Reeds Marine Distance Tables 16th edition Miranda Delmar-Morgan,2020-11-26 Reeds Marine Distance Tables are the perfect ready-reckoner for captains, navigators and owners of merchant and cruise ships large and small wanting a quick and accurate distance reference between all the regularly used commercial ports

around the world. They are also of increasing value to the superyacht fleet. The book is divided into key 'market areas', and includes a pull-out map for area identification and easy see-at-a-glance port reference. Traffic Separation Schemes are calculated into the tables whilst the distance to any port not included can easily be determined by making an approximation from the next closest port. Useful tables of major 'turning points' around the world (such as Cape Finisterre, Cape Horn and the Dover Straits), Transatlantic distances, world time zones, and time and speed conversion tables are also included. This edition has been improved and expanded. Emerging ports around the world have also been added to reflect modern trends and developments in shipping movements and expansions. Reeds Marine Distance Tables are an invaluable reference for ship owners, operators, brokers, navigators and superyacht skippers. Using this one reference, anyone can calculate the shortest or most economical distances between all the major ports in the world. 'A first class reference' Nautical Magazine 'Clear and simple support for anyone wanting to calculate the shortest or most economical distance between major ports' Telegraph
