Rekindling the Movement Lowell Turner, Harry C. Katz, Richard W. Hurd, 2018-05-31 From gloomy times in the 1980s, the American labor movement has returned to apparent prominence through the efforts of a new generation of energetic and progressive leaders. A distinguished group of authors examines this resurgence and the potential of American unions with sympathetic yet critical eyes. Experts from a wide variety of disciplines—industrial relations, political science, economics, and sociology—identify the central developments, analyze the strengths and weaknesses of the new initiatives, and assess the progress made and the prospects for the future. Though all agree on the importance of unions, their opinions of the success of current renewal efforts diverge greatly. The interdisciplinary and comparative approach of *Rekindling the Movement* is both challenging and enlightening. Rather than merely trumpeting pet opinions, contributors provide hard evidence and causal analysis, grounded in realistic perspectives, to back up suggestions for the improvement of the new labor movement. Their straightforward observations about what is and is not possible, what does and does not work, will be of great practical value for policymakers and union leaders.

An Introduction to Community Development Rhonda Phillips, Robert Pittman, 2014-11-26 Beginning with the foundations of community development, *An Introduction to Community Development* offers a comprehensive and practical approach to planning for communities. Road-tested in the authors' own teaching, and through the training they provide for practicing planners, it enables students to begin making connections between academic study and practical know-how from both private and public sector contexts. *An Introduction to Community Development* shows how planners can utilize local economic interests and integrate finance and marketing considerations into their strategy. Most importantly, the book is strongly focused on outcomes, encouraging students to ask: what is best practice when it comes to planning for communities, and how do we accurately measure the results of planning practice? This newly revised and updated edition includes: increased coverage of sustainability issues, discussion of localism and its relation to community development, quality of life, community well-being and public health considerations, and content on local food systems. Each chapter provides a range of reading materials for the student, supplemented with text boxes, a chapter outline, keywords, and reference lists, and new skills based exercises at the end of each chapter to help students turn their learning into action, making this the most user-friendly text for community development now available.

Leadership in Psychiatry Dinesh Bhugra, Pedro Ruiz, Susham Gupta, 2013-07-30 The psychiatric profession must ensure that its next generation of leaders has the appropriate skills to provide mental health services in the face of globalization and urbanization, new technologies, and competing demands for shrinking resources. Developing leadership skills and leaders is critical in order to optimise the use of resources, their application, service planning and delivery of services for patients and their families. This is the first book on leadership (rather than management skills) to focus on psychiatry and mental health care. Contributions from international experts with clinical and non-clinical backgrounds pull together the theories and practical skills required to be a successful leader. The aim is to guide mental health professionals in general and psychiatrists in particular on how to gain the relevant skills and on how to utilise these skills and training to take on leadership roles in clinical and organisational settings. The book covers the role of the leader and the skills required for leadership, including chapters on communication, decision-making, team development, mentoring, gender issues in leadership, burnout and more. It includes a section on assessment tools and learning material. Essential reading for all those who aspire to lead in psychiatry!

Army Leadership Department of the Army, 2012-09-15 Competent leaders of character are necessary for the Army to meet the challenges in the dangerous and complex security environment we face. As the keystone leadership manual for the United States Army, FM 6-22 establishes leadership doctrine, the fundamental principles by which Army leaders act to accomplish their mission and care for their people. FM 6-22 applies to officers, warrant officers, noncommissioned officers, and enlisted Soldiers of all Army components, and to Army civilians. From Soldiers in basic training to newly commissioned officers, new leaders learn how to lead with this manual as a basis. FM 6-22 is prepared under the direction of the Army Chief of Staff. It defines leadership, leadership roles and requirements, and how to develop leadership within the Army. It outlines the levels of leadership as direct, organizational, and strategic, and describes how to lead successfully at each level. It establishes and describes the core leader competencies that facilitate focused feedback, education, training, and development across all leadership levels. It reiterates the Army Values. FM 6-22 defines how the Warrior Ethos is an integral part of every Soldier's life. It incorporates the leadership qualities of self-awareness and adaptability and describes their critical impact on acquiring additional knowledge and improving in the core leader competencies while operating in constantly changing operational environments. In line with evolving Army doctrine, FM 6-22 directly supports the Army's capstone manuals, FM 1 and FM 3-0, as well as keystone manuals such as FM 5-0, FM 6-0, and FM 7-0. FM 6-22 connects Army doctrine to joint doctrine as expressed in the relevant joint doctrinal publications, JP 1 and JP 3-0. As outlined in FM 1, the Army uses the shorthand expression of BE-KNOW-DO to concentrate on key factors of leadership. What leaders DO emerges from who they are (BE) and what they KNOW. Leaders are prepared throughout their lifetimes with respect to BE-KNOW-DO so they will be able to act at a moment's notice and provide leadership for whatever challenge

they may face. FM 6-22 expands on the principles in FM 1 and describes the character attributes and core competencies required of contemporary leaders. Character is based on the attributes central to a leader's make-up, and competence comes from how character combines with knowledge, skills, and behaviors to result in leadership. Inextricably linked to the inherent qualities of the Army leader, the concept of BE-KNOW-DO represents specified elements of character, knowledge, and behavior described here in FM 6-22.

Community Peter Block, 2009-09-01 Most of our communities are fragmented and at odds within themselves. Businesses, social services, education, and health care each live within their own worlds. The same is true of individual citizens, who long for connection but end up marginalized, their gifts overlooked, their potential contributions lost. What keeps this from changing is that we are trapped in an old and tired conversation about who we are. If this narrative does not shift, we will never truly create a common future and work toward it together. What Peter Block provides in this inspiring new book is an exploration of the exact way community can emerge from fragmentation. How is community built? How does the transformation occur? What fundamental shifts are involved? What

can individuals and formal leaders do to create a place they want to inhabit? We know what healthy communities look like—there are many success stories out there. The challenge is how to create one in our own place. Block helps us see how we can change the existing context of community from one of deficiencies, interests, and entitlement to one of possibility, generosity, and gifts. Questions are more important than answers in this effort, which means leadership is not a matter of style or vision but is about getting the right people together in the right way: convening is a more critical skill than commanding. As he explores the nature of community and the dynamics of transformation, Block outlines six kinds of conversation that will create communal accountability and commitment and describes how we can design physical spaces and structures that will themselves foster a sense of belonging. In *Community*, Peter Block explores a way of thinking about our places that creates an opening for authentic communities to exist and details what each of us can do to make that happen.
