching at a major university; Part Two discusses national and regional developments in translation technology, offering contributions covering the crucial territories of China, Canada, France, Hong Kong, Japan, South Africa, Taiwan, the Netherlands and Belgium, the United Kingdom and the United States Part Three evaluates specific matters in translation technology, with entries focused on subjects such as alignment, bitext, computational lexicography, corpus, editing, online translation, subtitling and technology and translation management systems. The Routledge Encyclopedia of Translation Technology draws on the expertise of over fifty contributors from around the world and an international panel of consultant editors to provide a selection of articles on the most pertinent topics in the discipline. All the articles are self-contained, extensively cross-referenced, and include useful and up-to-date references and information for further reading. It will be an invaluable reference work for anyone with a professional or academic interest in the subject.

**Translation and Localization Project Management** Keiran J. Dunne, Elena S. Dunne, 2011-10-18 Over the past three decades, translation has evolved from a profession practiced largely by individuals to a cottage industry model and finally to a formally recognized industrial sector that is project-based, heavily outsourced and that encompasses a wide range of services in addition to translation. As projects have grown in size, scope and complexity, and as project teams have become increasingly distributed across geographies, time zones, languages and cultures, formalized project management has emerged as both a business requirement and a critical success factor for language service providers. In recognition of these developments, this volume examines the application of project management concepts, tools and techniques to translation and localization projects. The contributors are seasoned practitioners and scholars who offer insights into the central role of project management in the language industry today and discuss best-practice approaches to the adaptation of generic project management knowledge, skills, tools and techniques for translation and localization projects.

**An Encyclopaedia of Translation** Sin-wai Chan, David E. Pollard, 2001 Language-specific entries relate to the interaction between the Chinese-speaking and English-speaking communities of Hong Kong. At the same time, the work draws on Western knowledge and experience with translation studies in general. This book is a valuable reference for translators, scholars, and students of translation studies.

A Dictionary of Translation Technology Sin-wai Chan, 2004 This dictionary is intended for anyone who is interested in translation and translation technology. Especially, translation as an academic discipline, a language activity, a specialized profession, or a business undertaking. The book covers theory and practice of translation and interpretation in a number of areas. Addressing and explaining important concepts in computer translation, computer-aided translation, and translation tools. Most popular and commercially available translation software are included along with their website addresses for handy reference. This dictionary has 1,377 entries. The entries are alphabetized and defined in a simple and concise manner.

*Perspectives on Localization* Keiran J. Dunne, 2006-01-01 Over the past two decades, international trade agreements such as GATT and NAFTA have lowered international trade barriers. At the same time, the information revolution has fueled profound shifts in the ways companies conduct business and communicate with their customers, and worldwide acceptance of the ISO 9000 standard has established the notion that quality must be defined in terms of customer satisfaction. Falling trade barriers and rising quality standards have made linguistic and cultural issues increasingly important. To successfully compete in today's global on-demand economy, companies must localize their products and services to fit the needs of the local market in terms of language, culture, functionality, work practices, as well as legal and regulatory requirements. In recognition of the growing importance of localization, this volume explores a certain number of key issues, including:

- Return on investment and the localization business case
- Localization cost drivers and cost-containment strategies
- Localization quality and customer-focused quality management
- Challenges posed by localization of games, including Massively Multiplayer Online Role-Playing Games (MMORPGs)
- Using a meta-language to facilitate accurate translation of disembodied content
- The case for managing source-language terminology
- Terminology management in the localization process
- Reconciling industry needs and academic objectives in localization education
- Localization standards and the commoditization of linguistic information
- The creation and application of language industry standards
- Rethinking customer-focused localization through user-centered design
- Moving from translation reuse to language reuse

**Early Years in Machine Translation** W. John Hutchins, 2000-01-01 This title details the history of the field of machine translation (MT) from its earliest years. *An Exposition of Benevolence* 仁政, 1984

**Style, Wit and Word-Play** Tao Tao Liu, Chan Sin-wai, Laurence Wong, 2011-12-08 This collection of essays is dedicated to the memory of David Hawkes (1923–2009), who is remembered as a pre-eminent translator and interpreter of Chinese literature into English, his most famous work being the translation of the classic eighteenth-century Chinese novel, the Hongloulou or The Story of the Stone. The first part of the collection consists of studies on him and his works; the second part on the art of translation into English from Chinese literature. All the essays are written by scholars in the field from Britain, America, Australia and Hong Kong.

**My Son, Yo-Yo** Marina Ma, John A. Rallo, 1995 Yo-Yo Ma is an internationally acclaimed cello virtuoso. My Son, Yo-Yo is the compelling story of his life from the cradle to his entering Harvard University at the age of seventeen. It is told by his mother but narrated and written by Dr. John A. Rallo. By telling the story of her son, Marina Ma hopes other young people will realize life is a struggle uphill and that pain and hard work are part of growing up. In her story, love of family is the main sustaining force keeping it together especially during difficult times. The book, written in warm, conversational style, highlights events in the development of the boy wonder. It is divided into thirty short chapters enriched by numerous photographs from the family album.

The Dancer and the Dance Chan Sin-wai, 2014-10-17 The Dancer and the Dance is a collection of thirteen essays in translation studies. Unlike many similar collections that have appeared in the past decades, it is the product of theory integrated with practice; in it, the authors have steered clear of theorizing in a vacuum, making sure that their findings tally with what actually happens in translation; there is no attempt at putting forward hypotheses based on mere speculation. As translation theorists and/or translators whose specialties cover translation studies, linguistics, cultural studies, computer-aided translation, Chinese literature, English literature, comparative literature, and creative writing, the thirteen authors have taken up the challenge of unravelling the mystery of what, in I. A. Richards's words, "may very probably be the most complex type of event yet produced in the

evolution of the cosmos.” Impossible as the task may have seemed, they have all succeeded, each in his/her own way, in tracing out many warp and weft threads, as well as hitherto undiscovered patterns in the vast, gorgeous, and mysterious tapestry woven by God after Babel.

**Speech and Language Technologies** Ivo Ipsic, 2011-06-21 This book addresses state-of-the-art systems and achievements in various topics in the research field of speech and language technologies. Book chapters are organized in different sections covering diverse problems, which have to be solved in speech recognition and language understanding systems. In the first section machine translation systems based on large parallel corpora using rule-based and statistical-based translation methods are presented. The third chapter presents work on real time two way speech-to-speech translation systems. In the second section two papers explore the use of speech technologies in language learning. The third section presents a work on language modeling used for speech recognition. The chapters in section Text-to-speech systems and emotional speech describe corpus-based speech synthesis and highlight the importance of speech prosody in speech recognition. In the fifth section the problem of speaker diarization is addressed. The last section presents various topics in speech technology applications like audio-visual speech recognition and lip reading systems.
