**Mega-universities and Knowledge Media** John Daniel,2013-05-13 A discussion of how the knowledge media can contribute to the renewal of universities, particularly through the development of distance education. It looks at universities which have risen to the challenges of cost and accessibility using technology.

The Higher Education Manager's Handbook Peter McCaffery,2010-06-23 The Higher Education Manager's Handbook has been substantially updated and reflects important changes that have occurred since its first publication in 2004. In this new edition, Peter McCaffery continues to draw on a wealth of US and UK case studies based in innovative practice. The book offers counsel and guidance on all aspects of the manager's role and provides the navigational tools to successfully operate where the legitimacy of management has often been questioned. This bestselling guide builds upon its original strengths and remains an engaging, accessible and highly enjoyable read. Written from the unique perspective of the Higher Education manager, it offers practical advice that can be implemented immediately by managers and university leaders at all levels. It addresses the internal ramifications of cynicism and demoralisation, and develops the four essential prerequisites to becoming an effective Higher Education leader: Knowing Your Environment Knowing Your University Knowing Your Department Knowing Yourself What's new in the second edition... New chapters: Leading and Celebrating Diversity and Enhancing the Student Experience The key strategic challenges to higher education University governance Institutional financial health Universities as ecologies of learning Managing your reputation Communicating in a crisis Higher Education Managers, Team Leaders, Vice Chancellors,

Provosts, University Presidents, Department Heads and Student Affairs Administrators will find this book to be an irreplaceable resource.

*Management and Leadership Development* Christopher Mabey,Tim Finch Lees,2007-12-12 `This is the first really thought-provoking book that I have read on management development. It is a book primarily addressed to students, but in this field, we are all students. It merits a wide readership both among practising managers as well as among those responsible for developing them' - Max Boisot, ESADE `Mabey and Finch-Lees inject a breath of fresh air into the management development field by expanding upon its heretofore functionalist base. They offer an informative critique of mainstream views, featuring alternative discourses to examine such hard questions as why management development hasn't quite delivered on management's considerable investment in it. As a veritable tour de force in its absorbing integration and review of a large tract of literature, the book informs both management scholars and practitioners what might be expected from management development's intended but also unanticipated outcomes' - Joe Raelin, Northeastern University `In a well-written, accessible and yet sophisticated text, Mabey and Finch-Lees show themselves to be as familiar with the latest in management development

practice as they are with the sometimes arcane theoretical literature that surrounds it. Its great strength is to recognize the plurality of discourses - some overlapping and complementary, others distinct and oppositional - about the subject. This book can be recommended as a unique resource for students and scholars of management development' - Chris Grey, University of Warwick This book represents a significant step forward in the theory of management and leadership development. It offers an international perspective in this era of globalisation and a new and questioning perspective on the common belief that leadership is something completely different to, and more important than, management. This book will be of great help to the serous theorist and researcher of management and leadership development. It is an invaluable point of reference for a broad range of theory and research in this area, which it summarises with admirable brevity and clarity' - John G Burgoyne, Lancaster University Management School and Henley Management College Management development is a potent and high-profile human resource activity, involving some of the organizations' key players and attracting huge hopes and investments from governments, organizations and individuals alike. Yet at several levels, the high expectations often remain unfulfilled. So why is this a subject and activity that continues to command such intense interest from scholars and practitioners alike? Chris Mabey and Tim Finch-Lees provide a fresh analysis of the concept and practice of management and leadership development (MLD). Grounded in research, the authors set out the current state of management and leadership development practices, before introducing readers to competing theories of MLD and offering them a more critical perspective. Throughout the book, ideas are illustrated by international case studies and

vignettes that evoke the perceptions and interests of the whole range of stakeholders in the management development process. Management Development has been written for upper level undergraduate and masters level students pursuing courses in HRM, HRD, Leadership Development, Organizational Behaviour, Management, Organization Change, Personnel Management, and training and development modules.

**Educational Development** Land, Ray,2004-11-01 · What do educational developers see as the main issues to be tackled within their work? · How does the educational context and culture in which they work affect the practice of educational developers? · How do educational developers perceive change occurring within higher education organisations? In higher education institutions worldwide, issues relating to quality in teaching and learning have gained prominence over the last two decades as student numbers, and the need to be publicly accountable, have increased. During this time a sizeable community of educational developers has emerged whose work and research focuses on the enhancement of the student experience in higher education. A significant issue for these developers is how change can be effected in organisations with well-established academic cultures and practices, beset by many other priorities and pressures. This first book-length analysis of developers as a community of practice illustrates in their own words the issues they face, their differing orientations to development (given their differing organisational cultures), and how they see their institutional role. What emerges is the contested notion of 'development' itself, and a tribe of developers who, though fragmented, offer a rich variation in their discourse, identity and practice. Drawing upon developers' own voices, the book offers a lively and accessible narrative approach to this rapidly evolving area. It is a

useful guide to help individual developers compare their own practice with that of others, and development teams to map the effectiveness of their own centre's provision. Educational Developmentis essential reading for educational developers, teaching and learning co-ordinators and teaching fellows, as well as senior managers with remits for academic development, and directors of quality assurance. It is also of interest to those in higher education who are concerned with bringing about organisational or cultural change.

**Encyclopedia of Distance Learning** Howard, Caroline,Boettcher, Judith V.,Justice, Lorraine,Schenk, Karen D.,Rogers, Patricia L.,Berg, Gary A.,2005-04-30 This encyclopedia offers the most comprehensive coverage of the issues, concepts, trends, and technologies of distance learning. **Learning Organizations** Ariane Berthoin Antal,Peter Meusburger,Laura Suarsana,2013-11-19 This book is designed to extend the field of organizational learning in several ways. The contributors from three continents bring different perspectives on processes and outcomes of knowledge creation and sharing in and between organizations in diverse contexts. They use approaches and concepts from numerous disciplines including the arts, economics, geography, organizational studies, psychology, and sociology. The contributions enrich the spatial turn in organization studies by offering fresh insights for researchers who seek to attend to the contextual dimensions of the phenomena they are studying. They provide examples of organizational places and spaces that have not yet received sufficient attention, as diverse as temporary international organizations and computer screens.

**The Learning Organization, and the Need for Directors who Think** Bob Garratt,1994

*Ethics and the Scholarship of Teaching and Learning* Lisa M. Fedoruk,2022-09-07 This book addresses issues related to ethics and the scholarship of teaching and learning, and pays special attention to ethical concerns and experiences that have arisen from engaging in Scholarship of Teaching and Learning (SoTL) work. The book draws on a range of research projects, theoretical frameworks and narrative experiences to provide multiple perspectives of how meaning is made of research ethics in SoTL, academic community and REB partnerships, experiences of Students as Partners in SoTL, and ethically-minded approaches to teaching, learning and inquiry. Specifically, this edited book includes ethical practices that have become increasingly expansive in an ever-evolving academic environment such as navigating pandemic pedagogy and data ownership due to increased online content. In addition, contributions pertaining to academic community partnerships between REBs and faculty detail realistic narratives and lessons learned about how higher education can become more equitable, diverse and inclusive. Subsequently, decolonial ethics for teaching and learning in higher education, as well as participatory parity, exemplify the need for SoTL practitioners to be responsive to the social and cultural realities of a global context in ways that address social inequities and social responsibility. Relational ethics by way of student perspectives on vulnerability and classroom-based SoTL research underscore the need for students to be taught about their own agency as a means of providing student voice within SoTL work. Lastly, this book celebrates how ethically-minded approaches to teaching, learning and inquiry uncover strategies and pedagogy that

encourage concepts such as ethical imagination and systems and design thinking practices.

*Routledge Handbook of Sports Event Management* Milena M. Parent,Jean-Loup Chappelet,2017-07-14 From the Olympic Games to community-level competitions, sports events can be complex and pose a particular set of managerial challenges. The Routledge Handbook of Sports Event Management surveys the management of sports events around the world of every size and scale, from small to mega-events, including one-off and recurring events, and single-sport and multi-sport events. The book adopts a unique stakeholder perspective, structured around the groups and individuals who have an interest in and co-create sports events, including organising committees, promoters, sport organisations, spectators, community groups, sponsors, host governments, the media and NGOs. Each chapter addresses a specific stakeholder, defines that stakeholder and its relationships with sports events, describes the managerial requirements for a successful event, assesses current research and directions for future research, and outlines the normative dimensions of stakeholder engagement (such as sustainability and legacy). No other book takes such a broad view of sports event management, surveying key theory, current research, best practice, and moral and ethical considerations in one volume. With contributions from leading sport and event scholars from around the world, the Routledge Handbook of Sports Event Management is essential reading for any advanced student, researcher or professional with an interest in sport management, sport development, sport policy or events.

**Engineering Mega-Systems** Renee Stevens,2016-04-19 With their ability to cross traditional boundaries and achieve a level of functionality greater than their component

elements, mega-systems have helped corporations and government organizations around the world resolve complex challenges that they otherwise couldn't address with stand-alone systems. Engineering Mega-Systems: The Challenge of Systems Engineering in the Information Age provides a clear understanding of the engineering of this class of systems—a process that demands consideration of increasing program scale and the rapid change of underlying technologies. Written by Renee Stevens, a Senior Principal Engineer at The MITRE Corporation with decades of experience analyzing, engineering, and acquiring large-scale systems for the U.S. Department of Defense and other government agencies, this book explains how the engineering of mega-systems is inherently different from that of large-scale monolithic systems. It supplies the vocabulary and framework needed to explore the issues relevant to mega-systems. This framework then evolves into the Profiler diagnostic tool that helps you understand the nature and context of the system at hand and, on that basis, select the most appropriate processes, tools, and techniques. Stevens examines commercial and government applications of mega-systems to provide insight into the contemporary challenges of engineering these systems in three critical dimensions: engineering processes, management processes, and the larger context in which these systems are developed and deployed. Complete with two case studies in engineering mega-systems that illustrate valuable lessons learned and highlight emerging practices, this book supplies the understanding and the tools needed to begin engineering, characterizing, and acquiring mega-systems across multiple dimensions.

**MEGA-CRISES** Ira Helsloot,Arjen Boin,Brian Jacobs,Louise K. Comfort,2012-08-01 We live in turbulent times with continents and nations facing ever-heightening risks such as

natural disasters, intense and protracted conflicts, terrorism, corporate crises, cyber threats to infrastructures and mega-events. We are witnessing the rise of mega-crises and a new class of adversity with many unknowns. The prospect of mega-crises presents professionals and students in the field of crisis management with four major tasks. First, they should engage in "deep thinking" about the causes of the increasing occurrence of mega-crises. Second, they should identify and work through the dominant trends which complicate contemporary crisis management. Third, they should upgrade institutional crisis management capacity. Fourth, they should improve societal resilience since no institutional complex can mitigate or manage these mega-crisis on its own. This book is divided into four primary parts, each of which looks at one facet of mega-crises. Part I focuses on the concept of a mega-crisis and mega-crisis management; Part II examines crisis management of mega-natural disasters; Part III evaluates crisis management of man-made mega-crises; and Part IV identifies mega-threats and vulnerabilities. Additional major topics include Hurricane Katrina; Hurricane Gustav; the London Bombings; the Mumbai Terrorist Attacks of July 7, 2005; corporate meltdowns; the subprime crisis; the Olympic Games; electricity grids; global climate change; the Dutch Delta; risks to food security; and mega-crises and the Internet. This comprehensive text will provide practitioners and academics with the results of an across-the-board research effort in the prospects, nature, characteristics, and the effects of mega-crises.

  *Construction Project Organising* Simon Addyman,Hedley Smyth,2023-04-17 Construction Project Organising Discover foundational and cutting-edge ideas in the organisation of construction projects In Construction Project Organising, an authoritative

team of construction researchers delivers a comprehensive exploration of the many organisational processes and forms that can be found in construction project organising and the many dimensions that can influence these forms. The authors examine these dimensions, detailing their importance to projects and enabling managers to respond to calls by industry professionals for more collaborative forms of organising that focus on value creation. The book investigates the relationship between structure and action, and how patterns of action are created, recreated and maintained by scrutinising the myriad of organisational arrangements between clients, financiers, design teams, contractors, stakeholders and supply chains. It also discusses different concepts in the development and management of construction project organisations, including formation and maintenance issues. Construction Project Organising highlights some of the key issues that remain underdeveloped in the modern literature. It also includes: A thorough description of the rapidly changing socio-economic, technological, digital and data-driven context in which construction projects are designed and delivered A comprehensive examination of different concepts in the development and management of construction project organisations A practical investigation of the relationship between structure and action and how action patterns are created, recreated and maintained Grounded advice to help readers respond to calls by industry for more collaborative forms of project organisation focused on value creation Perfect for researchers, academics and advanced students of construction and similar disciplines, Construction Project Organising is also a must-read resource for construction professionals and the consultants who serve them.
