Shock Value Jason Zinoman, 2011-07-07 An enormously entertaining account of the gifted and eccentric directors who gave us the golden age of modern horror in the 1970s, bringing a new brand of politics and gritty realism to the genre. Much has been written about the storied New Hollywood of the 1970s, but at the same time as Martin Scorsese, Steven Spielberg, and Francis Ford Coppola were making their first classic movies, a parallel universe of directors gave birth to the modern horror film-aggressive, raw, and utterly original. Based on unprecedented access to the genre's major players, The New York Times's critic Jason Zinoman's Shock Value delivers the first definitive account of horror's golden age. By the late 1960s, horror was stuck in the past, confined mostly to drive-in theaters and exploitation houses, and shunned by critics. Shock Value tells the unlikely story of how the much-disparaged horror film became an ambitious art form while also conquering the multiplex. Directors such as Wes Craven, Roman Polanski, John Carpenter, and Brian De Palma- counterculture types operating largely outside the confines of Hollywood-revolutionized the genre, exploding taboos and bringing a gritty aesthetic, confrontational style, and political edge to horror. Zinoman recounts how these directors produced such classics as Rosemary's Baby, Carrie, The Texas Chainsaw Massacre, and Halloween, creating a template for horror that has been imitated relentlessly but whose originality has rarely been matched. This new kind of film dispensed with the old vampires and werewolves and instead assaulted audiences with

portraits of serial killers, the dark side of suburbia, and a brand of nihilistic violence that had never been seen before. Shock Value tells the improbable stories behind the making of these movies, which were often directed by obsessive and insecure young men working on shoestring budgets, were funded by sketchy investors, and starred porn stars. But once *The Exorcist* became the highest grossing film in America, Hollywood took notice. The classic horror films of the 1970s have now spawned a billion-dollar industry, but they have also penetrated deep into the American consciousness. Quite literally, Zinoman reveals, these movies have taught us what to be afraid of. Drawing on interviews with hundreds of the most important artists in horror, Shock Value is an enthralling and personality-driven account of an overlooked but hugely influential golden age in American film.

The Geometry Code Bruce Rawles, 2012-04 Integrate practical insights from modern physics, ancient Hermetic Laws, non-dual meta-physics, transpersonal psychology, and humor, as tools for undoing conflicting beliefs we've dreamed ourselves into. The seven Hermetic laws are explored in depth and demonstrate how a mindfulness that embraces 'other' as 'self' can reverse the typical misapplication of these inescapable laws of Mentalism, Correspondence, Vibration, Polarity, Rhythm, Cause & Effect and Generation. Ubiquitous geometric symbols, paired to each of these laws - the circle, vesica piscis, sine wave, line, spiral, fractal and yin-yang - and their countless commonplace variations, seen from the vantage point of shared interests, reflect these ideas. The inspired use of natural law restores attributes of life, love, strength, purity, beauty, perfection and gratitude to our awareness.

Pandora J. Ang, 2015-04-15 It is Spring of 2012, and the most amazing archaeological discovery of our time-- a sarcophagus from an ancient civilization that predates the Egyptian Pyramids by more than fifty thousand years--is being broadcast as a live public exhibit on national TV. But in their haste to reveal a glimpse of what could be the origin of mankind, the scholars of the OBARI Foundation instead unleash an ancient plague upon the modern world. This is the age-old story of the curious--and of those who must race to close the door on what should never have been opened ... This is PANDORA, the End of Days ...

Enchanted Objects David Rose, 2015-04-28 We are now standing at the precipice of the next transformative development: the Internet of Things. Soon, connected technology will be embedded in hundreds of everyday objects we already use: our cars, wallets, watches, umbrellas, even our trash cans. These objects will respond to our needs, come to know us, and learn to think on our behalf. David Rose calls these devices--which are just beginning to creep into the marketplace--Enchanted Objects. Some believe the future will look like more of the same--more smartphones, tablets, screens embedded in every conceivable surface. Rose has a different vision: technology that atomizes, combining itself with the objects that make up the very fabric of daily living. Such technology will be woven into the background of our environment, enhancing human relationships and channeling desires for omniscience, long life, and creative expression. The enchanted objects of fairy tales and science fiction will enter real life. Groundbreaking, timely, and provocative, *Enchanted Objects* is a blueprint for a better future, where efficient solutions come hand in hand with technology that delights our senses.

In this very accessible volume, Fuller investigates the great challenges facing humanity. How will humanity survive? How does automation influence individualization? How can we utilize our resources more effectively to realize our potential to end poverty in this generation? He questions the concept of specialization, calls for a design revolution of innovation, and offers advice on how to guide "spaceship earth" toward a sustainable future.
