Icon of the Kingdom of God Radu Bordeianu,2023 What is the Church? Some would answer this question by studying the Scriptures, the history of the Church, and contemporary theologians, thus addressing the theological nature of the Church. Others would answer

based on statistics, interviews, and personal observation, thus focusing on the experience of the Church. These theological and experiential perspectives are in tension, or at times even opposed. Whereas the first might speak about the local church as the diocese gathered in the Liturgy presided over by its bishop, the latter would describe the local church as the parish community celebrating the Liturgy together with the parish priest, never experiencing a sole liturgy that gathers an entire diocese around its bishop. Whereas a theologian might abstractly describe the Church as a reflection of the Trinity, a regular church-member might concretely experience the Church as a community that manifests the Kingdom of God in its outreach ministries. Radu Bordeianu attempts to bring these two perspectives together, starting from the concrete experience of the Church, engaging this experience with the theological tradition of the Church, extracting ecclesiological principles from this combined approach, and then highlighting concrete situations that reflect those standards or proposing correctives, when necessary. Without pretending to be a complete Orthodox ecclesiology, Icon of the Kingdom of God addresses the most important topics related to the Church. It progresses according to one's experience of the Church from baptism, to the family, parish, Liturgy, and priesthood, followed by analyses of synodality and nationality. Arguing that the Church is an icon of the Kingdom of God, this volume brings together the past theological heritage and the present experience of the Church while having three methodological characteristics: experiential, Kingdom-centered, and ecumenical.

Mapping It Out Mark Monmonier,2015-07-27 Writers know only too well how long it can take—and how awkward it can be—to describe spatial relationships with words alone. And while a map might not always be worth a thousand words, a good one can help writers communicate an argument or explanation clearly, succinctly, and effectively. In his acclaimed How to Lie with Maps, Mark Monmonier showed how maps can distort facts. In Mapping it Out: Expository Cartography for the Humanities and Social Sciences, he shows authors and scholars how they can use expository cartography—the visual, two-dimensional organization of information—to heighten the impact of their books and articles. This concise, practical book is an introduction to the fundamental principles of graphic logic and design, from the basics of scale to the complex mapping of movement or change. Monmonier helps writers and researchers decide when maps are most useful and what formats work best in a wide range of subject areas, from literary criticism to sociology. He demonstrates, for example, various techniques for representing changes and patterns; different typefaces and how they can either clarify or confuse information; and the effectiveness of less traditional map forms, such as visibility base maps, frame-rectangle symbols, and complementary scatterplot designs for conveying complex spatial relationships. There is also a wealth of practical information on map compilation, cartobibliographies, copyright and permissions, facsimile reproduction, and the evaluation of source materials. Appendixes discuss the benefits and limitations of electronic graphics and pen-and-ink drafting, and how to work with a cartographic illustrator. Clearly written, and filled with real-world examples, Mapping it Out demystifies mapmaking for anyone writing in the humanities and social sciences. A useful guide to a subject most people probably take too much for granted. It shows how map makers translate abstract data into eye-catching cartograms, as they are called. It combats cartographic illiteracy. It fights cartophobia. It may even teach you to find your way.—Christopher Lehmann-Haupt, The New York Times

ICONS PB Herbert M. Cole,National Museum of African Art (U.S.),1989 The couple. The woman and child. The armed male. The rider. The stranger. For more than six thousand years, these five themes have appeared in countless works of art across the vast continent of Africa. The cultural ideals and values they embody are central to the lives of African peoples. Herbert M. Cole calls these timeless fundamental images icons. In this fascinating book, Cole explores the many different ways the icons have been depicted, used, and

interpreted. Icons: Ideals and Power in the Art of Africa is lavishly illustrated iwth more than two hundred photographs. Cole discusses such diverse works as ancient rock paintings and engravings, archaeological bronzes and terra-cottas, wooden shrine sculptors, miniature metal castings, public monuments in clay or cement, shop signs, gold and ivory political emblems, and modern glass paintings. Icons is both a noteworthy contribution to scholarship and a compelling introduction to the vitality, richness, and history of African art. -- From publisher's description.

Indigenous Symbols and Practices in the Catholic Church Kathleen J. Martin,2010 Indigenous Symbols and Practices in the Catholic Church presents views, concepts and perspectives on the relationship among Indigenous Peoples and the Catholic Church, as well as stories, images and art as metaphors for survival in a contemporary world. Few studies present such a multidisciplinary interpretation of appropriation, spiritual and religious tradition, educational issues in the teaching of art and art history, the effects of government sanctions on traditional practice, or the artistic interpretation of symbols from Indigenous perspectives. Through photographs and visual studies, interviews and data analysis, personal narratives and stories, this book explores the experiences of Indigenous Peoples whose lives have been impacted by multiple forces-Christian missionaries, governmental policies, immigration and colonization, education, assimilation and acculturation. Contributors explore current contexts and complex areas of conflict regarding missionization, appropriation and colonizing practices through the voices of Indigenous and non-Indigenous scholars, and provide interpretations and possibilities for the future.
