Discourses in Place Ron Scollon, Suzie Wong Scollon, 2003-12-08 This highly illustrated text develops the first systematic analysis of the ways we interpret language as it is materially placed in the world. This is essential reading for anyone with an interest in language and the way we communicate.

Entering the Picture Jill Fields, 2012-02-27 In 1970, Judy Chicago and fifteen students founded the groundbreaking Feminist Art Program (FAP) at Fresno State. Drawing upon the consciousness-raising techniques of the women's liberation movement, they created shocking new art forms depicting female experiences. Collaborative work and performance art - including the famous Cunt Cheerleaders - were program hallmarks. Moving to Los Angeles, the FAP produced the first major feminist art installation, Womanhouse (1972). Augmented by thirty-seven illustrations and color plates, this interdisciplinary collection of essays by artists and scholars, many of whom were eye witnesses to landmark events, relates how feminists produced vibrant bodies of art in Fresno and other locales where similar collaborations flourished. Articles on topics such as African American artists in New York and Los Angeles, San Francisco's Las Mujeres Muralistas and Asian American Women Artists Association, and exhibitions in Taiwan and Italy showcase the artistic trajectories that destabilized traditional theories and practices and reshaped the art world. An engaging editor's introduction explains how feminist art emerged within the powerful women's movement that transformed America. *Entering the Picture* is an exciting collection about the provocative contributions of feminists to American art.

Mobile Technologies of the City Mimi Sheller, John Urry, 2006-04-18 Mobile communications technologies are taking off across the world, while urban transportation and surveillance systems are also being rebuilt and updated. Emergent practices of physical, informational and communicational mobility are reconfiguring patterns of movement, co-presence, social exclusion and security across many urban contexts. This book brings together a carefully selected group of innovative case studies of these mobile technologies of the city, tracing the emergence of both new socio-technical practices of the city and of a new theoretical paradigm for mobilities research.

Big Business and Economic Development Barbara Hogenboom, Alex E. Fernández Jilberto, 2006-12-21 Bringing together an international and multidisciplinary group of experts, this is the first comprehensive volume to analyze conglomerates and economic groups in developing countries and transition economies. Using sixteen in-depth case studies it provides a comparative framework for the study of contemporary process of privatization, economic and financial liberalization and neoliberal globalization. Exploring the various causes and economic, social and political effects of the rise of 'big business' in Asia, Latin America, Africa and Eastern Europe, the

main issues that are examined include: the nature of contemporary economic concentration the relations between 'local' and 'external' investors the impact on development, and on economic and political control over its direction the new role of the state towards conglomerates and economics groups the effects of economic and political changes on the legitimacy of the state and large companies. This volume is perfect as either a textbook or supplementary reading for students at all levels, as well as researchers and governmental and non-governmental professionals working and studying in the fields of international business and economic development.

An Introduction to Cybercultures David Bell, 2006-09-07 An Introduction to Cybercultures provides an accessible guide to the major forms, practices and meanings of this rapidly-growing field. From the evolution of hardware and software to the emergence of cyberpunk film and fiction, David Bell introduces readers to the key aspects of cyberculture, including email, the internet, digital imaging technologies, computer games and digital special effects. Each chapter contains 'hot links' to key articles in its companion volume, The Cybercultures Reader, suggestions for further reading, and details of relevant websites. Individual chapters examine: · Cybercultures: an introduction · Storying cyberspace · Cultural Studies in cyberspace · Community and cyberculture · Identities in cyberculture · Bodies in cyberculture · Cybersubcultures · Researching cybercultures

China's Outbound Tourism Wolfgang Arlt, 2006-09-27 The People's Republic of China has changed from a country which actively discouraged tourism into one of the major source markets for the international industry; the 35 million Chinese travelling across the border in 2005 are merely the tip of the iceberg. China's Outbound Tourism is the first book on this major development and has been written using a multitude of sources from China and around the world. The topic is approached from many angles, using methods from the fields of economics, political sciences, sociology and cross-cultural studies. The book explains the economic and social background of the surge in tourism and the changes in policy in the country since 1949, when it moved from prevention through controlled development to encouragement of outbound travels. Throughout the book, facts and figures are given for the global development as well as in-depth information about China's key destinations. The growing importance of tourists from China is however not just a question of quantity; the text explains the features which distinguish their travel motivations and behaviours from 'western' and Japanese tourists, and the consequences for product adaptation and marketing methods for destinations interested in attracting and satisfying Chinese tourists. Arlt's groundbreaking book cannot be ignored by professionals, academics and students of tourism and leisure; it offers fresh insight into the topic and indicates some of the future lines of development in this area.

The Articulate Mammal Jean Aitchison, 2007-09-12 An established bestseller, The Articulate Mammal is a concise and highly readable introduction to the main topics in psycholinguistics. This fifth edition brings the book up-to-date with recent theories, including new material on: the possibility of a 'language gene' post-Chomskyan ideas language within an evolutionary framework spatial cognition and how this affects language how children become acclimatized to speech rhythms before birth the acquisition of verbs construction and cognitive grammar aphasia and dementia. Requiring no prior knowledge of the subject, chapter by chapter, The Articulate Mammal tackles the basic questions central to the study of psycholinguistics. Jean Aitchison investigates these issues with regard to animal communication, child language and the language of adults, and includes in the text full references and helpful suggestions for further reading.

The Mind's Eye Ralph Radach, Jukka Hyona, Heiner Deubel, 2003-06-05 The book provides a comprehensive state-of-the-art overview of current research on cognitive and applied aspects of eye movements. The contents include peer-reviewed chapters based on a selection of papers presented at the 11th European Conference on Eye Movements (Turku, Finland 2001), supplemented by invited contributions. The ECEM conference series brings together researchers from various disciplines with an interest to use eye-tracking to study perceptual and higher order cognitive functions. The contents of the book faithfully reflect the scope and diversity of interest in eye-tracking as a fruitful tool both in basic and applied research. It consists of five sections: visual

information processing and saccadic eye movements; empirical studies of reading and language production; computational models of eye movements in reading; eye-tracking as a tool to study human-computer interaction; and eye movement applications in media and communication research. Each section is concluded by a commentary chapter by one of the leading authorities in the field. These commentaries discuss and integrate the contributions in the section and provide an expert view on the most significant present and future developments in the respective areas. The book is a reference volume including a large body of new empirical work but also principal theoretical viewpoints of leading research groups in the field.

Organization Theory and the Public Sector Tom Christensen, Per Lægveid, Kjell Arne Røvik, 2007-10-30 Public sector organizations are fundamentally different to their private sector counterparts. They are multi-functional, follow a political leadership, and the majority do not operate in an external market. In an era of rapid reform, reorganization and modernization of the public sector, this book offers a timely and illuminating introduction to the public sector organization that recognizes its unique values, interests, knowledge and power-base. Drawing on both instrumental and institutional perspectives within organization theory, as well as democratic theory and empirical studies of decision-making, this text addresses five central aspects of the public sector organization: goals and values leadership and steering reform and change effects and implications understanding and design. This volume challenges conventional economic analysis of the public sector, arguing instead for a democratic-political approach and a new, prescriptive organization theory. A rich resource of both theory and practice, *Organization Theory for the Public Sector: Instrument, Culture and Myth* is essential reading for anybody studying the public sector.

Hairspray Dana Heller, 2011-04-18 By reconsidering assumptions about mainstream popular culture and its revolutionary possibilities, author Dana Heller reveals that John Waters' popular 1988 film *Hairspray* is the director's most subversive movie. Represents the first scholarly work on any of film director John Waters' films Incorporates original interview material with the director Reveals meanings embedded in the film's narrative treatment of racial and sexual politics

Soviet Music and Society Under Lenin and Stalin Neil Edmunds, 2004-06 This book investigates the place of music in Soviet society during the eras of Lenin and Stalin. It examines the different strategies adopted by composers and musicians in their attempts to carve out careers in a rapidly evolving society, discusses the role of music in Soviet society and people's lives, and shows how political ideology proved an inspiration as well as an inhibition. It explores how music and politics interacted in the lives of two of the twentieth century's greatest composers - Shostakovich and Prokofiev - and also in the lives of less well-known composers. In addition it considers the specialist composers of early Soviet musical propaganda, amateur music making, and musical life in the non-Russian republics. The book will appeal to specialists in Soviet music history, those with an interest in twentieth century music in general, and also to students of the history, culture and politics of the Soviet Union.

Studying Christian Spirituality David B. Perrin, 2007-08-07 This book provides a new introduction to the study of Christian spirituality, exploring it through the human sciences and ranging from philosophy and hermeneutics to psychology, history, sociology and anthropology. Systematic and progressive, it introduces the key approaches and shows how they relate to the understanding, study and practice of spirituality. Covering a vast amount of ground - from traditional themes such as images of God, spiritual direction and pilgrimage to more contemporary issues, such as place and space, cyberspace and postcolonialism - the author takes an ecumenical, inclusive stance, allowing the book to be used in a wide variety of courses and across denominations.

An Introduction to the Geography of Health Helen Hazen, Peter Anthamatten, 2012-05-23 Health issues such as the emergence of infectious diseases, the potential influence of global warming on human health, and the escalating strain of increasing longevity and chronic conditions on healthcare systems are of growing importance in an increasingly peopled and interconnected world. A geographic approach to the study of health offers a critical perspective to these issues, considering how changing relationships between people and their environments influence human

health. An Introduction to the Geography of Health provides an accessible introduction to this rapidly growing field, covering theoretical and methodological background. The text is divided into three sections which consider distinct approaches and techniques related to health geographies. Section one introduces ecological approaches, with a focus on how natural and built environments affect human health. For instance, how have irrigation projects influenced the spread of water-borne diseases? How can modern healthcare settings, such as hospitals, affect the spread and evolution of pathogens? Section two discusses social aspects of health and healthcare, considering health as not merely a biological interaction between a pathogen and human host, but as a process that is situated among social factors which ultimately drive who suffers from what, and where disease occurs. Section three then considers spatial techniques and approaches to exploring health, giving special focus to the growing role of cartography and geographic information systems (GIS) in the study of health. This clearly written text contains a range of pedagogical features including a wealth of global case studies, discussion questions and suggestions for further reading at the end of each chapter, a colour plate section and over eighty diagrams and figures. The accompanying website also provides presentations, exercises, further resources, and tables and figures. This book is an essential introductory text for undergraduate students studying Geography, Health and Social Studies.

Case Studies in Crisis Communication Amiso M. George, Cornelius B. Pratt, 1997-08-13 Case Studies in Crisis Communication: International Perspectives on Hits and Misses was created to fill the gap for a much-needed textbook in case studies in crisis communication from international perspectives. The events of September 11, 2001, other major world crises, and the ongoing macroeconomic challenges of financial institutions, justify the need for this book. While existing textbooks on the subject focus on U.S. corporate cases, they may not appeal equally to students and practitioners in other countries, hence the need to analyze cases from the United States and from other world regions. The variety and the international focus of the cases, be they environmental, health or management successes or failures, makes this book more appealing to a wider audience. These cases examine socio-cultural issues associated with responding to a variety of crises.

World Yearbook of Education 2004 Andrew Brown, Niki Davis, 2013-04-15 A real revolution is taking place in the way in which we conceptualise and practise education and learning. This book sets out to explore the immense impact which digital technology is having on education around the world and the ways in which it is used by a wide range of individuals and communities. Contributors analyse changes in technology such as e-mail, the Internet, digital video and other media, but also the effect of this new technology on the way people live and learn around the world. Cultural changes taking place range from the blurring of boundaries between formal and informal learning to the development of new 'virtual communities' which revolve around particular social or cultural interests, and which serve as a crucial tool and source of identity for spatially displaced communities such as refugees. Digital technology is changing the way we all live, and this book is an authoritative study of these changes in all their diversity.

Interpretation James Nolan, 2005-01-01 This book provides a structured syllabus and an overview of interpretation accompanied by exercises in the main aspects of the art. It is meant as a practical guide for interpreters and as a complement to interpreter training programmes, particularly for students preparing for conference interpreting in international governmental and business settings.

Green Development William M. Adams, William Mark Adams, 2001 This revised and updated new edition retains the clear and powerful argument which characterized the original. It gives a valuable analysis of the theory and practice of sustainable development and suggests that at the start of the new millennium, we should think radically about the challenge of sustainability. Fully revised, this latest edition includes further reading, chapter outlines, chapter summaries and new discussion topics, and explores: the roots of sustainable development thinking and its evolution in the last three decades of the twentieth century the dominant ideas within mainstream sustainable development the nature and diversity of alternative ideas about sustainability the problems of environmental degradation and the environmental impacts of development strategies for building sustainability in development from above and below. Offering a synthesis of theoretical ideas on sustainability based

on the industrialized economies of the North and the practical, applied ideas in the South which tend to ignore 'First World' theory, this important text gives a clear discussion of theory and extensive practical insights drawn from Africa, Latin America and Asia.

Effective Practice for Adolescents with Reading and Literacy Challenges Lou Denti, Gilbert Guerin, 2008-01-04 Lack of reading proficiency is a barrier to understanding the academic content of any discipline. *Effective Practice for Adolescents with Reading and Literacy Challenges* provides secondary teachers with the knowledge and the strategies they need to improve their students' reading skills. Editors Denti and Guerin present a comprehensive collection of articles by a selection of prominent literacy and education researchers that provide practical approaches to improving literacy and offer accounts of successful evidence-based programs and practices that can be tailored to the needs of teachers working with struggling readers. Each chapter includes questions for review, a list of web resources, and suggested small group activities to encourage implementation of chapter ideas and strategies, making *Effective Practice for Adolescents with Reading and Literacy Challenges* a valuable tool for all teachers, regardless of content area.
