Screening Room Alan Lightman, 2015-02-10 A WASHINGTON POST NOTABLE BOOK OF THE YEAR • Alan Lightman's grandfather M.A. was the family's undisputed patriarch. It was his movie theater empire that catapulted the Lightmans, a Hungarian Jewish immigrant family, to prominence in the South; his triumphs that would both galvanize and paralyze his descendants. In this evocative personal history, the author chronicles his return to Memphis and the stifling home he had been so eager to flee forty years earlier. As aging uncles and aunts retell old stories, Alan finds himself reconsidering long-held beliefs about his larger-than-life grandfather and his quiet, inscrutable father. The result is an unforgettable family saga set against the pulsing backdrop of Memphis—its country clubs and juke joints, its rhythm and blues, its segregated movie theaters, its barbecue and pecan pie—including encounters with Elvis, Martin Luther King Jr., and E. H. "Boss" Crump. Both intensely personal and quintessentially American, Screening Room finely explores the tricks of light that can make—and unmake—a man and his myth. (With black-and-white illustrations throughout.)

Probable Impossibilities Alan Lightman, 2022-04-19 The acclaimed author of Einstein's Dreams tackles big questions like the origin of the universe and the nature of consciousness ... in an entertaining and easily digestible way" (Wall Street Journal) with a collection of meditative essays on the possibilities—and impossibilities—of nothingness and infinity, and how our

place in the cosmos falls somewhere in between. Can space be divided into smaller and smaller units, ad infinitum? Does space extend to larger and larger regions, on and on to infinity? Is consciousness reducible to the material brain and its neurons? What was the origin of life, and can biologists create life from scratch in the lab? Physicist and novelist Alan Lightman, whom The Washington Post has called “the poet laureate of science writers,” explores these questions and more—from the anatomy of a smile to the capriciousness of memory to the specialness of life in the universe to what came before the Big Bang. *Probable Impossibilities* is a deeply engaged consideration of what we know of the universe, of life and the mind, and of things vastly larger and smaller than ourselves.

Einstein's Dreams Alan Lightman, 2011-03-02 NATIONAL BESTSELLER • A modern classic explores the connections between science and art, the process of creativity, and ultimately the fragility of human existence. “A magical, metaphysical realm ... Captivating, enchanting, delightful.” —The New York Times *Einstein's Dreams* is a fictional collage of stories dreamed by Albert Einstein in 1905, about time, relativity and physics. As the defiant but sensitive young genius is creating his theory of relativity, a new conception of time, he imagines many possible worlds. In one, time is circular, so that people are fated to repeat triumphs and failures over and over. In another, there is a place where time stands still, visited by lovers and parents clinging to their children. In another, time is a nightingale, sometimes

trapped by a bell jar. Now translated into thirty languages, Einstein's Dreams has inspired playwrights, dancers, musicians, and painters all over the world. In poetic vignettes, it explores the connections between science and art, the process of creativity, and ultimately the fragility of human existence.

Three Flames Alan Lightman, 2020-09-15 "Lightman's best book since Einstein's Dreams . . . a piercing story of social dissolution in damaged Cambodia . . . an important story of global women's rights." —Annie Proulx The stories of one Cambodian family are intricately braided together in Alan Lightman's first work of fiction in seven years. Three Flames portrays the struggles of a Cambodian farming family against the extreme patriarchal attitudes of their society and a cruel and dictatorial father, set in a rural community that is slowly being exposed to the modern world and its values. Ryna is a mother fighting against memories of her father's death at the hands of the Khmer Rouge and her powerful desire for revenge. Daughter Nita is married off at sixteen to a wandering husband, while her sister Thida is sent to the city to work in the factories to settle their father's gambling debt. Kamal, the only son, dreams of marrying the most beautiful girl in the village and escaping the life of a farmer. Yet it will be up to Sreypov, the youngest, to bravely challenge her father and strive for a better future. Three Flames is a vivid story of one family's yearning for freedom and of a young girl's courage to face down tradition. "Lyrical and poignant, Three

Flames weaves the stories of three generations of a poor, Cambodian farming family as they struggle to survive and hold on to their humanity . . . Beautifully written and told with great compassion, Alan Lightman's novel gives readers a family that is rich in stories, history, and heart, proving in the end that love shines even in the midst of great darkness." –Loung Ung, author of *First They Killed My Father*

GOOD BENITO Alan Lightman, 2011-03-23 From the author of the best-selling *Einstein's Dreams* comes a wonderfully original, deeply moving, and wryly funny novel about the clash between the absolutes of science and the vagaries of human experience. Bennett always knew he would live a life of science. From the homemade rockets and experiments of his childhood to the complex equations he solved as a professor of physics, his vision has transformed the uncertainty and frailty of life into an order and beauty that he inhabits with deep satisfaction. But his vision betrays him, revealing a profound incompleteness, an inadequacy to confront the contradictions his life: the black maid who raises him and loves him but cannot welcome him into her own house, the mentally absent father who wishes he'd died a hero in World War II, the self-destructive wife who invites Bennett's cruelty. As Bennett struggles between reason and intuition, he slowly learns to allow the imperfections of daily life—the chaos he has worked so hard to control—to broaden his understanding of the world and his place in it. Written with lyrical sparseness, hilarity mixed with sadness, the story of Bennett's

struggle becomes both a beautifully rendered portrait of the emotional life of a scientist and a resonant tale of the disillusionment that haunts us all.

Ada and the Galaxies Alan Lightman, Olga Pastuchiv, 2021-09-07 Stargazers rejoice! In his first book for children, renowned physicist Alan Lightman and collaborators, with help from the Hubble telescope, light up the night sky. New York Times best-selling author Alan Lightman, in collaboration with Olga Pastuchiv, brings galaxies close in a stunning picture-book tribute to the interconnectedness of the natural world. Layering photographs taken from the Hubble telescope into charming and expressive art, illustrator Susanna Chapman zooms in on one child's experiences: Ada knows that the best place for star-gazing is on the island in Maine where she vacations with her grandparents. By day, she tracks osprey in the trees, paddles a kayak, and hunts for shells. But she's most in her element when the sun goes down and the stars blink to life. Will the fog this year foil her plans, or will her grandfather find a way to shine a spotlight on the vast puzzle of the universe . . . until the weather turns?

The Diagnosis Alan Lightman, 2001-03-13 From the bestselling author of Einstein's Dreams comes this harrowing tale of one man's struggle to cope in a wired world, even as his own biological wiring short-circuits. As Boston's Red Line shuttles Bill Chalmers to work one summer morning, something extraordinary happens. Suddenly, he can't remember which stop is his, where he works, or even who he is. The only thing he can remember is his corporate

motto: the maximum information in the minimum time. Bill's memory returns, but a strange numbness afflicts him. As he attempts to find a diagnosis for his deteriorating illness, he descends into a nightmarish tangle of inconclusive results, his company's manic frenzy, and his family's disbelief. Ultimately, Bill discovers that he is fighting not just for his body but also for his soul.

Searching for Stars on an Island in Maine Alan Lightman, 2018-03-27 From the bestselling author of *Einstein's Dreams*—"an elegant and moving paean to our spiritual quest for meaning in an age of science (The New York Times Book Review). As a physicist, Alan Lightman has always held a scientific view of the world. But one summer evening, while looking at the stars from a small boat at sea, Lightman was overcome by the overwhelming sensation that he was merging with something larger than himself—an eternal unity, something absolute and immaterial. The result is an inspired, lyrical meditation from the acclaimed author of *Einstein's Dreams* that explores these seemingly contradictory impulses. Lightman draws on sources ranging from Saint Augustine's conception of absolute truth to Einstein's theory of relativity, and gives us a profound inquiry into the human desire for truth and meaning, and a journey along the different paths of religion and science that become part of that quest. This small but provocative book explores the tension between our yearning for certainty and permanence versus the modern scientific view that all things in the physical world are uncertain and

impermanent.

In Praise of Wasting Time Alan Lightman, 2018-05-15 In this timely and essential book that offers a fresh take on the qualms of modern day life, Professor Alan Lightman investigates the creativity born from allowing our minds to freely roam, without attempting to accomplish anything and without any assigned tasks. We are all worried about wasting time. Especially in the West, we have created a frenzied lifestyle in which the twenty-four hours of each day are carved up, dissected, and reduced down to ten minute units of efficiency. We take our iPhones and laptops with us on vacation. We check email at restaurants or our brokerage accounts while walking in the park. When the school day ends, our children are overloaded with “extras.” Our university curricula are so crammed our young people don’t have time to reflect on the material they are supposed to be learning. Yet in the face of our time-driven existence, a great deal of evidence suggests there is great value in “wasting time,” of letting the mind lie fallow for some periods, of letting minutes and even hours go by without scheduled activities or intended tasks. Gustav Mahler routinely took three or four-hour walks after lunch, stopping to jot down ideas in his notebook. Carl Jung did his most creative thinking and writing when he visited his country house. In his 1949 autobiography, Albert Einstein described how his thinking involved letting his mind roam over many possibilities and making connections between concepts that were previously unconnected. With *In Praise of Wasting Time*, Professor

Alan Lightman documents the rush and heave of the modern world, suggests the technological and cultural origins of our time-driven lives, and examines the many values of “wasting time”—for replenishing the mind, for creative thought, and for finding and solidifying the inner self. Break free from the idea that we must not waste a single second, and discover how sometimes the best thing to do is to do nothing at all.

Mr g Alan Lightman, 2012-10-30 Alan Lightman, the internationally bestselling author of *Einstein's Dreams*, presents *Mr g*, a celebration of the highs and lows of existence, on the grandest possible scale: the story of Creation, as told by God. Once before time existed, *Mr g* woke up from a nap and decided to create the universe. In the shimmering Void, where he lives with his Aunt Penelope and Uncle Deva, he creates time, space, and matter. Soon follow stars, planets, animate matter, consciousness, and intelligent beings with moral dilemmas. But the creation of space and time has unintended consequences, including the arrival of Belhor, a clever and devious rival. Belhor delights in needling *Mr g*, demanding explanations for the inexplicable, offering his own opinions on the fledgling universes, and maintaining the necessity of evil. As *Mr g*'s favorite universe grows, he discovers how an act of creation can change everything in the world—including the creator himself.

The Discoveries Alan Lightman, 2010-10-22 An extraordinarily accessible, illuminating chronicle of the great moments of scientific discovery in the 20th century, and an exploration into the minds of the remarkable men and women behind them. We know and read the literary masterpieces; how many of us have had the opportunity not only to read but understand the masterpieces of science that describe the very moment of discovery? The last century has seen an explosion of creativity and insight that led to breakthroughs in every field of science: from the theory of relativity to the first quantum model of the atom to the mapping of the structure of DNA, these discoveries profoundly changed how we understand the world and our place in it. Alan Lightman tells

the stories of two dozen breakthroughs made by such brilliant scientists as Einstein, Bohr, McClintock and Pauling, among others, drawing on his unique background as a scientist and novelist to reveal the process of scientific discovery at its greatest. He outlines the intellectual and emotional landscape of each discovery, portrays the personalities and human drama of the scientists involved, and explains the significance and impact of the work. Finally, he gives an unprecedented and exhilarating guided tour through each of the original papers.

The Accidental Universe Alan Lightman, 2014-10-07 With passion and curiosity, Alan Lightman explores the emotional and philosophical questions raised by recent discoveries in science. He looks at the dialogue between science and religion; the conflict between our human desire for permanence and the impermanence of nature; the possibility that our universe is simply an accident; the manner in which modern technology has separated us from direct experience of the world; and our resistance to the view that our bodies and minds can be explained by scientific logic and laws. Behind all of these considerations is the suggestion--at once haunting and exhilarating--that what we see and understand of the world is only a tiny piece of the extraordinary, perhaps unfathomable whole.

A Sense of the Mysterious Alan Lightman, 2006-01-03 From the bestselling author of *Einstein's Dreams* comes this lyrical and insightful collection of science writing that delves into the mysteries of the scientific process--physics, astronomy, mathematics--and exposes its beauty and intrigue. In these brilliant essays, Lightman explores the emotional life of science, the power of imagination, the creative moment, and the alternate ways in which scientists and humanists think about the world. Along the way, he provides in-depth portraits of some of the great geniuses of our time, including Albert Einstein, Richard Feynman, Edward Teller, and astronomer Vera Rubin.

Thoughtful, beautifully written, and wonderfully original, *A Sense of the Mysterious* confirms Alan Lightman's unique position at the crossroads of science and art.

Ancient Light Alan P. Lightman, 1991 Tells the story of cosmology, including its history, the theories and the evidence, the new discoveries, the outstanding questions and controversies.

Dance for Two Alan Lightman, 1996-03-26 For the last twenty years, Alan Lightman has been writing essays that display his genius for bringing literary and scientific concerns into harmony. *Dance for Two* gathers the best of Lightman's work. Here are pieces that touch on both the ethereal and the corporeal; the dependence of a ballerina on the laws of physics, the choice of every scientist makes between tinkering and theorizing, the unscientific nature of discovery, the impulse behind an unprompted smile. *Dance for Two* is an intimate and fascinating look into the creative compulsions shared by the artist and the scientist.

Song of Two Worlds Alan Lightman, 2010-06-15 In Alan Lightman's new book, a verse narrative, we meet a man who has lost his faith in all things following a mysterious personal tragedy. After decades of living hung like a dried fly, emptied and haunted by his past, the narrator awakens one morning revitalized and begins a Dante-like journey to find something to believe in, first turning to t

Ghost Alan Lightman, 2007-10-23 A stunning novel about an ordinary man's

encounter with the extraordinary, from the bestselling author of Einstein's Dreams David Kurzweil, a quiet man with modest ambitions, was taking a break at his new job, when he saw something out of the corner of his eye. Something no science could explain. Suddenly David's life is changed, and he soon finds himself in the middle of a wild public controversy over the existence of the supernatural. As David searches for an explanation, we embark on a provocative exploration of the delicate divide between the physical and the spiritual, between science and religion as only Alan Lightman could provide. Combining a beautiful narrative with provocative ideas, Ghost investigates timeless questions that continue to challenge the truth as we know it.

Reunion Alan Lightman, 2004-11-09 Charles, a once-promising poet, is a professor at a minor liberal arts college, admiring of passion but without passion himself. Now living a desperately comfortable existence, he decides to return to his thirtieth college reunion. While there, he relives an intense love affair he had with a beautiful ballerina that forever changed his life. At times shocked, admiring, and furious with his younger self, Charles remembers contradictory versions of events, until reality and identity dissolve into a haze of illusion. *Reunion* explores the pain of self-examination, the clay-like nature of memory, and the fatal power of first love.
