The Book Around Immanuel Andrew H. Bartelt,1996 In the process of examining rhetorical style in Isaiah 2-12, Professor Bartelt provides a convincing reading of the text that also serves as a model for the study of the prophetic writings. He recognizes both parallelism and meter as complementary factors to consider in interpreting the text. Applying the principles both of poetic (based on the work of D. N. Freedman) and rhetorical (based on the work of J. Muilenburg) analysis, Bartelt examines in detail the style and structure of Isaiah 2-12. The careful craftsmanship evident in the section is demonstrated by Bartelt's careful examination of all levels of the composition, from the line to the verse to the larger literary units. He shows that the Book of Immanuel lies at the thematic and statistical center of Isaiah 2-12.

Property, Piracy and Punishment: Hugo Grotius on War and Booty in De iure praedae ,2009-03-25 Sixteen essays discuss De iure praedae – Hugo Grotius's 1604-1605 commentary on booty –, its sources, circumstances and consequences, and explore how Grotius the humanist, the theologian, the jurist and the politician concur in this his first exercise in natural law and rights.

Learning Python for Forensics Preston Miller,Chapin Bryce,2016-05-31 Learn the art of designing, developing, and deploying innovative forensic solutions through Python About This Book This practical guide will help you solve forensic dilemmas through the development of Python scripts Analyze Python scripts to extract metadata and investigate forensic artifacts Master the skills of parsing complex data structures by taking advantage of Python libraries Who This Book Is For If you are a forensics student, hobbyist, or professional that is seeking to increase your understanding in forensics through the use of a programming language, then this book is for you. You are not required to have previous experience in programming to learn and master the content within this book. This material, created by forensic professionals, was written with a unique perspective and understanding of examiners who wish to learn programming What You Will Learn Discover how to perform Python script development Update yourself by learning the best practices in forensic programming Build scripts through an iterative design Explore the rapid development of specialized scripts Understand how to leverage forensic libraries developed by the community Design flexibly to accommodate present and future hurdles Conduct effective and efficient investigations through programmatic pre-analysis Discover how to transform raw data into customized reports and visualizations In Detail This book will illustrate how and why you should learn Python to strengthen your analysis skills and efficiency as you creatively solve real-world problems through instruction-based tutorials. The tutorials use an interactive design, giving you experience of the development process so you gain a better understanding of what it means to be a forensic developer. Each chapter walks you through a forensic artifact and one or more methods to analyze the evidence. It also provides reasons why one method may be advantageous over another. We cover common digital forensics and incident response scenarios, with scripts that can be used to tackle case work in the field. Using built-in and community-sourced libraries, you will improve your problem solving skills with the addition of the Python scripting language. In addition, we provide resources for further exploration of each script so you can understand what further purposes Python can serve. With this knowledge, you can rapidly develop and deploy solutions to identify critical information and fine-tune your skill set as an examiner. Style and approach The book begins by instructing you on the basics of Python, followed by chapters that include scripts targeted for forensic casework. Each script is described step by step at an introductory level, providing gradual growth to demonstrate the available functionalities of Python.

**Black Cat Weekly #103** O'Neil De Noux ,Shannon Taft ,Adrian Cole,Hal Charles ,James Holding ,George O. Smith,Arthur Leo Zagat ,J.J. Connington ,J.C. Stanley,Henry S. Whitehead,2023-08-20 Our 103rd issue is just one shy of our second anniversary issue, but we still have a whale of an issue for you. Regular readers will notice a new category ("Adventure") below, which will appear occasionally to fit stories I like that aren't necessarily mysteries, science fiction, or fantasy. (Well...this one may be fantasy, depending on how you feel about fish!) It's from a pulp magazine called Mammoth Adventure, a companion to Amazing Stories and Fantastic when they were published by Ziff-Davis. It's fun. Working our way through the table of contents, we have a pair of original mysteries by O'Neil De Noux and Shannon Taft, thanks to our hardworking Acquiring Editors, Michael Bracken and Barb Goffman. James Holding has a crime story, and Golden Age British mystery author J.J. Connington adds a terrific novel. For adventure (and nature) lovers, something's fishy in "Only a Sucker Bites," a whopper of a story about lake pike. On the fantasy end of things, we have a tale of astral projection from Adrian Cole, a vintage zombi (or jumbee) story by Henry S. Whitehead first published in Weird Tales, and a pair of vintage science fiction stories by Arthur Leo Zagat and George O. Smith. Here's the complete lineup: Mysteries / Suspense / Adventure: "A Dirty, Dimly Lit Place," by O'Neil De Noux [Michael Bracken Presents short story] "Too Many Suspects," by Hal Charles [Solve-It-Yourself Mystery] "The End of the Road," by Shannon Taft [Barb Goffman Presents short story] "Reason Enough," by James Holding [short story] Murder in the Maze, by J. J. Connington [novel] Adventure: "Only a Sucker Bites," by J. C. Stanley [short story] Science Fiction & Fantasy: "A Smell of Burning," by Adrian Cole [short story] "Jumbee," by Henry S. Whitehead [short story] "Lost in Time," by Arthur Leo Zagat [novella] Dynasty of the Lost, by George O. Smith [novel]

**Tropical Forest Census Plots** Richard Condit,2013-03-09 By way of a summary of all the data collected by the mapping teams, I will review what is entered on each of the data sheets. The map sheet was already described in some detail (Fig. 2.2.1A), and includes a circle or a point for the location of each tree and the tree's tag number (the last three or four digits) written next to it. The range of tag numbers used in the quadrat should be written at the top of the sheet. The main data sheet is where most other information about each individual is recorded (Fig. 2.2.1B). As for all sheets, the quadrat number, the first date a quadrat is censused, and the mappers' names are recorded at the top. For each plant, there are blanks for the following information: subquadrat number, tag number, species name, dbh, codes, and problems. Subquadrat number and tag number are straight forward. Size in millimeters is entered in the dbh column, except for multiple stemmed plants or big trees, which get a blank dbh on the main data sheet. Species identification will be handled by separate taxonomy teams (chapter 2.3), but mappers should enter a species name if they know it.
