**Corporate Social Responsibility Agenda, The: The Case For Sustainable And Responsible Business**

Olivier Delbard, 2020-01-14 Corporate Social Responsibility (CSR) has become a buzzword in management today. And yet, skepticism often prevails, as CSR is often associated with traditional philanthropic practices enabling companies to greenwash their unethical social and environmental practices. This book offers a fresh view on today's CSR from both historical and geographical perspectives. Exploring its roots and theoretical developments in the US, the author then focuses on how CSR has spread across the world, first in Europe and later in the developing world. An updated overview of today's CSR agenda is provided with a focus on four key issues: stakeholder inclusion, employee engagement and social dialogue, human rights and environmental sustainability. With the support of multiple cases and examples taken from various continents and industries, the book adopts a sustainability-driven perspective, based on the belief that the future of CSR lies in the strategic embeddedness of key issues into the company's value chain. Finally, the book attempts to draw the contours of tomorrow's CSR by proposing a new terminology reflecting the current evolution of CSR.

**Plagiarism, the Internet, and Student Learning**

Wendy Sutherland-Smith, 2008-04-24 Written for Higher Education educators, managers and policy-makers, *Plagiarism, the Internet and Student Learning* combines theoretical understandings with a practical model of plagiarism and aims to explain why and how plagiarism developed. It offers a new way to conceptualize plagiarism and provides a framework for professionals dealing with plagiarism in higher education. Sutherland-Smith presents a model of plagiarism, called the

plagiarism continuum, which usefully informs discussion and direction of plagiarism management in most educational settings. The model was developed from a cross-disciplinary examination of plagiarism with a particular focus on understanding how educators and students perceive and respond to issues of plagiarism. The evolution of plagiarism, from its birth in Law, to a global issue, poses challenges to international educators in diverse cultural settings. The case studies included are the voices of educators and students discussing the complexity of plagiarism in policy and practice, as well as the tensions between institutional and individual responses. A review of international studies plus qualitative empirical research on plagiarism, conducted in Australia between 2004-2006, explain why it has emerged as a major issue. The book examines current teaching approaches in light of issues surrounding plagiarism, particularly Internet plagiarism. The model affords insight into ways in which teaching and learning approaches can be enhanced to cope with the ever-changing face of plagiarism. This book challenges Higher Education educators, managers and policy-makers to examine their own beliefs and practices in managing the phenomenon of plagiarism in academic writing.

Global Nomads Anthony D'Andrea, 2007-01-24 Global Nomads provides a unique introduction to the globalization of countercultures, a topic largely unknown in and outside academia. Anthony D'Andrea examines the social life of mobile expatriates who live within a global circuit of countercultural practice in paradoxical paradises. Based on nomadic fieldwork across Spain and India, the study analyzes how and why these post-metropolitan subjects reject the homeland in order to shape an alternative lifestyle. They become artists, therapists, exotic traders and bohemian workers seeking to integrate labor, mobility and

spirituality within a cosmopolitan culture of expressive individualism. These countercultural formations, however, unfold under neo-liberal regimes that appropriate utopian spaces, practices and imaginaries as commodities for tourism, entertainment and media consumption. In order to understand the paradoxical globalization of countercultures, Global Nomads develops a dialogue between global and critical studies by introducing the concept of 'neo-nomadism' which seeks to overcome some of the shortcomings in studies of globalization. This book is an essential aide for undergraduate, postgraduate and research students of Sociology, Anthropology of Globalization, Cultural Studies and Tourism Studies.

**Framing Social Interaction (Open Access)** Anders Persson, 2018-07-20 This book is about Erving Goffman's frame analysis as it, on the one hand, was presented in his 1974 book *Frame Analysis* and, on the other, was actually conducted in a number of preceding substantial analyses of different aspects of social interaction such as face-work, impression management, fun in games, behavior in public places and stigmatization. There was, in other words, a frame analytic continuity in Goffman's work. In an article published after his death in 1982, Goffman also maintained that he throughout his career had been studying the same object: the interaction order. In this book, the author states that Goffman also applied an overarching perspective on social interaction: the dynamic relation between ritualization, vulnerability and working consensus. However, there were also cracks in Goffman's work and one is shown here with reference to the leading question in *Frame Analysis* - what is it that's going on here? While framed on a microsocial level, that question ties in with the interaction order and frame analysis as a method. If, however, it is framed on a societal level, it mirrors

metareflective and metasocial manifestations of changes and unrest in the interaction order that, in some ways, herald the emphasis on contingency, uncertainty and risk in later sociology. Through analyses of social media as a possible new interaction order - where frame disputes are frequent - and of interactional power, the applicability of Goffman's frame analysis is illustrated. As such, this book will appeal to scholars and students of social theory, classical sociology and social interaction.

*The Communism of Capital?* Armin Beverungen, Anna-Maria Murtola, Gregory Schwartz, 2013-08 The communism of capital? What could this awkward turn of phrase mean, and what might it signify with regards to the state of the world today? Does it merely describe a reality in which communist demands are twisted to become productive of capital, a capitalist realism supplemented by a disarmed communist ideology? Or does the death of the capitalist utopia mean that capital cannot contain the antagonism expressed by Occupy and other movements anymore, and therefore must confront communism upfront? Is there hope to be

gleaned from a production in common which prefigures a certain communism we can discern at the horizon? Or is the communism of capital merely a figure to be destroyed as we seek the communism of communists? The 12 contributions to this latest issue of *ephemera* explore the valances of the paradoxical and seemingly incoherent expression that is 'the communism of capital'. Collectively they stake out new territory for the theorisation and organization of political struggle in a context in which capital has become increasingly aware that its age-old nemesis might today be lurking at its very heart.

This backdoor-approach to phonemic skill acquisition is based on current neural research on Learning & the Brain--specifically how our brains actually learn best! The Secret Stories® primary purpose is to equip beginning (or struggling, upper grade) readers and writers, as well as their instructors, with the tools necessary to easily and effectively crack the secret reading and writing codes that lie beyond the alphabet, and effectively out of reach for so many learners! *Boundary-Layer Separation* Frank T. Smith, Susan N. Brown, 2011-12-28 The IUTAM Symposium on Boundary-Layer Separation, suggested by the UK

National Committee of Theoretical and Applied Mechanics and supported by the International Union of Theoretical and Applied Mechanics, was held at University College London on August 26-28, 1986. The proposed theme and scope of the Symposium were designed to help to bring about the necessary interaction between experimentalists, computationalists and theoreticians for the furthering of understanding in this challenging subject. The talks and discussions were aimed at representing the very wide range and application of separating-flow phenomena, which often substantially affect the whole of fluid dynamics at medium to large Reynolds numbers, covering in particular both laminar and turbulent flow, steady or unsteady, two- or three-dimensional, small or large-scale, incompressible or compressible, external or internal, from the experimental, computational and theoretical standpoints. It was intended that about 80 scientists would participate in the Symposium, with about 25 talks being delivered, to which poster sessions with 8 contributions were added subsequently. All the speakers and poster presenters were selected by the scientific committee, although two late replacements of speakers were required. Fruitful discussions, well led by the session chairmen, took place formally after each talk and after the poster sessions and informally on other occasions including the social events. The present proceedings of the Symposium appear to reflect much of the current state of experimental, computational and theoretical work and progress in boundary-layer separation. We hope that they provide also ideas, questions and stimulation, in addition to major recent developments.
