Promoting the Educational Success of Children and Youth Learning English National Academies of Sciences, Engineering, and Medicine,Health and Medicine Division,Division of Behavioral and Social Sciences and Education,Board on Science Education,Board on Children, Youth, and Families,Committee on Fostering School Success for English Learners: Toward New Directions in Policy, Practice, and Research,2017-08-25 Educating dual language learners (DLLs) and English learners (ELs) effectively is a national challenge with consequences both for individuals and for American society. Despite their linguistic, cognitive, and social potential, many ELs—who account for more than 9 percent of enrollment in grades K-12 in U.S. schools—are struggling to meet the requirements for academic success, and their prospects for success in postsecondary education and in the workforce are jeopardized as a result. *Promoting the Educational Success of Children and Youth Learning English: Promising Futures* examines how evidence based on research relevant to the development of DLLs/ELs from birth to age 21 can inform education and health policies and related practices that can result in better educational outcomes. This report makes recommendations for policy, practice, and research and data collection focused on addressing the challenges in caring for and educating DLLs/ELs from birth to grade 12.

English Language Learning in the Digital Age Mark Dressman,Ju Seong Lee,Laurent Perrot,2023-01-24 Provides a thorough overview of digital learning methods and their practical application in the modern language classroom *English Language Learning in the Digital Age* is a comprehensive introduction to the theoretical background and real-world application of IDLE (Informal Digital Learning of English). Designed for teachers and future teachers preparing to teach English as a second or other language, this highly practical guide focuses on incorporating digital technology into curricula to draw upon the extracurricular exposures to English that many students experience outside of the classroom. With some creativity and care, teachers can find ways to bring these experiences with English into the classroom, ultimately improving student learning outcomes. Offering a specific focus on examples and case studies drawn from language education in the Middle East, Asia, and Europe, this text employs a three-part structure beginning with the theories behind autonomous learning and the importance of informal language learning for young adults. Part two demonstrates various methods for integrating games, social media, e-books, language software, mobile apps, and other digital resources into the classroom. The third section addresses the use of IDLE methods to bridge the gap between informal and formal uses of English, the advantages and disadvantages of IDLE in

flipped classrooms and online teaching, and how IDLE strategies can enhance mandated curricula and better prepare students for national exams. The book concludes with a brief discussion of the future of language learning and the need to include digital technologies and learner-driven strategies in education policy. This unique text: Offers practical methods for bringing informal student learning into the classroom Presents a wide range of engaging digital learning activities that can complement traditional language courses and improve language acquisition Reviews mobile apps for the translation and practice of vocabulary, grammar, and other components of language learning Provides real-life examples of how teachers can develop lessons and curricula, such as watching and making vlogs and reading transcripts of podcasts and audiobooks Includes access to a companion website containing video interviews with English learners and teaching plans reflecting TESOL Technology Standards and CEFR Reference Level Descriptors for English English Language Learning in the Digital Age is an ideal textbook for upper-level undergraduate and graduate students in the fields of language education and language acquisition, as well as teachers and teachers-in-training who are preparing to teach English in countries where English is not the primary language.

Contemporary Approaches to Second Language Acquisition María del Pilar García Mayo, María Junkal Gutierrez Mangado, María Martínez Adrián, 2013-02-19 Second language acquisition (SLA) is a field of inquiry that has increased in importance since the 1960s. Currently, researchers adopt multiple perspectives in the analysis of learner language, all of them providing different but complementary answers to the understanding of oral and written data produced by young and older learners in different settings. The main goal of this volume is to provide the reader with updated reviews of the major contemporary approaches to SLA, the research carried out within them and, wherever appropriate, the implications and/or applications for theory, research and pedagogy that might derive from the available empirical evidence. The book is intended for SLA researchers as well as for graduate (MA, Ph.D.) students in SLA research, applied linguistics and linguistics, as the different chapters will be a guide in their research within the approaches presented. The volume will also be of interest to professionals from other fields interested in the SLA process and the different explanations that have been put forward to account for it.

Applying Cognitive Linguistics to Second Language Learning and Teaching Jeannette Littlemore, 2023-10-27 This is a revised and updated edition of a seminal text in the field of Cognitive Linguistics, written in an engaging and accessible style for a new generation of scholars and students. The author surveys and incorporates a wealth of more recent studies conducted in different areas since the book's original publication in 2009, exploring how new areas of research within Cognitive Linguistics have emerged and flourished, and taking account of key studies that have progressed the field since its inception. This new edition has been revised throughout to review, analyse and synthesise the latest state of the art in Cognitive Linguistics-inspired second language learning and teaching research, and suggests other areas that might benefit from further exploration. It will be essential reading for academics, educators and students across Linguistics and Education, particularly those with an interest in cognitive linguistics, second language

acquisition, foreign language teaching and language education.

Motivation and Second Language Acquisition Zoltán Dörnyei, Richard Schmidt, Richard W. Schmidt, 2001 This volume - the second in this series concerned with motivation and foreign language learning - includes papers presented at a colloquium on second language motivation at the American Association for Applied Linguistics as well as a number of specially commissioned surveys.
