Leadership, Teamwork, and Trust Watts S. Humphrey, James W. Over, 2010-12-30 Every business is a software business, and every business can profit from improved software processes. *Leadership, Teamwork, and Trust* discusses the critical importance of knowledge work to the success of modern organizations. It explains concrete and necessary steps for reshaping the way in which software development, specifically, is conducted. A sequel to Humphrey's influential *Winning with Software*, this book presents new and copious data to reinforce his widely adopted methods for transforming knowledge work into a significant and sustainable competitive advantage, thereby realizing remarkable returns. Humphrey addresses here the broader business community--executives and senior managers who must recognize that today, every business is a software business.

Leadership U Gary Burnison, 2020-06-24 Accelerating Through the Crisis Curve Leadership is all about others—inspiring them to believe, then enabling that belief to become reality. That's the essence of *Leadership U*: it starts with 'U' but it's not about 'U.' Those timeless words are timelier than ever today, as leaders look to accelerate through the crisis curve. As author Gary Burnison observes, "There will likely be more change in the next two years than we have seen in the last twenty." Now, in *Leadership U: Accelerating Through the Crisis Curve*, Burnison lays out a framework—his "Six Degrees of Leadership"—to show leaders how to create change. Anticipate - foreseeing what lies ahead, amid ambiguity and uncertainty that are throttled up like never before. Navigate - course-correcting in real time, to keep the organization on an even keel. Communication - constantly connecting with others; the leader is both the messenger and the message. Listen - breaking down the organizational hierarchy to gather insights at all levels—especially what the leader doesn't want to hear. Learn - applying learning agility, to "know what to do when you don't know what to do." Lead - empowering others in a bottom-up culture that is more nimble, agile, innovative, and entrepreneurial than ever before. Only by embracing these truths can leaders master another 'U'—the "crisis curve" that will completely disrupt the business landscape. The world has changed—forever. The old days are fine to reminisce about, but you can't stay there. Today leadership means becoming comfortable with being uncomfortable. As Burnison says, when a door closes, leaders cannot afford to stand there, staring at it. It's a "get up or give up" moment. For leaders, the only choice is to find and open another door. *Leadership U* defines and inspires the pathway through that door.

The Curve Ahead Dave Power, 2014-07-29 Why do most growth companies stop growing? And what can their leaders do to overcome the barriers to growth? *The Curve Ahead* tackles these questions, filling a void in the literature on innovation and growth strategy that has focused on either start-ups or large public companies. Growth companies are different. Their challenge is to transition from entrepreneurial focus to a repeatable process for innovation and sustained growth - and the stakes are high. *The Curve Ahead* utilizes the power of storytelling to teach growth company leaders how to sustain long-term growth. Using the example of a gazelle, a high-growth company that is increasing revenue by at least 20% annually for four years or more, this book explores the struggles faced during business growth - something that plagues many businesses. These mid-size companies, typically with annual revenues of \$10 million to \$100 million, are the engines of economic growth and wealth creation. Tragically, most fall behind the curve before they reach their potential and are sold by investors too ready to throw in the towel. This book doesn't just lay out a fresh approach to innovation and growth strategy. It also helps professionals and business leaders avoid common pitfalls by illustrating the various ways in which growth companies get stuck and flame out. Author Dave Power then tells leaders how to get un-stuck. In addition to a myriad of real-world stories and case studies, each chapter of *The Curve Ahead* begins with the story of a fictional company called NaviMark. Navimark is emblematic of many growth companies—it faces the same business problems, personal challenges and strategic dilemmas encountered by Power in his 25 years managing, investing in and advising growth companies. Following Navimark throughout the book allows Power to provide a highly complex model of typical struggles and scenarios faced by growth companies and deliver that story to his readers in an extremely edifying,

play-by-play manner. The strategy allows readers to follow along—observing, in real time, the way that Navimark evolves, and responds (correctly or incorrectly) to external obstacles and demands. This practical and fast-paced book uses realistic characters, dialogue, and business settings to:

- Help readers anticipate the predictable challenges of business model maturity.
- Demonstrate proven tools and approaches for overcoming the barriers to growth.
- Translate abstract concepts about innovation into actionable programs that can become a part of the rhythm of the business.

This book will help thousands of mid-sized companies overcome the growth hump by providing the tools necessary to not only succeed but thrive in the future. The Curve Ahead provides a roadmap for leaders who want to sustain growth over the long term. This roadmap is based on five premises: 1. Every business model matures, following the familiar S-Curve. 2. You can and must stretch the S-Curve, but that won't work forever. 3. To sustain growth you need to find the next S-Curve. 4. Finding your next S-Curve, with some predictability, requires an innovation process, something every company should have in place. 5. Driving innovation while keeping the core business healthy is the responsibility of leaders.

Generation X Approved - Top 20 Keys to Effective Leadership Curtis Odom, 2013-03 Leaders aren't born, they are made. And they are made just like anything else, through hard work. And that's the price we'll have to pay to achieve that goal, or any goal. -Vince Lombardi As Generation X managers and executives are now tasked with running companies, there is a fundamental and critical component of business that they cannot push off or delegate and expect that someone else will have it covered-LEADERSHIP. And at its core, leadership is about one thing and one thing only-connecting with people. In corporate America, executives often forget that their objective is not only to manage the company processes, or to supervise the production of widgets or services. Equally important (if not more so), they must lead, hire and retain the people all organizations need to become or remain a successful enterprise. Another challenge for emerging Generation X leaders is to do more with less, which often means developing a more productive workforce. Complicating this is that as leaders they must direct and inspire people that have different generational values. A successful 21st century leader must be able to guide not only their Generation X peers but also the newly emerging Generation Y employees through difficult business challenges. All while mitigating the loss of the technical knowledge and skills of the retiring Baby Boomer workforce. To do this, they must have the leadership ability to align their generational peers, inspire Generation Y and set a clear direction, to maintain productivity, and motivate and influence a workforce that has fewer skills but more expectations. Years ago, there was a study done in the world of education that looked at teacher perceptions and student performance. At a high level, the report showed a strong correlation between perception and performance. When teachers believed their students would perform and the students themselves believed in that perception-even the lower performing students tended to meet the higher expectations. So, what does this

have to do with leadership? It's about perceptions and performance. Imagine if we believed in our employees to do exceptional work. Imagine if we stopped hearing about the talent shortage and stopped saying how unprepared the next generation is to work in this environment. Imagine if we actually believed that they could live up to the hype. If we tamped down the anxiety about not being prepared for the next phase of business we may actually see a world where people step up and outperform our expectations. That is what good leaders accomplish-they unlock the potential of the people they lead. This book gives you twenty specific keys to help you become the type of leader that your company or organization needs today and in the future. Keys that will help perception and performance merge for you into the reality of successful leadership.

The Infinite Leader Chris Lewis, Pippa Malmgren, 2020-10-03 WINNER: Independent Press Awards 2021 - Leadership Bestselling and award-winning author duo Chris Lewis and Pippa Malmgren are calling it out. In *The Infinite Leader*, they argue that the spectacular leadership failures that we have witnessed in recent history, stretching across business, community life and politics, can be explained by a lack of balance. Having spent centuries perfecting processes and systems to maximize productivity and being indicted to the shrine of numbers, KPI's and financial forecasting, we have to admit, there are very few examples of sustainable and inspirational leadership figures out there. By over-relying on the hard stuff, we have disregarded whole dimensions of values that are desperately needed when trying to engage communities of people towards a common goal. *The Infinite Leader* is a roadmap to introducing balance back into organizations. You can adapt your stance to the infinite possibilities facing you as a leader, and balance the main quadrants of the rational, emotional, spiritual and physical leader, to deliver sustainable leadership with integrity. Business is still about people - people operate across paradoxes and opposing forces, in a world that confounds these influences. Leaders need to continuously juggle and neutralize these to succeed. Be what your people need you to be and learn what they don't teach you in business schools; remain analytical and numbers-focused when needed, but also bring your heart, person and integrity to leadership.
