Can East Asia Compete? Simon J. Evenett, Shahid

Yusuf, 2002-09-27 East Asian economies of the 1980s and much of the 1990s were among the most competitive exporters of manufactured products and were also able to sustain growth rates far higher than those of other countries, developing or industrial. However, the economic crisis of 1997-98 impacted the economies of these countries. Although recovery began fairly quickly in some countries, others have yet to regain their growth momentum. 'Can East Asia Compete?' looks at whether or not East Asia can restore its near magical performance, or is its competitive strength beginning to wane. This volume argues that East Asian countries have far from exhausted their growth potential. However, future competitiveness will depend on much greater innovative capability in manufacturing and services, innovativeness that is grounded in stronger institutions, improved macroeconomic policies, and closer regional coordination. 'Can East Asia Compete?' clearly summarizes the issues currently being debated and provides guidance to East Asian economies on how to deal with the policy concerns that lie ahead.

### **21st-Century Apprenticeship Jeffrey A. Cantor,2015-08-20**

Illustrates how a changing U.S. economy demands a revival of employer-based workforce training and suggests a new model of apprenticeship founded on the best of practices past and present, overseas and at home. Registered apprenticeship provides opportunities to learn and earn. Research data indicates that individuals who graduate with an apprenticeship certificate have higher starting salaries than those with only a two-year degree. This book examines the rebirth of an age-old concept in the 21st century—apprenticeship. Serving as a call to action with a positive message for parents, entrepreneurs, educators, legislators, and political leaders, the book analyzes the condition of the U.S. and world economies from an employment and occupational perspective and describes how apprenticeship training can significantly bolster the economic recovery. Author Jeffrey A. Cantor, PhD, explains how modern-day apprenticeships can serve business owners in developing workers, parents in guiding their children into productive careers and professions, community leaders in instituting workforce development policies that support

both entrepreneurs and citizens, and college educators in working more effectively with business and industry within our communities. Readers will learn how apprenticeship can provide young people with invaluable opportunities to train for desirable, high-tech, and high-wage jobs, without their having to give up on a college education—it is possible to have both.

**Scaling New Heights** Sabyasachi Mitra, Rana Hasan, Manoj

Sharma,Hoe Yun Jeong,Manish Sharma,Arindam Guha,2016-05-01

Spanning more than 800 kilometers of India's eastern coastline, the Vizag–Chennai Industrial Corridor (VCIC) is part of the country's East Coast Economic Corridor. This initiative can help unify the large domestic market as well as integrate the Indian economy with the dynamic global value chains of Asia and drive India's Act East policy. VCIC will also be an important component of the government's Make in India campaign to attract foreign investors and encourage the creation of manufacturing hubs in the country. The new industrial corridor is expected to spur growth by augmenting existing investment in world-class transport networks, infrastructure, and industrial and urban clusters that are supported by a robust institutional framework and a competitive business environment. By linking areas that are lagging in development with dynamic industrial and urban clusters, VCIC will create employment opportunities that alleviate poverty and reduce inequality. As a coastal corridor, VCIC can provide multiple access points to international gateways. Greater connectivity and economic integration between South Asia and the rest of Asia is likely to contribute significantly to development and foster regional cooperation as well.

## **Latin America on Its Path Into the Digital Age Martin R.**

Hilbert,2001 This publication investigates the impact of modern information and communication technologies (ICTs) on Latin America. *Information and Communication Technologies for Women's Socioeconomic Empowerment* Samia Melhem,Claudia Morrell,Nidhi Tandon,2009-10-02 This paper reviews how women in the developing world access and use information and communication technology (ICT). It examines the discourse and controversies surrounding the digital gender divide, including links to poverty and illiteracy. Major themes concerning women and ICTs are explored, such as women in the ICT workforce, how girls and women relate differently to ICT, and opportunities and barriers for women in science and technology in general. Current research relating to gender and ICT is often country-specific and is more prevalent in developed countries than in developing countries. This paper suggests where additional research is needed on barriers to women s entry and access to ICT. The overall objective of this

paper is to influence policy dialogue around women and ICT for development by raising awareness of the digital gender divide. Economic opportunity for women in ICT will not be realized until policies address gender considerations and ensure that ICT investment contributes to more sustainable and equitable development.
