**The Health of Lesbian, Gay, Bisexual, and Transgender People** Institute of Medicine, Board on the Health of Select Populations, Committee on Lesbian, Gay, Bisexual, and Transgender Health Issues and Research Gaps and Opportunities, 2011-06-24 At a time when lesbian, gay, bisexual, and transgender individuals--often referred to under the umbrella acronym LGBT--are becoming more visible in society and more socially acknowledged, clinicians and researchers are faced with incomplete information about their health status. While LGBT populations often are combined as a single entity for research and advocacy purposes, each is a distinct population group with its own specific health needs. Furthermore, the experiences of LGBT individuals are not uniform and are shaped by factors of race, ethnicity, socioeconomic status, geographical location, and age, any of which can have an effect on health-related concerns and needs. The Health of Lesbian, Gay, Bisexual, and Transgender People assesses the state of science on the health status of LGBT populations, identifies research gaps and opportunities, and outlines a research agenda for the National Institute of Health. The report examines the health status of these populations in three life stages: childhood and adolescence, early/middle adulthood, and later adulthood. At each life stage, the committee studied mental health, physical health, risks and protective factors, health services, and contextual influences. To advance understanding of the health needs of all LGBT individuals, the report finds that researchers need more data about the demographics of these populations, improved methods for collecting and analyzing data, and an increased participation of sexual and gender minorities in research. The Health of Lesbian, Gay, Bisexual, and Transgender People is a valuable resource for policymakers, federal agencies including the National Institute of Health (NIH), LGBT advocacy groups, clinicians, and service providers.

**Case Studies in Crisis Communication** Amiso M. George, Cornelius B. Pratt, 1997-08-13 Case Studies in Crisis Communication: International Perspectives on Hits and Misses was created to fill the gap for a much-needed textbook in case studies in crisis communication from international perspectives. The events of September 11, 2001, other major world crises, and the ongoing macroeconomic challenges of financial institutions, justify the need for this book. While existing textbooks on the subject focus on U.S. corporate cases, they may not appeal equally to students and practitioners in other countries, hence the need to analyze cases from the United States and from other world regions. The variety and the international focus of the cases, be they environmental, health or management successes or failures, makes this book more appealing to a wider audience. These cases examine socio-cultural issues associated with responding to a variety of crises.

*Mapping Media in China* Wanning Sun, Jenny Chio, 2012-07-26 *Mapping Media in China* is the first book-length study that goes below the 'national' scale to focus on the rich diversity of media in China from local, provincial and regional angles. China's media has played a crucial role in shaping and directing the country's social and cultural changes, and whilst these shifts have often been discussed as a single and coherent phenomenon, this ignores the vast array of local and regional variations within the country's borders. This book explores media as both a reflection of the diversity within China and as an active agent behind these growing differences. It examines the role of media in shaping regional, provincial and local identities through the prism of media economics and technology, media practices, audiences, as well as media discourses. The book covers a wide range of themes, including civil society, political resistance, state power and the production and consumption of place-specific memory and imagination. With contributions from around the world, including original ethnographic material from scholars based in China, *Mapping Media in China* is an original book which spans a broad range of disciplines. It will be invaluable to both students and scholars of Chinese and Asian studies, media and communication studies, geography, anthropology and cultural studies.

*Work Culture Transformation* Evie Lotze, 2004-01-01 Change is an every day part of working life and yet, it is something which causes libraries and information departments as well as their larger organizations or communities which they serve, huge problems. If change itself is difficult, the coming transformation in the culture of knowledge work poses even greater problems. Everything in a work culture transformation, from changing the attitude of staff to the fundamental way in which we use information and knowledge, provides a challenge for the information professional. In the 21st century it is essential that information professionals adapt.

**Soviet Music and Society Under Lenin and Stalin** Neil Edmunds, 2004-06 This book investigates the place of music in Soviet society during the eras of Lenin and Stalin. It examines the different strategies adopted by composers and musicians in their attempts to carve out careers in a rapidly evolving society, discusses the role of music in Soviet society and people's lives, and shows how political ideology proved an inspiration as well as an inhibition. It explores how music and

politics interacted in the lives of two of the twentieth century's greatest composers - Shostakovich and Prokofiev - and also in the lives of less well-known composers. In addition it considers the specialist composers of early Soviet musical propaganda, amateur music making, and musical life in the non-Russian republics. The book will appeal to specialists in Soviet music history, those with an interest in twentieth century music in general, and also to students of the history, culture and politics of the Soviet Union.

**Gender and Radical Politics in India** Mallarika Sinha Roy, 2010-10-04 The Naxalbari movement marks a significant moment in the postcolonial history of India. Beginning as an armed

peasant uprising in 1967 under the leadership of radical communists, the movement was inspired by the Marxist-Leninist theory of revolution and involved a significant section of the contemporary youth from diverse social strata with a vision of people's revolution. It inspired similar radical movements in other South Asian countries such as Nepal. Arguing that the history and memory of the Naxalbari movement is fraught with varied gendered experiences of political motivation, revolutionary activism, and violence, this book analyses the participation of women in the movement and their experiences. Based on extensive ethnographic and archival research, the author argues that women's emancipation was an integral part of their vision of revolution, and many of them identified the days of their activism as magic moments, as a period of enchanted sense of emancipation. The book places the movement into the postcolonial history of South Asia. It makes a significant contribution to the understanding of radical communist politics in South Asia, particularly in relation to issues concerning the role of women in radical politics.

*The Paris System for Reporting Urinary Cytology* Eva M. Wojcik, Daniel F.I. Kurtycz, Dorothy L. Rosenthal, 2022-02-03 The first edition of *The Paris System for Reporting Urinary Cytology* introduced a completely new paradigm for detecting bladder cancer by urine cytology. This system concentrated on defining morphological characteristics of the most clinically significant form of bladder cancer, High Grade Urothelial Carcinoma. This new approach has been widely accepted throughout the world, and has become part of the daily practice of cytology. Considering that the first edition of *The Paris System (TPS)* introduced a new model of urinary cytodiagnosis, verification and expansion of initial material and data were anticipated. Based on evolving knowledge and readership requests, the group of highly experienced authors have created a new edition of *TPS*. This second edition includes areas and issues not originally covered. A new chapter on urine

cytology of the upper tract, a rarely addressed topic, has been introduced. Furthermore, the issue of cellular degeneration is discussed in the criteria of all diagnostic categories. Examples of standardized reports are included in each chapter. Most importantly, a separate chapter presents data defining the risk of malignancy (ROM) for each diagnostic category to inform clinical management. New high quality images augment those of the first edition to better illustrate diagnostic clues and potential pitfalls. In addition to chapters on diagnostic criteria, current concepts of pathogenesis of bladder cancer, specimen adequacy and preparation, and ancillary tests are covered in separate chapters. A bonus to the volume is a comprehensive history of urine as the earliest diagnostic sample of human disease, richly illustrated with artworks from major museums. Written by internationally recognized authorities, this comprehensive and evidence-based guide to urine cytology is supported by the newest data confirming the original concept and significance of diagnostic criteria defining High Grade Urothelial Carcinoma. TPS is an essential tool for anyone who is practicing urinary cytology, including cytotechnologists, pathologists-in-training and practicing pathologists. This book should find a place in every cytology laboratory throughout the world. The Concept has been endorsed by the American Society of Cytopathology, and the International Academy of Cytology.

Tourism, Religion and Spiritual Journeys Dallen Timothy, Daniel Olsen, 2006-09-27 Religion and spirituality are still among the most common motivations for travel - many major tourism destinations have developed largely as a result of their connections to sacred people, places and events. Providing a comprehensive assessment of the primary issues and concepts related to this intersection of tourism and religion, this revealing book gives a balanced discussion of both the theoretical and applied subjects that destination planners, religious organizations, scholars, and tourism service providers must deal with on a daily basis. Bringing together a distinguished list of contributors, this volume takes a global approach and incorporates substantial empirical cases from Hinduism, Islam, Judaism, Roman Catholicism, Mormonism, New Ageism, Sikhism, Buddhism, and the spiritual philosophies of East Asia. On a conceptual level, it considers, amongst other topics: contested heritage the pilgrim-tourist dichotomy secularization of pilgrimage experiences religious humanism educational aspects of religious tourism commodification of religious icons and services. A vibrant collection of essays, this outstanding book discusses many important practices, paradigms,

and problems that are currently being examined and debated. It raises an array of significant and interesting questions and as such is a valuable resource for students, scholars and researchers of tourism, religion and cultural studies.

**An Introduction to the Geography of Health** Helen Hazen, Peter Anthamatten, 2012-05-23

Health issues such as the emergence of infectious diseases, the potential influence of global warming on human health, and the escalating strain of increasing longevity and chronic conditions on healthcare systems are of growing importance in an increasingly peopled and interconnected world. A geographic approach to the study of health offers a critical perspective to these issues, considering how changing relationships between people and their environments influence human health. *An Introduction to the Geography of Health* provides an accessible introduction to this rapidly growing field, covering theoretical and methodological background. The text is divided into three sections which consider distinct approaches and techniques related to health geographies. Section one introduces ecological approaches, with a focus on how natural and built environments affect human health. For instance, how have irrigation projects influenced the spread of water-borne diseases? How can modern healthcare settings, such as hospitals, affect the spread and evolution of pathogens? Section two discusses social aspects of health and healthcare, considering health as not merely a biological interaction between a pathogen and human host, but as a process that is situated among social factors which ultimately drive who suffers from what, and where disease occurs. Section three then considers spatial techniques and approaches to exploring health, giving special focus to the growing role of cartography and geographic information systems (GIS) in the study of health. This clearly written text contains a range of pedagogical features including a wealth of global case studies, discussion questions and suggestions for further reading at the end of each chapter, a

colour plate section and over eighty diagrams and figures. The accompanying website also provides presentations, exercises, further resources, and tables and figures. This book is an essential introductory text for undergraduate students studying Geography, Health and Social Studies.
