Not Quite a Husband Sherry Thomas,2009-05-19 Sherry Thomas is one of the hottest new voices in historical romance, garnering the highest praise from today’s bestselling writers (“Entrancing.” —Mary Balogh; “Ravishingly sinful, intelligent and addictive.” —Eloisa James). Now Sherry delivers this powerful story of a remarkable woman and the love she thought she’d never find—with the man she thought she’d lost forever.... Their marriage lasted only slightly longer than the honeymoon—to no one’s surprise, not even Bryony Asquith’s. A man as talented, handsome, and sought after by society as Leo Marsden couldn't possibly want to spend his entire life with a woman who rebelled against propriety by becoming a doctor. Why, then, three years after their annulment and half a world away, does he track her down at her clinic in the remotest corner of India? Leo has no reason to think Bryony could ever forgive him for the way he treated her, but he won’t rest until he’s delivered an urgent message from her sister—and fulfilled his duty by escorting her safely back to England. But as they risk their lives for each other on the journey home, will the biggest danger be the treacherous war around them—or their rekindling passion?

One Hundred Hungry Ants Elinor J. Pinczes,1999-09-27 This tale of ants parading toward a picnic is “one of those rare gems capable of entertaining while it instructs” (Middlesex News). One hundred hungry ants march off single file to sample a picnic, but when the going gets too slow, they divide into two rows of fifty, then four rows of twenty-five . . . until they take so long that the picnic is gone! “The unexpected pairing of sophisticated art and light-hearted text lends this book particular distinction.” —Publishers Weekly “The illustrations . . . use a pleasing palette and energetic lines to depict ants with highly individual characters.” —Horn Book

The Tap-Dancing Knife Thrower Paul Hogan,2020-11-01 The icon and legend at last tells his story his way -- without the boring bits Paul Hogan first appeared on Australia's screens in 1971 as a 'tap-dancing knife thrower' on TV talent show New Faces. The then father of four and Sydney Harbour Bridge rigger from Granville did it as a dare, but when the network's switchboard lit up, he was invited back. So popular was he with viewers, Hogan became a regular on Mike Willesee's A Current Affair. The rest, as they say, is history. In collaboration with his business partner and best friend, John Cornell (who played his sidekick, Strop), 'Hoges' went on to become Australia's favourite TV comedian. His hugely popular comedy shows and appearances in unforgettable and ground-breaking ads for cigarettes, beer and tourism, came to personify Australia and Australians here and overseas, helping to change the perception of who we are as people and as a nation. Then, in 1986, Crocodile Dundee, the movie he conceived, co-wrote and starred in, became an international smash hit and earned its star a Golden Globe Award, as well as Oscar and BAFTA nominations. Despite the fact that Hoges claimed to have retired, many more successful movies followed. Yet even as his star rose ever higher, he always expected someone to grab him by the arm and say, 'What are you doing here? You're just a bloody rigger!' The Tap-Dancing Knife Thrower is a funny and candid account of the astonishing life of this 'lucky bastard', as Hoges describes himself. Full of stories never previously shared, and recounted in the comedian's inimitable, funny and self-deprecating style, The Tap-Dancing Knife Thrower is Paul Hogan's story told his way - 'without the boring bits'.

The Future of Ideas Lawrence Lessig,2002-10-22 The Internet revolution has come. Some say it has gone. In *The Future of Ideas*, Lawrence Lessig explains how the revolution has produced a counterrevolution of potentially devastating power and effect. Creativity once flourished because the Net protected a commons on which widest range of innovators could experiment. But now, manipulating the law for their own purposes, corporations have established themselves as virtual gatekeepers of the Net while Congress, in the pockets of media magnates, has rewritten copyright and patent laws to stifle creativity and progress. Lessig weaves the history of technology and its relevant laws to make a lucid and accessible case to protect the sanctity of intellectual freedom. He shows how the door to a future of ideas is being shut just as technology is creating extraordinary possibilities that have implications for all of us. Vital, eloquent, judicious and forthright, *The Future of Ideas* is a call to arms that we can ill afford to ignore.

Algorithms, Complexity Analysis and VLSI Architectures for MPEG-4 Motion Estimation Peter M. Kuhn,2013-06-29 MPEG-4 is the multimedia standard for combining interactivity, natural and synthetic digital video, audio and computer-graphics. Typical applications are: internet, video conferencing, mobile videophones, multimedia cooperative work, teleteaching and games. With MPEG-4 the next step from block-based video (ISO/IEC MPEG-1, MPEG-2, CCITT H.261, ITU-T H.263) to arbitrarily-shaped visual objects is taken. This significant step demands a new methodology for system analysis and design to meet the considerably higher flexibility of MPEG-4. Motion estimation is a central part of MPEG-1/2/4 and H.261/H.263 video compression standards and has attracted much attention in research and industry, for the following reasons: it is computationally the most demanding algorithm of a video encoder (about 60-80% of the total computation time), it has a high impact on the visual quality of a video encoder, and it is not standardized, thus being open to competition. Algorithms, Complexity Analysis, and VLSI Architectures for MPEG-4 Motion Estimation covers in detail every single step in the design of a MPEG-1/2/4 or H.261/H.263 compliant video encoder: Fast motion estimation algorithms Complexity analysis tools Detailed

complexity analysis of a software implementation of MPEG-4 video Complexity and visual quality analysis of fast motion estimation algorithms within MPEG-4 Design space on motion estimation VLSI architectures Detailed VLSI design examples of (1) a high throughput and (2) a low-power MPEG-4 motion estimator. Algorithms, Complexity Analysis and VLSI Architectures for MPEG-4 Motion Estimation is an important introduction to numerous algorithmic, architectural and system design aspects of the multimedia standard MPEG-4. As such, all researchers, students and practitioners working in image processing, video coding or system and VLSI design will find this book of interest.

The Digital Dilemma National Research Council,Commission on Physical Sciences, Mathematics, and Applications,Computer Science and Telecommunications Board,Committee on Intellectual Property Rights and the Emerging Information Infrastructure,2000-02-24 Imagine sending a magazine article to 10 friends-making photocopies, putting them in envelopes, adding postage, and mailing them. Now consider how much easier it is to send that article to those 10 friends as an attachment to e-mail. Or to post the article on your own site on the World Wide Web. The ease of modifying or copying digitized material and the proliferation of computer networking have raised fundamental questions about copyright and patent—intellectual property protections rooted in the U.S. Constitution. Hailed for quick and convenient access to a world of material, the Internet also poses serious economic issues for those who create and market that material. If people can so easily send music on the Internet for free, for example, who will pay for music? This book presents the multiple facets of digitized intellectual property, defining terms, identifying key issues, and exploring alternatives. It follows the complex threads of law, business, incentives to creators, the American tradition of access to information, the international context, and the nature of human behavior. Technology is explored for its ability to transfer content and its potential to protect intellectual property rights. The book proposes research and policy recommendations as well as principles for policymaking.
