Embedded Systems Design with the Texas Instruments MSP432 32-bit Processor Dung Dang, Daniel J. Pack, Steven F. Barrett, 2016-10-26 This book provides a thorough introduction to the Texas Instruments MPS432™ microcontroller. The MPS432 is a 32-bit processor with the ARM Cortex M4F architecture and a built-in floating point unit. At the core, the MSP432 features a 32-bit ARM Cortex-M4F CPU, a RISC-architecture processing unit that includes a built-in DSP engine and a floating point unit. As an extension of the ultra-low-power MSP microcontroller family, the MSP432 features ultra-low power consumption and integrated digital and analog hardware peripherals. The MSP432 is a new member to the MSP family. It provides for a seamless transition to applications requiring 32-bit processing at an operating frequency of up to 48 MHz. The processor may be programmed at a variety of levels with different programming languages including the user-friendly Energia rapid prototyping platform, in assembly language, and in C. A number of C programming options are also available to developers, starting with register-level access code where developers can directly configure the device's registers, to Driver Library, which provides a standardized set of application program interfaces (APIs) that enable software developers to quickly manipulate various peripherals available on the device. Even higher abstraction layers are also available, such as the extremely user-friendly Energia platform, that enables even beginners to quickly prototype an application on MSP432. The MSP432 LaunchPad is supported by a host of technical data, application notes, training modules, and software examples. All are encapsulated inside one handy package called MSPWare, available as both a stand-alone download package as well as on the TI Cloud development site: [dev.ti.com](http://dev.ti.com) The features of the MSP432 may be extended with a full line of BoosterPack plug-in modules. The MSP432 is also supported by a variety of third party modular sensors and software compiler companies. In the back, a thorough introduction to the MPS432 line of microcontrollers, programming techniques, and interface concepts are provided along with considerable tutorial information with many illustrated examples. Each chapter provides laboratory exercises to apply what has been presented in the chapter. The book is intended for an upper level undergraduate course in microcontrollers or mechatronics but may also be used as a reference for capstone design projects. Practicing engineers already familiar with another microcontroller, who require a quick tutorial on the microcontroller, will also find this book very useful. Finally, middle school and high school students will find the MSP432 highly approachable via the Energia rapid prototyping system.

**Launch Pad UK: Britain and the Cuban Missile Crisis** Jim Wilson OBE,2009-04-20 For most British people the weekend of 27/28 October 1962 could so very easily have been their last weekend on earth, yet astonishingly the fact that Britain's nuclear deterrent forces went to an unprecedented level of readiness was kept secret from the public. Thor nuclear-tipped ballistic missiles stood on a round-the-clock wartime state of alert ready to be fired, these were the 'other' missiles of the Cuban Missile Crisis, which made Britain, in effect, America's launch pad. During the height of the crisis both RAF Bomber Command and the US Strategic Air Command were poised at the highest states of readiness. Both were ordered to a level of war readiness unparalleled throughout the whole of the forty years of Cold War. There is evidence to suggest that had the US needed to launch an air strike against Russian missiles in Cuba, President Kennedy might have been willing to absorb a Soviet nuclear assault on a NATO ally without retaliation, if it would have avoided escalation to World War Three. It is sobering to those who lived through that period that, the British Ambassador to Cuba commented: 'If it was a nuclear war we were headed for, Cuba was perhaps a better place to be than Britain!'

**Trailblazing Mars** Pat Duggins,2010-09-19 Travel to and from Mars has long been a staple of science fiction. And yet the hurdles--both technological and financial--have kept human exploration of the red planet from becoming a reality. Trailblazing Mars offers an inside look at the current efforts to fulfill this dream. Award-winning journalist Pat Duggins examines the extreme new challenges that will be faced by astronauts on the journey there and back. They'll have to grow their own food, find their own water, and solve their own problems and emergencies without hope of rescue or re-supply. Mars travel will be more challenging and hazardous than settling the Old West--but we were not witness to the fate of the Donner Party on CNN. Can the technological hurdles be cleared?

Will the public accept the very real possibility of astronaut death? Should a mission be publicly or privately funded? Is the science worth the cost? These and many other questions are answered in Duggins's exciting new book.
