The Paris System for Reporting Urinary Cytology Eva M. Wojcik, Daniel F.I. Kurtycz, Dorothy L. Rosenthal, 2022-02-03 The first edition of The Paris System for Reporting Urinary Cytology introduced a completely new paradigm for detecting bladder cancer by urine cytology. This system concentrated on defining morphological characteristics of the most clinically significant form of bladder cancer, High Grade Urothelial Carcinoma. This new approach has been widely accepted throughout the world, and has become part of the daily practice of cytology. Considering that the first edition of The Paris System (TPS) introduced a new model of urinary cytodiagnosis, verification and expansion of initial material and data were anticipated. Based on evolving knowledge and readership requests, the group of highly experienced authors have created a new edition of TPS. This second edition includes areas and issues not originally covered. A new chapter on urine cytology of the upper tract, a rarely addressed topic, has been introduced. Furthermore, the issue of cellular degeneration is discussed in the criteria of all diagnostic categories. Examples of standardized reports are included in each chapter. Most importantly, a separate chapter presents data defining the risk of malignancy (ROM) for each diagnostic category to inform clinical management. New high quality images augment those of the first edition to better illustrate diagnostic clues and potential pitfalls. In addition to chapters on diagnostic criteria, current concepts of pathogenesis of bladder cancer, specimen adequacy and preparation, and ancillary tests are covered in separate chapters. A bonus to the volume is a comprehensive history of urine as the earliest diagnostic sample of human disease, richly illustrated with artworks from major museums. Written by internationally recognized authorities, this comprehensive and evidence-based guide to urine cytology is supported by the newest data confirming the original concept and significance of diagnostic criteria defining High Grade Urothelial Carcinoma. TPS is an essential tool for anyone who is practicing urinary cytology, including cytotechnologists, pathologists-in-training and practicing pathologists. This book should find a place in every cytology laboratory throughout the world. The Concept has been endorsed by the American Society of Cytopathology, and the International Academy of Cytology.

Discourses in Place Ron Scollon, Suzie Wong Scollon, 2003-12-08 This highly illustrated text develops the first systematic analysis of the ways we interpret language as it is materially placed in the world. This is essential reading for anyone with an interest in language and the way we communicate.

Case Studies in Crisis Communication Amiso M. George, Cornelius B. Pratt, 1997-08-13 Case Studies in Crisis Communication: International Perspectives on Hits and Misses was created to fill the gap for a much-needed textbook in case studies in crisis communication from international perspectives. The events of September 11, 2001, other major world crises, and the ongoing macroeconomic challenges of financial institutions, justify the need for this book. While existing textbooks on the subject focus on U.S. corporate cases, they may not appeal equally to students and practitioners in other countries, hence the need to analyze cases from the United States and from other world regions. The variety and the international focus of the cases, be they environmental, health or management successes or failures, makes this book more appealing to a wider audience. These cases examine socio-cultural issues associated with responding to a variety of crises.

Fifty Major Cities of the Bible John Laughlin, 2007-05-07 From the ruins of the ancient seaside city of Acco, to the small but archaeologically important town of Yokneam, Fifty Major Cities of the Bible provides readers with a comprehensive guide to the ancient cities that played a vital role in the world from which the Bible originated. Not only covering renowned cities such as Jerusalem and Jericho, the book also includes lesser known towns like Aroer, Beth-Zur and Gibeah, which have all provided their own valuable contributions to the way in which we now understand the biblical world. A fascinating, easy-to-follow text, key features include: * the biblical context of each city or town * a summary of its known archeological history * non-biblical references to the site * photographs and illustrations * a concise bibliography for further reading Also provided is a handy reference map to the major archaeological sites in Israel, as well as chronological tables for easy reference. Concise,

informative and high accessible, *Fifty Major Cities of the Bible* is a superb overview of the cities and towns that made up the Biblical world, and an essential resource for students and enthusiasts.

Organization Theory and the Public Sector Tom Christensen, Per Læg Reid, Kjell Arne Røvik, 2007-10-30 Public sector organizations are fundamentally different to their private sector counterparts. They are multi-functional, follow a political leadership, and the majority do not operate in an external market. In an era of rapid reform, reorganization and modernization of the public sector, this book offers a timely and illuminating introduction to the public sector organization that recognizes its unique values, interests, knowledge and power-base. Drawing on both instrumental and institutional perspectives within organization theory, as well as democratic theory and empirical studies of decision-making, this text addresses five central aspects of the public sector organization: goals and values leadership and steering reform and change effects and implications understanding and design. This volume challenges conventional economic analysis of the public sector, arguing instead for a democratic-political approach and a new, prescriptive organization theory. A rich resource of both theory and practice, *Organization Theory for the Public Sector: Instrument, Culture and Myth* is essential reading for anybody studying the public sector.

An Introduction to Cybercultures David Bell, 2006-09-07 *An Introduction to Cybercultures* provides an accessible guide to the major forms, practices and meanings of this rapidly-growing field. From the evolution of hardware and software to the emergence of cyberpunk film and fiction, David Bell introduces readers to the key aspects of cyberculture, including email, the internet, digital imaging technologies, computer games and digital special effects. Each chapter contains 'hot links' to key articles in its companion volume, *The Cybercultures Reader*, suggestions for further reading, and details of relevant websites. Individual chapters examine: · Cybercultures: an introduction · Storying cyberspace · Cultural Studies in cyberspace · Community and cyberculture · Identities in cyberculture · Bodies in cyberculture · Cybersubcultures · Researching cybercultures

Contagion Alison Bashford, Claire Hooker, 2002-11 *Contagion* explores cultural responses of infectious diseases and their biomedical management over the nineteenth and twentieth centuries. It also investigates the use of 'contagion' as a concept in postmodern research.

Personal Mobilities Aharon Kellerman, 2006-11-22 *Personal Mobilities* provides a systematic study of personal movement focusing on the dimensions of space, individuals, societies and technologies. Kellerman examines a variety of personal mobilities, including air transportation, through several perspectives, examining the human need for movement, their anchoring within wider societal trends, commonalities and differences among mobility technologies and international differences. Although spatial mobility seems geographical by its very nature, the topic has been so far treated only partially, and mainly by sociologists. *Personal Mobilities* highlights geographical as well as sociological aspects and is the first book to focus solely on personal mobilities.

World Yearbook of Education 2004 Andrew Brown, Niki Davis, 2013-04-15 A real revolution is taking place in the way in which we conceptualise and practise education and learning. This book sets out to explore the immense impact which digital technology is having on education around the world and the ways in which it is used by a wide range of individuals and communities. Contributors analyse changes in technology such as e-mail, the Internet, digital video and other media, but also the effect of this new technology on the way people live and learn around the world. Cultural changes taking place range from the blurring of boundaries between formal and informal learning to the development of new 'virtual communities' which revolve around particular social or cultural interests, and which serve as a crucial tool and source of identity for spatially displaced communities such as refugees. Digital technology is changing the way we all live, and this book is an authoritative study of these changes in all their diversity.

Polari - The Lost Language of Gay Men Paul Baker, 2003-09-02 *Polari* is a secret form of language mainly used by homosexual men in London and other cities during the twentieth century. Derived in part from the slang lexicons of numerous stigmatised and itinerant groups, *Polari* was also a means of socialising, acting out camp performances and reconstructing a shared gay identity and worldview among its speakers. This book examines the ways in which *Polari* was used in order

to construct 'gay identities', linking its evolution to the changing status of gay men and lesbians in the UK over the past fifty years.

Tradition, Democracy and the Townscape of Kyoto Christoph Brumann, 2012-08-06 As the historic capital of the country and the stronghold of the nation's most celebrated traditions, the city of Kyoto holds a unique place in the Japanese imagination. Widely praised for the beauty of its townscape and natural environments, it is both a popular destination for tourists and home to one and a half million inhabitants. There has been a sustained, lively debate about how best to develop the city, with a large number of local government officials, citizen activists, urban planners, real-estate developers, architects, builders, proprietors, academic researchers, and ordinary Kyotoites involved in discussions, forming a highly peculiar social arena that has no match elsewhere in Japan. This book, based on extensive fieldwork and interviews, provides an ethnographic study of this particular social field. It analyses how people in Kyoto deal with their most cherished traditions, such as the traditional town houses and the famous Gion matsuri festival, which calls into question several of the standard social scientific assumptions about the functions of cultural heritage for present-day societies. The book looks at the way concerned citizens, government bureaucrats, and other important players interact with each other over contentious modern buildings, often with the best intentions but constrained by set role expectations and by the superior power of national-level regulations and agencies. This book contributes to debates on the social uses of tradition and heritage, and the question of how to create sustainable, liveable urban environments.

Everyday Life and Cultural Theory Ben Highmore, 2002-08-27 Ben Highmore traces the development of conceptions of everyday life, from the cultural sociology of Georg Simmel, through the Mass-Observation project of the 1930s to contemporary theorists.

Tourism, Religion and Spiritual Journeys Dallen Timothy, Daniel Olsen, 2006-09-27 Religion and spirituality are still among the most common motivations for travel - many major tourism destinations have developed largely as a result of their connections to sacred people, places and events. Providing a comprehensive assessment of the primary issues and concepts related to this intersection of tourism and religion, this revealing book gives a balanced discussion of both the theoretical and applied subjects that destination planners, religious organizations, scholars, and tourism service providers must deal with on a daily basis. Bringing together a distinguished list of contributors, this volume takes a global approach and incorporates substantial empirical cases from Hinduism, Islam, Judaism, Roman Catholicism, Mormonism, New Ageism, Sikhism, Buddhism, and the spiritual philosophies of East Asia. On a conceptual level, it considers, amongst other topics: contested heritage the pilgrim-tourist dichotomy secularization of pilgrimage experiences religious humanism educational aspects of religious tourism commodification of religious icons and services. A vibrant collection of essays, this outstanding book discusses many important practices, paradigms, and problems that are currently being examined and debated. It raises an array of significant and interesting questions and as such is a valuable resource for students, scholars and researchers of tourism, religion and cultural studies.

A Companion to Medical Anthropology Merrill Singer, Pamela I. Erickson, 2011-05-02 A Companion to Medical Anthropology examines the current issues, controversies, and state of the field in medical anthropology today. Provides an expert view of the major topics and themes to concern the discipline since its founding in the 1960s Written by leading international scholars in medical anthropology Covers environmental health, global health, biotechnology, syndemics, nutrition, substance abuse, infectious disease, and sexuality and reproductive health, and other topics

Consuming Books Stephen Brown, 2006-04-18 The buying, selling, and writing of books is a colossal industry in which marketing looms large, yet there are very few books which deal with book marketing (how-to texts excepted) and fewer still on book consumption. This innovative text not only rectifies this, but also argues that far from being detached, the book business in fact epitomises

today's Entertainment Economy (fast moving, hit driven, intense competition, rapid technological change, etc.). Written by an impressive roster of renowned marketing authorities, many with experience of the book trade and all gifted writers in their own right, *Consuming Books* steps back from the practicalities of book marketing and takes a look at the industry from a broader consumer research perspective. Consisting of sixteen chapters, divided into four loose sections, this key text covers: * a historical overview * the often acrimonious marketing/literature interface * the consumers of books (from book groups to bookcrossing) * a consideration of the tensions that both literary types and marketers feel. With something for everyone, *Consuming Books* not only complements the 'how-to' genre but provides the depth that previous studies of book consumption conspicuously lack.

International Marketing John Shaw, Sak Onkvisit, 2008-01-28 Marketing is a universal activity that is widely applicable, regardless of the political, social or economic systems of a particular country. However, this doesn't mean that consumers in different parts of the world should be satisfied in the same way. The 4th edition of *International Marketing* has been written to enable managers and scholars to meet the international challenges they face everyday. It provides the solid foundation required to understand the complexities of marketing on a global scale. The book has been fully updated with topical case studies, examples of contemporary marketing campaigns, the most relevant discussion topics as well as the most up-to-date theories, references and research findings. It is this combination of theory and practice that makes this textbook truly unique, presenting a fully rounded view of the topic rather than an anecdotal or descriptive one alone. The book includes chapters on: * Trade distortions and marketing barriers * Political and legal environments * Culture * Consumer behaviour * Marketing research * Promotion and pricing strategies * Currencies and foreign exchange Accessibly written and designed, this book is the most international book on marketing available that can be used by undergraduates and postgraduates the world over. A companion website provides additional material for lecturers and students alike.

Animal Migration E. J. Milner-Gulland, John M. Fryxell, Anthony R. E. Sinclair, 2011-01-20 Despite the wealth of natural historical research conducted on migration over decades, there is still a dearth of hypothesis-driven studies that fully integrate theory and empirical analyses to understand the causes and consequences of migration, and a taxonomic bias towards birds in much migration research. This book takes a comparative, integrated view of animal migration, linking evolution with ecology and management, theory with empirical research, and embracing all the major migratory taxa (including human pastoralists). The scope extends beyond the target organism to consider the ecosystem-level dynamics of migration. The emphasis is on exciting new research avenues that are now opening up, whether due to advances in our understanding of migration as a biological phenomenon or through the availability of a range of new technologies. Broad themes that emerge include integrating migration into the broad spectrum of movement behaviour, the need for a comparative and cross-taxonomic approach that considers migration at a range of temporal and spatial scales, and examination of the key roles of resource uncertainty and spatial heterogeneity in driving migratory behaviour. The book identifies the potential for new tools to revolutionise the study of migration, including satellite-tracking technology, genomics, and modelling - all of which are linked to increasing computing power. We are now on the verge of a breakthrough in migration research, which is crucial given the multiple threats that face the conservation of migration as a phenomenon, including climate change.

Expressions of Cambodia Leakthina Chau-Pech Ollier, Tim Winter, 2006-10-19 Taking a theoretical and multidisciplinary perspective, the essays in this collection provide compelling insight into contemporary Cambodian culture at home and abroad. The book represents the first sustained exploration of the relationship between cultural productions and practices, the changing urban landscape and the construction of identity and nation building twenty-five years after the fall of the Khmer Rouge regime. As such, the team of international contributors address the politics of development and conservation, tradition and modernity within the global economy, and transmigratory movements of the twenty-first century. *Expressions of Cambodia* presents a new

dimension to the Cambodian studies by engaging the country in current debates about globalization and the commodification of culture, post-colonial politics and identity constructions. Timely and much-needed, this volume brings Cambodia back into dialogue with its neighbours, and in so doing, valuably contributes to the growing field of Southeast Asian cultural studies.
