Wanderlust Rebecca Solnit,2001-06-01 A passionate, thought-provoking exploration of walking as a political and cultural activity, from the author of Orwell's *Roses Drawing* together many histories--of anatomical evolution and city design, of treadmills and labyrinths, of walking clubs and sexual mores--Rebecca Solnit creates a fascinating portrait of the range of possibilities presented by walking. Arguing that the history of walking includes walking for pleasure as well as for political, aesthetic, and social meaning, Solnit focuses on the walkers whose everyday and extreme acts have shaped our culture, from philosophers to poets to mountaineers. She profiles some of the most significant walkers in history and fiction--from Wordsworth to Gary Snyder, from Jane Austen's Elizabeth Bennet to Andre Breton's Nadja--finding a profound relationship between walking and thinking and walking and culture. Solnit argues for the necessity of preserving the time and space in which to walk in our ever more car-dependent and accelerated world.

Straight Line Crazy DAVID. HARE,2022-03-17 For forty uninterrupted years, Robert Moses was the most powerful man in New York. Though never elected to office, he manipulated those who were through a mix of guile, charm and intimidation. Motivated at first by a determination to improve the lives of New York City's workers, he created parks, bridges and 627 miles of expressway to connect the people to the great outdoors. But in the 1950s, groups of citizens began to organize against his schemes and against the motor car, campaigning for a very different idea of what a city should be. David Hare's blazing account of a man - played by Ralph Fiennes - whose iron will exposed the weakness of democracy in the face of charismatic conviction, premieres at the Bridge Theatre, London, in March 2022.

Optics in Our Time Mohammad D. Al-Amri, Mohamed El-Gomati, M. Suhail Zubairy, 2016-12-12 Light and light based technologies have played an important role in transforming our lives via scientific contributions spanned over thousands of years. In this book we present a vast collection of articles on various aspects of light and its applications in the contemporary world at a popular or semi-popular level. These articles are written by the world authorities in their respective fields. This is therefore a rare volume where the world experts have come together to present the developments in this most important field of science in an almost pedagogical manner. This volume covers five aspects related to light. The first presents two articles, one on the history of the nature of light, and the other on the scientific achievements of Ibn-Haitham (Alhazen), who is broadly considered the father of modern optics. These are then followed by an article on ultrafast phenomena and the invisible world. The third part includes papers on specific sources of light, the discoveries of which have revolutionized optical technologies in our lifetime. They discuss the nature and the characteristics of lasers, Solid-state lighting based on the Light Emitting Diode (LED) technology, and finally modern electron optics and its relationship to the Muslim golden age in science. The book's fourth part discusses various applications of optics and light in today's world, including biophotonics, art, optical communication, nanotechnology, the eye as an optical instrument, remote sensing, and optics in medicine. In turn, the last part focuses on quantum optics, a modern field that grew out of the interaction of light and matter. Topics addressed include atom optics, slow, stored and stationary light, optical tests of the foundation of physics, quantum mechanical properties of light fields carrying orbital angular momentum, quantum communication, and Wave-Particle dualism in action.

Heritable Human Genome Editing The Royal Society, National Academy of Sciences, National Academy of Medicine, International Commission on the

Clinical Use of Human Germline Genome Editing,2021-01-16 Heritable human genome editing - making changes to the genetic material of eggs, sperm, or any cells that lead to their development, including the cells of early embryos, and establishing a pregnancy - raises not only scientific and medical considerations but also a host of ethical, moral, and societal issues. Human embryos whose genomes have been edited should not be used to create a pregnancy until it is established that precise genomic changes can be made reliably and without introducing undesired changes - criteria that have not yet been met, says Heritable Human Genome Editing. From an international commission of the U.S. National Academy of Medicine, U.S. National Academy of Sciences, and the U.K.'s Royal Society, the report considers potential benefits, harms, and uncertainties associated with genome editing technologies and defines a translational pathway from rigorous preclinical research to initial clinical uses, should a country decide to permit such uses. The report specifies stringent preclinical and clinical requirements for establishing safety and efficacy, and for undertaking long-term monitoring of outcomes. Extensive national and international dialogue is needed before any country decides whether to permit clinical use of this technology, according to the report, which identifies essential elements of national and international scientific governance and oversight.

However, when a young woman—frightened and fleeing from unknown danger, with no idea of the hidden powers she possesses—arrives in the city, Shadowbane uncovers a secret plot, previously shielded even from his watchful eyes. When his friends start dying and the girl is kidnapped, Shadowbane must choose between the darkness and the light in his heart: to avenge the deaths of his friends, or to let the villain live to face—and possibly escape—justice. *Downshadow* is the third book in a series of standalone novels set in Waterdeep and the first book in the Shadowbane series.

L'Unité D'habitation David Jenkins,1993-01 The Unite d'Habitation at Marseilles is a key building of the twentieth century, and a seminal work in Le Corbusier's oeuvre. A precursor of buildings in Nantes, Berlin, Briey-en-Foret and Firminy, it established, in built form, Le Corbusier's ideas of public housing that had existed only on paper for more than twenty-five years. David Jenkins argues that the Marseilles Unite stands out as a powerful and convincing testament of Le Corbusier's fundamental humanism and his faith in the principles of the Ville Radieuse and the Brutalist medium of rough cast concrete which in other, less able hands, have since been called into question.

Almost immediately, Trenton and Kallista are caught up in a civil war between a clan of scavengers called Whipjacks and the Order of the Beast, people who believe that dragons are immortal and divine. Stranded in a new city, the two friends meet Plucky, a Whipjack girl with mechanical legs, and Ander, a young member of the Order who claims humans are able to communicate with dragons. Screen Genealogies Craig Buckley,Rudiger Campe,Francesco Casetti,2019-11-15 Against the grain of the growing literature on screens, *Screen Genealogies* argues that the present excess of screens cannot be understood as an expansion and multiplication of the movie screen nor of the video display. Rather, screens continually exceed the optical histories in which they are most commonly inscribed. As contemporary screens become increasingly decomposed into a distributed field of technologically interconnected surfaces and interfaces, we more readily recognize the deeper spatial and environmental interventions that have long been a property of screens. For most of its history, a screen was a filter, a divide, a shelter, or a camouflage. A genealogy stressing transformation and descent rather than origins and roots emphasizes a deeper set of intersecting and competing definitions of the screen, enabling new thinking about what the screen might yet become.
