Machine Learning and Knowledge Discovery in Databases José L. Balcázar,Francesco Bonchi,Aristides Gionis,Michèle Sebag,2010-08-18 Annotation. This book constitutes the refereed proceedings of the joint conference on Machine Learning and Knowledge Discovery in Databases: ECML PKDD 2010, held in Barcelona, Spain, in September 2010. The 120 revised full papers presented in three volumes, together with 12 demos (out of 24 submitted demos), were carefully reviewed and selected from 658 paper submissions. In addition, 7 ML and 7 DM papers were distinguished by the program chairs on the basis of their exceptional scientific quality and high impact on the field. The conference intends to provide an international forum for the discussion of the latest high quality research results in all areas related to machine learning and knowledge discovery in databases. A topic widely explored from both ML and DM perspectives was graphs, with motivations ranging from molecular chemistry to social networks.

Teaching, Learning and the Net Generation: Concepts and Tools for Reaching Digital Learners Ferris, Sharmila Pixy,2011-11-30 Although a growing body of research demonstrates the need for education to adapt to the needs of the Net Generation, research also shows that traditional teaching methods continue to dominate the classroom. To stay effective, higher education must adapt to the needs of this unique generation of digital natives who grew up with computer technologies and social media. Teaching, Learning and the Net Generation: Concepts and Tools for Reaching Digital Learners provides pedagogical resources for understanding digital learners, and effectively teaching and learning with today's generation of digital natives. This book creates a much-needed resource that moves beyond traditional disciplinary and geographical boundaries, bridges theories and practice, and addresses emerging issues in technology and pedagogy.

The Elements of Joint Learning and Optimization in Operations Management Xi Chen,Stefanus Jasin,Cong Shi,2022-09-20 This book examines recent developments in Operations Management, and focuses on four major application areas: dynamic pricing, assortment optimization, supply chain and inventory management, and healthcare operations. Data-driven optimization in which real-time input of data is being used to simultaneously learn the (true) underlying model of a system and optimize its performance, is becoming increasingly important in the last few years, especially with the rise of Big Data.

Learning and Teaching Writing Online Mary Deane,Teresa Guasch,2015-04-14 This volume explores the challenges facing practitioners in higher education who use online environments and explores strategies for enhancing the experience of learners. The book focuses on online feedback, collaboration, and course design.

Optimal Learning Warren B. Powell,Ilya O. Ryzhov,2012-04-17 Learn the science of collecting information to make effective decisions Everyday decisions are made without the benefit of accurate information. Optimal Learning develops the needed principles for gathering information to make decisions, especially when collecting information is time-consuming and expensive. Designed for readers with an elementary background in probability and statistics, the book presents effective and practical policies illustrated in a wide range of applications, from energy, homeland security, and transportation to engineering, health, and business. This book covers the fundamental dimensions of a learning problem and presents a simple method for testing and comparing policies for learning. Special attention is given to the knowledge gradient policy and its use with a wide range of belief models, including lookup table and parametric and for online and offline problems. Three sections develop ideas with increasing levels of sophistication: Fundamentals explores fundamental topics, including adaptive learning, ranking and selection, the knowledge gradient, and bandit problems Extensions and Applications features coverage of linear belief models, subset selection models, scalar function optimization, optimal bidding, and stopping problems Advanced Topics explores complex methods including simulation optimization, active learning in mathematical programming, and optimal continuous measurements Each chapter identifies a specific learning problem, presents the related, practical algorithms for implementation, and concludes with numerous exercises. A related website features additional applications and downloadable software, including MATLAB and the Optimal Learning Calculator, a spreadsheet-based package that provides an introduction to learning and a variety of policies for learning.

Learn PC Tools 8.0 in a Day Kenneth L. Hughes,1992-11 Exploit the powers of PC-Tools to get the most out of your computer system. A ompanion diskette is provided to encourage hands-on activities without jeopardizing the integrity of your system.

Encyclopedia of E-Collaboration Kock, Ned,2007-12-31 This encyclopedia provides the most comprehensive compilation of information on the design and implementation of e-collaboration technologies, their behavioral impact on individuals and groups, and theoretical considerations on links between the use of e-collaboration technology and behavioral patterns. It delivers indispensable content to libraries and researchers looking to develop programs of investigation into the use of e-collaboration--Provided by publisher.

PC Learning Labs Teaches PowerPoint 4.0 for Windows Susan L. Reber,Richard P. Scott,1994 This classroom-tested book/disk learning system provides a comprehensive introduction to PowerPoint. The step-by-step instructions are designed to work with the example-filled disk so readers can learn by doing. -- Disk contains examples that work together with instructions in the book -- saves time and speeds learning

PC Learning Labs Teaches Microsoft Office Robert Nichols Kulik,PC Learning Labs,Logical Operations,1994 This uniquely integrated book/disk package combines an easy-

to-follow tutorial with carefully constructed examples on disk. The disk component of this package contains every example that is referred to in the text. Practice units are carefully crafted to ensure that critical concepts are clear, and to help the reader to reinforce skills and check progress.

 The Design of Instruction and Evaluation Mitchell Rabinowitz,Fran C. Blumberg,Howard T. Everson,2004-09-22 This book is about empirically tested knowledge and principles that inform the design of instructional and evaluation systems, and the use and promise of media and technology within such systems. Historically, psychology has informed the design of instructional and evaluation systems in different ways. A behavioral perspective emphasizes the role of the environment in determining behavior--a factor external to the learner. A cognitive perspective focuses on the role of cognitive processing and constraints in determining learning-- factors that are internal to the learner. This volume presents the affordances approach--which addresses how the environment and the affordances within it interact with cognitive processes to determine learning. Insights into this interaction are presented. It is the book's contention that the affordance approach represents an advancement over the behavioral and cognitive perspectives; it is an evolution within the cognitive approach--not an alternative to it. The Design of Instruction and Evaluation: Affordances of Using Media and Technology is intended for education practitioners responsible for the implementation of media and technology in classrooms, for researchers and faculty, and for use as a text in courses on media and technology use in educational settings, instructional design, and psychology of learning.
