**Lost Enlightenment** S. Frederick Starr, 2015-06-02 The forgotten story of Central Asia's enlightenment—its rise, fall, and enduring legacy In this sweeping and richly illustrated history, S. Frederick Starr tells the fascinating but largely unknown story of Central Asia's medieval enlightenment through the eventful lives and astonishing accomplishments of its greatest minds—remarkable figures who built a bridge to the modern world. Because nearly all of these figures wrote in Arabic, they were long assumed to have been Arabs. In fact, they were from Central Asia—drawn from the Persianate and Turkic peoples of a region that today extends from Kazakhstan southward through Afghanistan, and from the easternmost province of Iran through Xinjiang, China. *Lost Enlightenment* recounts how, between the years 800 and 1200, Central Asia led the world in trade and economic development, the size and sophistication of its cities, the refinement of its arts, and, above all, in the advancement of knowledge in many fields. Central Asians achieved signal breakthroughs in astronomy, mathematics, geology, medicine, chemistry, music, social science, philosophy, and theology, among other subjects. They gave algebra its name, calculated the earth's diameter with unprecedented precision, wrote the books that later defined European medicine, and penned some of the world's greatest poetry. One scholar, working in Afghanistan, even predicted the existence of North and South America—five centuries before Columbus. Rarely in history has a more impressive group of polymaths appeared at one place and time. No wonder that their writings influenced European culture from the time of St. Thomas Aquinas down to the scientific revolution, and had a similarly deep impact in India and much of Asia. *Lost Enlightenment* chronicles this forgotten age of achievement, seeks to explain its rise, and explores the competing theories about the cause of its eventual demise. Informed by the latest scholarship yet written in a lively and accessible style, this is a book that will surprise general readers and specialists alike.

*Sparks of Genius* Robert Root-Bernstein, Michèle Root-Bernstein, 2013-08-26 Discover the cognitive tools that lead to creative thinking and problem-solving with this “well-written and easy-to-follow” guide (Library Journal). Explore the “thinking tools” of extraordinary people, from Albert Einstein and Jane Goodall to Mozart and Virginia Woolf, and learn how you can practice the same imaginative skills to become your creative best. With engaging narratives and examples, Robert and Michèle Root-Bernstein investigate cognitive tools such as observing, recognizing patterns, modeling, playing, and more. *Sparks of Genius* is “a clever, detailed and demanding fitness program for the creative mind” and a groundbreaking guidebook for anyone interested in imaginative thinking, lifelong learning, and transdisciplinary education (Kirkus Reviews). “How different the painter at the easel and the physicist in the laboratory! Yet the Root-Bernsteins recognize the deep-down similarity of all creative thinking, whether in art or science. They demonstrate this similarity by comparing the accounts that various pioneers and inventors have left of their own creative processes: for Picasso just as for Einstein, for Klee just as for Feynman, the creative impulse always begins in vision, in emotion, in intuition. . . . With a lavishly illustrated chapter devoted to each tool, readers quickly realize just how far the imagination can stretch.” —Booklist “A powerful book . . . *Sparks of Genius* presents radically different ways of approaching problems.” —American Scientist

**The Art Collector in Early Modern Italy** Monika Schmitter, 2021-09-23 Lorenzo Lotto's *Portrait of Andrea Odoni* is one of the most famous paintings of the Italian Renaissance. Son of an immigrant and a member of the non-noble citizen class, Odoni understood how the power of art could make a name for himself and his family in his adopted homeland. Far from emulating Venetian patricians, however, he set himself apart through the works he collected and the way he displayed them. In this book, Monika Schmitter imaginatively reconstructs Odoni's house - essentially a 'portrait' of Odoni through his surroundings and possessions. Schmitter's detailed analysis of Odoni's life and portrait reveals how sixteenth-century individuals drew on contemporary ideas about spirituality, history, and science to forge their own theories about the power of things and the agency of object. She shows how Lotto's painting served as a meta-commentary on the practice of

collecting and on the ability of material things to transform the self.

**Raising Steam** Terry Pratchett, 2014-03-18 The new Discworld novel, the 40th in the series, sees the Disc's first train come steaming into town. Change is afoot in Ankh-Morpork. Discworld's first steam engine has arrived, and once again Moist von Lipwig finds himself with a new and challenging job.

**The Ten Most Beautiful Experiments** George Johnson, 2009-03-10 A dazzling, irresistible collection of the ten most groundbreaking and beautiful experiments in scientific history. With the attention to detail of a historian and the storytelling ability of a novelist, New York Times science writer George Johnson celebrates these groundbreaking experiments and re-creates a time when the world seemed filled with mysterious forces and scientists were in awe of light, electricity, and the human body. Here, we see Galileo staring down gravity, Newton breaking apart light, and Pavlov studying his now famous dogs. This is science in its most creative, hands-on form, when ingenuity of the mind is the most useful tool in the lab and the rewards of a well-considered experiment are on exquisite display.

**Poetics and Politics** Toni Bernhart, Jaša Drnovsek, Sven Thorsten Kilian, Joachim Küpper, Jan Mosch, 2018-08-21 Far from teleological historiography, the pan-European perspective on Early Modern drama offered in this volume provides answers to why, how, where and when the given phenomena of theatre appear in history. Using theories of circulation and other concepts of exchange, transfer and movement, the authors analyze the development and differentiation of European secular and religious drama, within the disciplinary framework of comparative literature and the history of literature and concepts. Within this frame, aspects of major interest are the relationship between tradition and innovation, the status of genre, the proportion of autonomous and heteronomous creational dispositions within the artefacts or genres they belong to, as well as strategies of functionalization in the context of a given part of the cultural net. Contributions cover a broad range of topics, including poetics of Early Modern Drama; political, institutional and social practices; history of themes and motifs (Stoffgeschichte); history of genres/cross-fertilization between genres; textual traditions and distribution of texts; questions of originality and authorship; theories of circulation and net structures in Drama Studies.

**The Simple Book of Not-So-Simple Puzzles** Serhiy Grabarchuk, Peter Grabarchuk, Serhiy Grabarchuk Jr., 2008-02-11 This collection of more than one hundred original and highly sophisticated puzzles presents challenges that require creative, outside of the box thinking. Many different types of puzzles are included, such as word, number, logical, visual, spatial, dissection, dividing, dot-connecting, matchstick, coin, and more. Each aesthetically appealing puzzle

**A Man on the Moon** Andrew Chaikin, 2007-08-28 The authoritative masterpiece (L. A. Times) on the Apollo space program and NASA's journey to the moon. This acclaimed portrait of heroism and ingenuity captures a watershed moment in human history. The astronauts themselves have called it the definitive account of their missions. On the night of July 20, 1969, our world changed forever when Neil Armstrong and Buzz Aldrin walked on the moon. Based on in-depth interviews with twenty-three of the twenty-four moon voyagers, as well as those who struggled to get the program moving, *A Man on the Moon* conveys every aspect of the Apollo missions with breathtaking immediacy and stunning detail. *A Man on the Moon* is also the basis for the acclaimed miniseries produced by Tom Hanks, *From the Earth to the Moon*, now airing and streaming again on HBO in celebration of the 50th anniversary of Apollo 11.

**The Poltergeist Prince of London** James Clark, Shirley Hitchings, 2013-10-01 It began with a key. One afternoon in 1956, in the home of the Hitchings family in Battersea, south London, a small silver key appeared on Shirley Hitchings' bed. This seemingly insignificant event heralded the beginning of one of the most terrifying, incredible and mysterious hauntings in British history. The spirit, who quickly became known as 'Donald', began to communicate, initially via tapping sounds, but over time - and with the encouragement of psychical researcher Harold Chibbett, whose case-files appear here - by learning to write. Soon, the spirit had begun to make simply incredible claims about his identity,

insisting that he was one of the most famous figures in world history – but what was the truth? Here, for the first time, is the full story, told by the woman right at the heart of it all – Shirley herself.

*Rethinking Social Action through Music* Geoffrey Baker, 2021-04-12 How can we better understand the past, present and future of Social Action through Music (SATM)? This groundbreaking book examines the development of the Red de Escuelas de Música de Medellín (the Network of Music Schools of Medellín), a network of 27 schools founded in Colombia's second city in 1996 as a response to its reputation as the most dangerous city on Earth. Inspired by El Sistema, the foundational Venezuelan music education program, the Red is nonetheless markedly different: its history is one of multiple reinventions and a continual search to improve its educational offering and better realise its social goals. Its internal reflections and attempts at transformation shed valuable light on the past, present, and future of SATM. Based on a year of intensive fieldwork in Colombia and written by Geoffrey Baker, the author of *El Sistema: Orchestrating Venezuela's Youth* (2014), this important volume offers fresh insights on SATM and its evolution both in scholarship and in practice. It will be of interest to a very varied readership: employees and leaders of SATM programs; music educators; funders and policy-makers; and students and scholars of SATM, music education, ethnomusicology, and other related fields.

**How the Mind Works** Steven Pinker, 2009-06-02 An assessment of human thought and behavior explores conundrums from the mind's ability to perceive three dimensions to the nature of consciousness, in an account that draws on beliefs in cognitive science and evolutionary biology.

*Frankenstein (Modern English Translation)* Mary Shelley, 2019-05 Carefully edited for modern readers to allow for easier reading Obsessed with the secret of creation, Swiss scientist Dr. Victor Frankenstein cobbles together a body he's determined to bring to life. And one fateful night, he does. When the creature opens his eyes, the doctor is repulsed: his vision of perfection is, in fact, a hideous monster. Dr. Frankenstein abandons his creation, but the monster won't be ignored, setting in motion a chain of violence and terror that shadows Victor to his death. Mary Shelley's *Frankenstein*, a gripping story about the ethics of creation and the consequences of trauma, is one of the most influential Gothic novels in British literature. It is as relevant today as it is haunting.

*Playing the Past* Zach Whalen, Laurie N. Taylor, 2008 *Playing the Past* brings together a group of interdisciplinary scholars to examine the complementary notions of history and nostalgia as they are expressed through video games and in gaming culture. The scope of these related concepts moves from the personal to the cultural, and essays in this collection address video game nostalgia as both an individual and societal phenomenon, connecting the fond memories many of us have of classic gaming to contemporary representations of historical periods and events in video games. From Ms. Pac-Man and Space Invaders to Call of Duty and JFK: Reloaded, the games many of us have played since childhood inform how we see the world today, and the games we make and play today help us communicate ideas about real world history. By focusing on specific games, historical periods and media ecologies, these essays collectively take an in depth look at the related topics of nostalgia for classic gaming, gaming and histories of other media, and representations of real history in video games.

**Eminem and Rap, Poetry, Race** Scott F. Parker,2014-10-15 Eminem is the best-selling musical artist of the 21st century. He is also one of the most contentious and most complex artists of our time. His verbal dexterity ranks him among the greatest technical rappers ever. The content of his songs combines the grotesque and the comical with the sincere and the profound, all told through the sophisticated layering of multiple personae. However one finally assesses his contribution to popular culture, there's no denying his central place in it. This collection of essays gives his work the critical attention it has long deserved. Drawing from history, philosophy, sociology, musicology, and other fields, the writers gathered here consider Eminem's place in Hip Hop, the intellectual underpinnings of his work, and the roles of race, gender and privilege in his career, among various other topics. This original treatment will be appreciated by Eminem fans and cultural scholars alike.
