Medicine and Conflict Sebastian Browne,2018-08-06 This book focuses on an important but neglected aspect of the Spanish Civil War, the evolution of medical and surgical care of the wounded during the conflict. Importantly, the focus is from a mainly Spanish perspective – as the Spanish are given a voice in their own story, which has not always been the case. Central to the book is General Franco's treatment of Muslim combatants, the anarchist contribution to health, and the medicalisation of propaganda – themes that come together in a medico-cultural study of the Spanish Civil War. Suffusing the narrative and the analysis is the traumatic legacy of conflict, an untreated wound that a new generation of Spaniards are struggling to heal.

Handbook of Preservatives Michael Ash,2004 This handbook contains comprehensive information on more than 5000 trade names and generic chemicals and materials that are used in a broad range of formulations to prevent the contamination and decomposition of end products. Product degradation can be caused by exposure to oxygen, ozone, bacteria, molds, yeast, mildew, and fungi. The industries that depend on the proper selection of preserving chemicals and materials are diverse and include: plastics, elastomers, construction, paper/pulp, agriculture, textiles, paints and coatings, pharmaceutical, cosmetics, food, beverages. This handbook contains comprehensive information on a variety of preservatives available from major chemical manufacturers and can expedite the material selection process for chemists, formulators and purchasing agents by providing the answers to these questions: Is the agent capable of inhibiting the detrimental effects of oxygen, ozone, or microbes to the extent necessary? Is the agent's overall physical and chemical attributes compatible with the product or system being protected? Can the agent remain stable under storage conditions and for the application requirements? Is its safety in production and handling acceptable? Does its level of toxicity meet environmental regulations? Does it meet cost requirements?
