**Perennial Seller** Ryan Holiday, 2017-07-18 The book that Inc. says every entrepreneur should read and an FT Book of the Month selection... How did the movie The Shawshank Redemption fail at the box office but go on to gross more than \$100 million as a cult classic? How did The 48 Laws of Power miss the bestseller lists for more than a decade and still sell more than a million copies? How is Iron Maiden still filling stadiums worldwide without radio or TV exposure forty years after the band was founded? Bestselling author and marketer Ryan Holiday calls such works and artists perennial sellers. How do they endure and thrive while most books, movies, songs, video games, and pieces of art disappear quickly after initial success? How can we create and market creative works that achieve longevity? Holiday explores this mystery by drawing on his extensive experience working with businesses and creators such as Google, American Apparel, and the author John Grisham, as well as his interviews with the minds behind some of the greatest perennial sellers of our time. His fascinating examples include: • Rick Rubin, producer for Adele, Jay-Z, and the Red Hot Chili Peppers, who teaches his artists to push past short-term thinking and root their work in long-term inspiration. • Tim Ferriss, whose books have sold millions of copies, in part because he rigorously tests every element of his work to see what generates the strongest response. • Seinfeld, which managed to capture both the essence of the nineties and timeless themes to become a modern classic. • Harper Lee, who transformed a muddled manuscript into To Kill a Mockingbird with the help of the right editor and feedback. • Winston Churchill, Stefan Zweig, and Lady Gaga, who each learned the essential tenets of building a platform of loyal, dedicated supporters. Holiday reveals that the key to success for many perennial sellers is that their creators don't distinguish between the making and the marketing. The product's purpose and audience are in the creator's mind from day one. By thinking holistically about the relationship between their audience and their work, creators of all kinds improve

the chances that their offerings will stand the test of time.

**Breakcore** Andrew Whelan,2009-05-27 Peer-to-peer music exchange, sampling, and digital distribution have garnered much attention in recent years, notably in debates about authorship, intellectual property, media control, and 'Web 2'. However, empirical scholarship on how these technologies are used creatively by musicians and fans is still sparse. In this interdisciplinary ethnography of 'bedroom producer' culture, Andrew Whelan examines interaction and exchange within a specific online milieu: peer-to-peer chatrooms dedicated to electronic music, focusing on a genre known as 'breakcore'. The author draws on semantic anthropology, ethnomethodology, sociolinguistics, and critical musicology to explore the activity afforded by this controversial and criminalised environment. Through in-depth analysis of often ritually vituperative text-based interaction, discussions of music, and the samples used in that music, Whelan describes the cultural politics and aesthetics of bedroom producer identity, highlighting the roles gender and ethnicity play in the constitution of subcultural authenticity. Empirically driven throughout, this book also engages with a spectrum of social theory; in doing so, it highlights the intersections between gender, interaction, technology and music. This book will prove valuable for students and scholars with interests in gender and language use, computer-mediated communication, online subcultures and virtual community, and the evolution, production and distribution of electronic music.

**Hacking the Academy** Daniel J. Cohen, Joseph Thomas Scheinfeldt, 2013-05-13 On May 21, 2010, Daniel J. Cohen and Tom Scheinfeldt posted the following provocative questions online: “Can an algorithm edit a journal? Can a library exist without books? Can students build and manage their own learning management platforms? Can a conference be held without a program? Can Twitter replace a scholarly society?” As recently as the mid-2000s, questions like these would have been unthinkable. But today serious scholars are asking whether the institutions of the academy as they have existed for decades, even centuries, aren’t becoming obsolete. Every aspect of scholarly infrastructure is being questioned, and even more importantly, being hacked. Sympathetic scholars of traditionally disparate disciplines are canceling their association memberships and building their own networks on Facebook and Twitter. Journals are being compiled automatically from self-published blog posts. Newly minted PhDs are forgoing the tenure track for alternative academic careers that blur the lines between research, teaching, and service. Graduate students are looking beyond the categories of the traditional CV and building expansive professional identities and popular followings through social media. Educational technologists are “punking” established technology vendors by rolling out their own open source infrastructure. Here, in *Hacking the Academy*, Daniel J. Cohen and Tom Scheinfeldt have gathered a sampling of the answers to their initial questions from scores of engaged academics who care deeply about higher education. These are the responses from a wide array of scholars, presenting their thoughts and approaches with a vibrant intensity, as they explore and contribute to ongoing efforts to rebuild scholarly infrastructure for a new millennium.

**The Social Media Reader** Michael Mandiberg, 2012-03 The first collection to address the collective transformation happening in response to the rise of social media With the rise of web 2.0 and social media platforms taking over vast tracts of territory on the internet, the media landscape has shifted

drastically in the past 20 years, transforming previously stable relationships between media creators and consumers. The Social Media Reader is the first collection to address the collective transformation with pieces on social media, peer production, copyright politics, and other aspects of contemporary internet culture from all the major thinkers in the field. Culling a broad range and incorporating different styles of scholarship from foundational pieces and published articles to unpublished pieces, journalistic accounts, personal narratives from blogs, and whitepapers, The Social Media Reader promises to be an essential text, with contributions from Lawrence Lessig, Henry Jenkins, Clay Shirky, Tim O'Reilly, Chris Anderson, Yochai Benkler, danah boyd, and Fred von Loehmann, to name a few. It covers a wide-ranging topical terrain, much like the internet itself, with particular emphasis on collaboration and sharing, the politics of social media and social networking, Free Culture and copyright politics, and labor and ownership. Theorizing new models of collaboration, identity, commerce, copyright, ownership, and labor, these essays outline possibilities for cultural democracy that arise when the formerly passive audience becomes active cultural creators, while warning of the dystopian potential of new forms of surveillance and control.
