Courbet and the Modern Landscape, 2006 With its fittingly dramatic design, Courbet and the Modern Landscape accompanies the first major museum exhibition specifically to address Gustave Courbet's extraordinary achievement in landscape painting. Many of these carefully selected works produced from 1855 to 1876--gathered from Asia, Europe, and North America--will be new to readers. The catalogue--which accompanies an exhibition at the Getty Museum to be held from February 21 to May 14, 2006--highlights the artist's expressive responses to the natural environment. Essays by the curators examine Courbet's distinctly modern practice of landscape painting. Mary Morton's essay situates his landscapes in relation to his work in other genres, his critical reputation, and his role in establishing a new pictorial language for landscape painting. Charlotte Eyerman's essay investigates how later generations of nineteenth- and twentieth-century artists responded to Courbet's example. The catalogue also includes an essay by Dominique de Font-Reaulx, curator of photographs at the Musee d'Orsay, on the relationship between Courbet's work and landscape photography of the 1850s and 1860s. Greening Our Built World Greg Kats, 2013-03-05 “Green” buildings—buildings that use fewer resources to build and to sustain—are commonly thought to be too expensive to attract builders and buyers. But are they? The answer to this question has enormous consequences, since residential and commercial buildings together account for nearly 50% of American energy consumption—including at least 75% of electricity usage—according to recent government statistics. This eye-opening book reports the results of a large-scale study based on extensive financial and technical analyses of more than 150 green buildings in the U.S. and ten other countries. It provides detailed findings on the costs and financial benefits of building green. According to the study, green buildings cost roughly 2% more to build than conventional buildings—far less than previously assumed—and provide a wide range of financial, health and social benefits. In addition, green buildings reduce energy use by an average of 33%, resulting in significant cost savings. Greening Our Built World also evaluates the cost effectiveness of “green community development” and presents the results of the first-ever survey of green buildings constructed by faith-based organizations. Throughout the book, leading practitioners in green design—including architects, developers, and property owners—share their

own experiences in building green. A compelling combination of rock-solid facts and specific examples, this book proves that green design is both cost-effective and earth-friendly.

Say We Are Nations Daniel M. Cobb, 2015-09-24 In this wide-ranging and carefully curated anthology, Daniel M. Cobb presents the words of Indigenous people who have shaped Native American rights movements from the late nineteenth century through the present day. Presenting essays, letters, interviews, speeches, government documents, and other testimony, Cobb shows how tribal leaders, intellectuals, and activists deployed a variety of protest methods over more than a century to demand Indigenous sovereignty. As these documents show, Native peoples have adopted a wide range of strategies in this struggle, invoking American and global democratic ideas about citizenship, freedom, justice, consent of the governed, representation, and personal and civil liberties while investing them with indigenized meanings. The more than fifty documents gathered here are organized chronologically and thematically for ease in classroom and research use. They address the aspirations of Indigenous nations and individuals within Canada, Hawaii, and Alaska as well as the continental United States, placing their activism in both national and international contexts. The collection's topical breadth, analytical framework, and emphasis on unpublished materials offer students and scholars new sources with which to engage and explore American Indian thought and political action.

Afterlives of Indigenous Archives Ivy Schweitzer, Gordon Henry, 2019 Afterlives of Indigenous Archives offers a compelling critique of Western archives and their use in the development of digital

humanities. The essays collected here present the work of an international and interdisciplinary group of indigenous scholars; researchers in the field of indigenous studies and early American studies; and librarians, curators, activists, and storytellers. The contributors examine various digital projects and outline their relevance to the lives and interests of tribal people and communities, along with the transformative power that access to online materials affords. The authors aim to empower native people to re-envision the Western archive as a site of community-based practices for cultural preservation, one that can offer indigenous perspectives and new technological applications for the imaginative reconstruction of the tribal past, the repatriation of the tribal memories, and a powerful vision for an indigenous future. This important and timely collection will appeal to archivists and indigenous studies scholars alike.
