Play: A Theory of Learning and Change Tara Brabazon, 2015-12-12 This book examines the question of why 'play' is a happy and benevolent verb in childhood, yet a subjective label of behaviour in adulthood. It studies the transformation of the positively labelled term 'child's play', used to refer to our early years, into an aberrance or deviation from normal social relationships in later life, when we speak of playing up or playing around. It answers the question by proposing play as a theory of learning, an ideology that circumscribes behaviour, and a way of thinking. Written by scholars of early childhood through to further and higher education, the book presents research on play enacted in a way that arches beyond the specificity of age groups or predictive, normative patterns. It is international in its focus, moving beyond insular, inward and parochial educational standards and limitations in one city, province, state or nation. Finally, it demonstrates the value of play to educational policy and theories of learning.

Looking for Learning: Maths through Play Laura England, 2021-01-21 Looking for Learning: Maths through Play is a full-colour, practical guide to encourage children to think about maths while playing, using a range of common resources that will spark their curiosity. It is full of creative suggestions for incorporating mathematical concepts – counting, comparison, composition, shape, pattern and number – into child-led play. The book contains ideas for bringing mathematical learning into children's favourite activities: role play and construction; art and nature; sand and water play and even simple technology-based activities using projectors or torches. Experienced Early Years teacher Laura England, creator of Little Miss Early Years, also provides advice about getting children talking about maths during daily routines in Early Years settings. This dip-in-and-out book is linked to the Characteristics of Effective Learning and presents case studies, real-life images and practical pointers on how to use play for early mathematical concepts. With tips from setting up the environment to the adult's role in this child-led play, Looking for Learning: Maths through Play is ideal for all Early Years practitioners searching for accessible ideas for incorporating the mathematical learning through play into their settings. Looking for Learning books are the number one tool for identifying learning opportunities in child-led play. All four books are packed full of tried-and-tested ideas for indoor and outdoor activities, helpful hints and tips and full-colour photographs. Written by Laura England, known as Little Miss Early Years, these are a must-have for any nursery or pre-school.

A Little Learning Now and Then Edith Gwynne Utterback, 1924

Teaching Through Play Bennett, Neville, 1997-01-01 This book is based on the findings of a research project into Reception Teachers' Theories of Play funded by the Economic & Social Research Council. There is strong ideological and theoretical support for a play-based curriculum in the early years. But evidence suggests that teachers find this difficult to translate into practice. The educational potential of play is not realized. This study focuses on nine reception class teachers, ranging from novices to experts, in order to discover their theories of play and

how these relate to classroom practice. The data reveal new insights into how they strive to incorporate play into the curriculum in contrasting ways and the constraints they encounter in this process. There is a need to improve the quality of teaching and learning through play. Teaching Through Play makes a valuable contribution to this process.

Learning to Play Aske Plaat, 2020-12-23 In this textbook the author takes as inspiration recent breakthroughs in game playing to explain how and why deep reinforcement learning works. In particular he shows why two-person games of tactics and strategy fascinate scientists, programmers, and game enthusiasts and unite them in a common goal: to create artificial intelligence (AI). After an introduction to the core concepts, environment, and communities of intelligence and games, the book is organized into chapters on reinforcement learning, heuristic planning, adaptive sampling, function approximation, and self-play. The author takes a hands-on approach throughout, with Python code examples and exercises that help the reader understand how AI learns to play. He also supports the main text with detailed pointers to online machine learning frameworks, technical details for AlphaGo, notes on how to play and program Go and chess, and a comprehensive bibliography. The content is class-tested and suitable for advanced undergraduate and graduate courses on artificial intelligence and games. It's also appropriate for self-study by professionals engaged with applications of machine learning and with games development. Finally it's valuable for any reader engaged with the philosophical implications of artificial and general intelligence, games represent a modern Turing test of the power and limitations of AI.

Play-based Learning in the Primary School Mary Briggs, Alice Hansen, 2012-03-19 Play is an essential part of learning and development for children and is an increasingly important aspect of creative approaches to teaching and learning in primary education. This book demonstrates the value of play in all its different forms as a highly effective medium for teaching and learning across the curriculum. The authors explore how play can be used to increase engagement, motivation and fun in learning situations, examining the theoretical principles of play for learning, types of play for older children, planned and facilitating play-based learning, using thematic approaches when working with individuals, groups and whole classes, in addition to covering important teaching issues such as assessment, inclusion and transition out of primary education. This is recommended reading for students on primary initial teacher education courses including undergraduate (BEd, BA with QTS), postgraduate (PGCE, SCITT), and employment-based routes into teaching, and also for practicing teachers wishing to enhance their own teaching. Mary Briggs is Mathematics and Education tutor at the University of Warwick. Alice Hansen is an educational consultant who works within a number of educational settings and national bodies developing continuing professional development for teachers.

Learn to Play Chess Like a Boss Patrick Wolff, 2019-09-17 Stop playing like a pawn and start playing like the king You already know just how enjoyable--and and challenging--the game of chess can be. all the chess pieces including their strengths and weaknesses, tips on how to protect your pieces and prevent their capture, and guidance on when to attack and defend like a boss. You'll also find a bonus tear-out card to take your new tactics on the go!

Language for Learning in the Primary School Sue Hayden, Emma Jordan, 2015-06-12 Language for Learning in the Primary School is the long awaited second edition of Language for Learning, first published in 2004 and winner of the NASEN/TES Book Award for Teaching and Learning in 2005. This handbook has become an indispensable resource, packed full of practical suggestions on how to support 5-11 year old children with speech, language and communication difficulties. Colour coded throughout for easy referencing, this unique book supports inclusive practice by helping teachers to: Identify children with speech, language and communication needs (SLCN) Understand speech, language and communication skills Consider roles and responsibilities at primary school Plan a differentiated and adapted curriculum Consider the language demands across subjects Adopt a whole school approach Make use of a wide range of positive strategies Empower children to access the curriculum Language for Learning in the Primary School comes complete with a wealth of photocopiable resources, giving teachers and teaching assistants the confidence to help children with SLCN more effectively in mainstream settings. It will also be an extremely useful resource for speech and language therapists, specialist teachers and educational psychologists.

Elemental Play and Outdoor Learning Annie Woods, 2016-11-10 Providing a fresh approach to examining development in the early years, this book draws together well-established ideas and theories based on outdoor play experiences and connects them to spiritual development in children. Elemental Play and Outdoor Learning considers socio-cultural perspectives, guided participation and mediated learning alongside playfulness as it looks at young children's developing interest in the people around them, the environment they experience and the ideas and objects that involve them. Including rich encounters with young children and adults, chapters cover: elemental play as an approach to observe and support children's holistic development; the role of people in developing effective exploratory and social skills; using the concept of elemental play to consider the spiritual system as an aspect of child development; imaginative play with raw, natural materials and how prepared environments can encourage children's natural exploration; an exploration of well-established constructs of play and how elemental play can be integrated or re-conceptualised with the other theories. Exploring current thinking about natural experiences, interest in forest school activity and fresh insight into dynamic ecological concepts, this book will be essential reading for practitioners and students on undergraduate and postgraduate early years and childhood studies courses.

The Wiley Handbook of Teaching and Learning Gene E. Hall, Linda F. Quinn, Donna M. Gollnick, 2018-09-12 Provides a comprehensive reference for scholars, educators, stakeholders, and the general public on matters influencing and

directly affecting education in today's schools across the globe This enlightening handbook offers current, international perspectives on the conditions in communities, contemporary practices in schooling, relevant research on teaching and learning, and implications for the future of education. It contains diverse conceptual frameworks for analyzing existing issues in education, including but not limited to characteristics of today's students, assessment of student learning, evaluation of teachers, trends in teacher education programs, technological advances in content delivery, the important role for school leaders, and innovative instructional practices to increase student learning. The Wiley Handbook of Teaching and Learning promotes new, global approaches to studying the process of education, demonstrates the diversity among the constituents of schooling, recognizes the need for and presents a variety of approaches to teaching and learning, and details exemplary practices in education. Divided into four sections focused on general topics—context and schooling; learners and learning; teachers and teaching; and educators as learners and leaders—and with all-new essays that look at what has been, what is, and what could be, this book is destined to inspire thoughtful contemplation from readers about what it means to teach and learn. Examines teaching, learners, and learning from a contemporary, international perspective, presenting alternative views and approaches Provides a single reference source for teachers, education leaders, and agency administrators Summarizes recent research and theory Offers evidence-based recommendations for practice Includes essays from established and emerging U.S. and international scholars Each chapter includes a section encouraging readers to think ahead and imagine what education might be in the future Scholars from around the world provide a range of evidence-based ideas for improving and modifying current educational practices, making The Wiley Handbook of Teaching and Learning an important book for the global education community and those planning on entering into it.

Collection of Plays Ca. 1870-1914 ,1912

Outdoor Learning and Play Liv Torunn Grindheim,Hanne Værum Sørensen,Angela Rekers,2021-07-20 This Open Access book examines children's participation in dialectical reciprocity with place-based institutional practices by presenting empirical research from Australia, Brazil, China, Poland, Norway and Wales. Underpinned by cultural-historical theory, the analysis reveals how outdoors and nature form unique conditions for children's play, formal and informal learning and cultural formation. The analysis also surfaces how inequalities exist in societies and communities, which often limit and constrain families' and children's access to and participation in outdoor spaces and nature. The findings highlight how institutional practices are shaped by pedagogical content, teachers' training, institutional regulations and societal perceptions of nature, children and suitable, sustainable education for young children. Due to crises, such as climate change and the recent pandemic, specific focus on the outdoors and nature in cultural formation is timely for the cultural-historical theoretical tradition. In doing so, the book provides empirical and theoretical support for policy makers, researchers, educators and families to enhance, increase and sustain outdoor and nature education.

Playing, Laughing and Learning with Children on the Autism Spectrum Julia Moor,2008-07-15 Praise for the first

edition: 'An approachable and practical edition that will be welcomed by parents and carers alike. I know how hard it can be to find 'How to' resources for parents. Well here is a gem.' - Children, Young People and Families
Parents of young children newly diagnosed as on the autism spectrum are often at a loss for ideas about how best to help their child. *Playing, Laughing and Learning with Children on the Autism Spectrum* is not just a collection of play ideas; it shows how to break down activities into manageable stages, and looks at ways to gain a child's attention and motivation and to build on small achievements. Each chapter covers a collection of ideas around a theme, including music, art, physical activities, playing outdoors, puzzles, turn-taking and using existing toys to create play sequences. There are also chapters on introducing reading and making the most of television. This updated second edition contains an extensive chapter on how to use the computer, the internet and the digital camera to find and make resources and activities, and suggests many suitable websites to help parents through the internet maze. The ideas are useful both for toddlers and primary age children who are still struggling with play.

Outdoor Learning Across the Curriculum Simon Beames, Peter Higgins, Robbie Nicol, Heidi Smith, 2023-09-14 Following the acclaim for *Learning Outside the Classroom* in 2012, this latest book more deeply explains how well constructed outdoor learning experiences can benefit children and young people's academic development and health and wellbeing. *Outdoor Learning Across the Curriculum* outlines the theory and practice to enable preservice and experienced primary and secondary school teachers to systematically incorporate meaningful outdoor learning opportunities into their daily teaching activities, in a range of environments and with diverse groups of students. Six of the chapters are substantially re-worked versions of the 2012 book, two are completely re-imagined, and four are entirely new. Topics for developing learning and teaching outdoors include: Inclusive educational design Learning for sustainability Community-based learning The role of student curiosity and wonder Evidencing learning Developing a whole school approach Place-responsive education Integrating digital technology With practical and engaging chapters containing aims, case studies, and guidelines for practice, this timely book provides teachers the tools with which they can integrate outdoor learning into their daily timetable. It will also be a valuable resource to other professions which use the outdoors for educational purposes.
