Priest, Simon, Gass, Michael

*Global Leaders for the Twenty-First Century* Michael J. Marquardt, Nancy O. Berger, 2012-02-01 Identifies eight new competencies that will be required by twenty-first century leaders, and profiles twelve up-and-coming leaders who exemplify them. New times demand new kinds of leaders. In a technological workplace which may be more virtual than physical, where bytes of information and cyberspace need to be managed more than people, leaders will have to thrive amidst high chaos and continuous change. *Global Leaders for the Twenty-First Century* profiles twelve such leaders from business and government and discusses eight key attributes necessary for successful leadership in the future. Based upon extensive research and experiences with top leaders from around the world, the authors have identified the eight critical competencies needed by twenty-first century leaders: (1) a global mindset, (2) learning and teaching skills, (3) a servant-steward relationship to one's organization, (4) systems thinking, (5) spirituality and a concern for ethics, (6) a willingness to embrace new technologies, (7) innovation and risk-taking, and (8) vision-building. Twelve of the top up-and-coming leaders from around the world who possess these attributes are profiled. They include the Fortune magazine's first two Asian leaders of the year (CEOs Nobuyuki Idei of Sony and Cheong Choong Kong of Singapore Airlines), two highly acclaimed political leaders (President Mary McAleese of Ireland and United Nations Secretary-General Kofi Annan), the leading lights in the technology field (CEOs Jorma Ollila of Nokia in Finland and John Chambers of Cisco Systems in the United States), pioneer leaders for women (Carol Bartz, CEO of AutoDesk) and minorities (Ken Chenault, CEO-designate of American Express), the world's most innovative leader (Ricardo Semler, owner of Semco in Brazil), a leader in recognizing the importance of community service and employee partnership (Henry Carris, Carris Community of Companies), the director of one of the top executive development programs in the world (Felipe Alfonso, Asian Institute of Management), and a radical new thinker in the energy field (John Browne, CEO of BP Amoco). Michael J. Marquardt is the author of fourteen books, including *Building the Learning Organization*, selected as Book of the Year by the Academy of Human Resource Development. He is Professor of Human Resource Development and Program Director of Overseas Programs at George Washington University and President of Global Learning Associates. Nancy O. ### **Project Managers' Leadership Styles in Information Technology Sector of Pakistan**

Muhammad Khalique Ahmad, Abu Bakar Abdul Hamid, Sazali ABD Wahab, 2021-10-26 In these competitive and turbulent times, project organisations face severe challenges. Despite the advancement of project management tools and techniques, the rate of project failure exceeds that of success. Regardless of calls for further empirical studies on the role of project leadership, researchers struggle to find the best leadership styles for project success. New digital transformation phenomena have forced organisations to offer more autonomy and decision-making authority to those at lower hierarchical levels. In this scenario, top management support plays a facilitator role. To the best of the researcher's knowledge, no past studies have examined these critical project success factors simultaneously in a project environment. Embedded in the theories of contingency, goal-setting, and social cognition, this study raised the hypothesis that project managers' leadership styles impact project success via the mediation of goal clarity, empowerment, and self-leadership as well as the moderation of top management support. Data was collected by administering a cross-sectional survey to 289 project organisations in the IT sector. The results demonstrated that project managers' transactional leadership style does not impact project success because goal clarity has an insignificant association with project success. However, the transformational leadership style showed a positive impact on project success because empowerment significantly and positively relates to project success. The project manager's empowering leadership style was also found to positively influence project success through followers' self-leadership. Additionally, top management support revealed a significant moderating role by strengthening the relationship between empowerment and project success. This study successfully fills theoretical gaps by introducing a novel moderated mediation model. The findings also offer useful insights to practitioners by revealing that project managers' transformational leadership and empowering leadership are needed to enhance and encourage employee empowerment and self-leadership, and ultimately secure project success.
