**International Trade and the Protection of the Environment** Simon Baughen,2023-03-31 Analyzing globalization and the increasing tension it has caused between the goals of free trade and environmental protection, International Trade and the Protection of the Environment provides a comprehensive and detailed legal analysis, both at the national and international level of what looks set to become the new legal order of the twenty-first century. This book asks the questions does the treatment of 'measures tantamount to expropriation' have the capacity to lead to a 'regulatory chill' on environmental protection and what are the possibilities for claims before the UK courts that are based on alleged violations of international law? To answer them the author offers: an informed and critical commentary on the continuing controversy on GMO products, in particular on the recent WTO award in the EC-Biotech dispute a comparison of the treatment of the expropriation under NAFTA and bilateral investment treaties with position under article one of the first protocol of the European convention on human rights an analysis of the human rights dimension to claims for environmental damage against multi-national corporations, focusing particularly on claims in the US under the Alien Tort Claims Act 1789 Incisive and current, this text is a valuable tool for postgraduate law students studying international and commercial law.

**Copyright Protection of Computer Software in the United Kingdom** Stanley Lai,2000-02-01 This work analyses the scope of copyright protection for computer software in the United Kingdom, and examines challenges for the future. The work presents the case for the adoption and application of infringement methodology emanating from the courts in the United States, resulting in a narrower scope of protection than is presently argued for by many UK academics, practitioners and judges alike. The work makes a careful evaluation of the efficacy of the various prevailing tests for infringement of copyright in software and their progenies, suggesting an improved formula and advocating the utility of limiting doctrines to assist in the determination of substantial similarity of particular non-literal software elements, user interfaces and screen display protection. The monograph also contains a detailed study of reverse engineering, copyright defences, permitted acts, database protection and the copyright-contract interface in the context of computer software, not omitting crucial discussions of the internet, digital dissemination and the impact of recent treaty and legislative initiatives on British copyright law. As such it will be an important resource for practitioners, lecturers and students alike.

**Unified Patent Protection in Europe** Winfried Tilmann, Clemens Plassmann,2018-07-04 The creation of the Unified Patent Court (UPC) is the most prominent change in the European legal landscape for the last four decades. This book explains how the new system works in practice and how to make the best use of its provisions. It offers readers an in-depth and comprehensive commentary on the legal mechanisms of the upcoming ratified European Patent Law, and advice on potential problems that users of the forthcoming regulations may face. The book first describes the creation of the Unified European Patent Law and how its four new legislative texts interact. The new legislative texts are then explained and commented on in detail, rule by rule, with diverse approaches and perspectives from a practitioner team comprising patent litigators, European patent attorneys, law professors and patent judges. The Commentary takes into account the practical needs of users of the new system on both the prosecution and enforcement sides, addressing substantive and procedural problems. This book is the most authoritative text on the Unitary Patent and Unified Patents Court, and an invaluable tool for practitioners in this rapidly developing area of law.

**British Broadcasting** R.H. Coase,2013-11-26 First Published in 1969. Written in 1950, this book seeks to answer the three questions of how is it that broadcasting in Great Britain came to be organised on a monopolistic basis? What has been the effect of the monopoly on the development of, and policy towards, competitive services such as wire broadcasting and foreign commercial broadcasting intended for listeners in Great Britain? Finally, what are the views which have been held on the monopoly of broadcasting in Great Britain?

*The New Environmental Governance* Cameron Holley, Neil Gunningham, Clifford Shearing,2013-07-04 A bold and profoundly new way of governing environmental problems is palpable around the globe and aims to overcome the limitations of the interventionist state and its market alternative to offer more effective and legitimate solutions to today's most pressing environmental problems. The 'new environmental governance' (NEG) emphasises a host of novel characteristics including participation, collaboration, deliberation, learning and adaptation and 'new' forms of accountability. While these unique features have generated significant praise from legal and governance scholars, there have been very few systematic evaluations of NEG in practice, and it is still unclear whether NEG will in fact 'work', and if so, when and how. This book offers one of the most rigorous research investigations into cutting edge trends in environmental governance to date. Focusing its inquiry around some of the most central, controversial and/or under researched characteristics of NEG, the book offers fresh insights into the conditions under which we can best achieve successful collaboration, effective learning and adaptation, meaningful participatory and deliberative governance and effective forms of accountability. The book synthesizes its findings to identify seven key pillars of 'good' NEG that are central to its success and will provide useful guidance for policymakers and scholars seeking to apply new governance to a wide range of environmental and non-environmental policy contexts. The book also advances our understanding of State governance and will be a valuable reference for scholars, researchers and students working in law and regulation studies - especially in the field of environmental law.

Authored by leading private practitioners, economists, scholars and high-level officials at competition regulators, this work provides valuable insider knowledge on the application of law and policies to the pharmaceutical industry. The work contains extensive commentary on the legislation and the latest case law and administrative precedents in this sector, at both EU and national level, including certain significant jurisdictions (e.g., the US, China). Coverage of various key developments includes the recent pay-for-delay antitrust investigations, the perennial issues around parallel trade, and an examination of mergers among pharmaceutical companies and

A Human Rights Framework for Intellectual Property, Innovation and Access to Medicines Dr Joo-Young Lee,2015-07-28 This study primarily explores whether conflicts between patents and human rights in the context of access to medicines are inevitable, or whether patents can be made to serve human rights. The author argues that it is necessary to have a deepened understanding of each of the two sets of norms that govern this issue, that is, patent law and international human rights law. The chapters investigate the relevant dimensions of patent law and analyse particular human rights bearing upon the issue of intellectual property and access to medicines.

And Institutum Iurisprudentiae, Academia Sinica, a group of twenty scholars from around the world gathered to study the experiences made with regards to compulsory licensing. The results are demonstrated in this book. Trade Related Aspects of Intellectual Property Rights Carlos Correa,2020-07-23 The TRIPS Agreement is the most comprehensive and influential international treaty on intellectual property rights. It brings intellectual property rules into the framework of the World Trade Organization, obliging all WTO Member States to meet minimum standards of intellectual property protection and enforcement. This has required massive changes in some national laws, particularly in developing countries. This volume provides a detailed legal analysis of the provisions of the TRIPS Agreement, as well as elements to consider their economic implications in different legal and socio-economic contexts. This book provides an in depth analysis of the principles and of the substantive and enforcement provisions of the TRIPS Agreement, the most influential international treaty on intellectual property currently in force. It discusses the legal context in which the Agreement was negotiated, the objectives of their proponents and the nature of the obligations it created for the members of the World Trade Organization. In particular, it examines the minimum standards that must be implemented with regard to patents, trademarks, industrial designs, geographical indications, copyright and related rights, integrated circuits, trade-secrets and test data for pharmaceutical and agrochemical products. Trade Related Aspects of Intellectual Property Rights: A Commentary on the TRIPS Agreement elaborates on the interpretation of provisions contained in said Agreement, in the light of the customary principles for the interpretation of international law. The analysis -which is supported by a review of the relevant GATT and WTO jurisprudence- identifies the policy space left to such members to implement their obligations in accordance with their own legal systems and public policy objectives, including in respect of complex issues such as patentability criteria, compulsory licenses, exceptions and limitations to copyright, border measures, injunctive relief and the protection of test data under the discipline of unfair competition.
