**Prismatic Translation** Matthew Reynolds, 2019-12-30 Translation can be seen as producing a text in one language that will count as equivalent to a text in another. It can also be seen as a release of multiple signifying possibilities, an opening of the source text to Language in all its plurality. The first view is underpinned by the regime of European standard languages which can be lined up in bilingual dictionaries, by the technology of the printed book, and by the need for regulated communication in political, academic and legal contexts. The second view is most at home in multilingual cultures, in circumstances where language is not standardised (e.g., minority and dialectal communities, and oral cultures), in the fluidity of electronic text, and in literature. The first view sees translation as a channel; the second as a prism. This volume explores prismatic modes of translation in ancient Egypt, contemporary Taiwan, twentieth-century Hungary, early modern India, and elsewhere. It gives attention to experimental literary writing, to the politics of language, to the practices of scholarship, and to the multiplying possibilities created by digital media. It charts the recent growth of prismatic modes in anglophone literary translation and translational literature; and it offers a new theorisation of the phenomenon and its agonistic relation to the 'channel' view. Prismatic Translation is an essential intervention in a rapidly changing field.

**Training the Translator** Paul Kussmaul, 1995-01-01 This book begins by investigating, through the use of think-aloud protocols, the mental processes of students when they translate. The creative and successful processes observed can be used directly for teaching purposes, while the unsuccessful ones can serve to find out where remedial training is needed. The book then goes on to discuss methods for improving a translator's competence. The strategies offered are based on the pragmatic and semantic analysis of texts from a functional point of view, and they include such practical matters as the use of dictionaries and the evaluation of translations and error analysis. The book is intended for teachers in translator-training institutions, but it can also be used by students for self-training.

**Becoming a Translator** Douglas Robinson, 2012-10-12 Fusing theory with advice and information about the practicalities of translating, *Becoming a Translator* is the essential resource for novice and practicing translators. The book explains how the market works, helps translators learn how to translate faster and more accurately, as well as providing invaluable advice and tips about how to deal with potential problems, such as stress. The third edition has been revised and updated throughout, offering: extensive up-to-date information about new translation technologies discussions of the emerging sociological and activist turns in translation studies new exercises and examples updated further reading sections a website containing a teacher's guide, the chapter 'The Translator as Learner' and additional resources for translators Offering suggestions for discussion, activities, and hints for the teaching of translation, the third edition of *Becoming a Translator* remains invaluable for students and teachers of Translation Studies, as well as those working in the field of translation.

**The Art of Translating Prose** Burton Raffel, 1994-01-01 There has been very little linguistically sound discussion of the differences between poetry and prose, and virtually no discussion of any sort of the practical consequences of those differences for the translation of prose. *The Art of Translating Prose* presents for both the specialist and nonspecialist the core strategies employed by the author in translating a variety of important prose texts, and in the process delineates a coherent program or theory that can inform each act of translation. Burton Raffel considers and effectively illustrates the fundamental features of prose, those features that most clearly and idiomatically define an author's style. He addresses those features that must be attended closely and imaginatively as one moves them from the original-language work. Raffel's insistence on concentrating on the artistic viability of the translation continues themes he explored in other books, most notably *The Forked Tongue* and *The Art of Translating Poetry*. Raffel finds the most important determinant—for prose, though not for poetry—to be syntax, which he argues must be tracked if the translation is to reflect the original author's style in a meaningful way. Raffel ties together theory and practice to establish sound standards for the evaluation of prose translations, and he provides examples in considerations of versions of such books as *Madame Bovary*, *Germinal*, and *Death in Venice*.

**Literary Translation** Clifford E. Landers, 2001-01-01 In this book, both beginning and experienced translators will find pragmatic techniques for dealing with problems of literary translation, whatever the original language. Certain challenges and certain themes recur in translation, whatever the language pair. This guide proposes to help the translator navigate through them.

**The Fictions of Translation** Judith Woodsworth, 2018-02-15 In *The Fictions of Translation*, emerging and seasoned scholars from a range of cultures bring fresh perspectives to bear on the age-old practice of translation. The current movement of people, knowledge and goods around the world has made intercultural communication both prevalent and indispensable. Consequently, the translator has become a more prominent figure and translation an increasingly present theme in works of literature. Embedding translation in a fictional setting and considering its most extreme forms – pseudotranslation or self-translation, for example – are fruitful ways of conceptualizing the act of translating and extending the boundaries of translation studies. Taken together, the various translational fictions examined in this collection yield new insights into questions of displacement, migration and hybridity, all characteristic of the modern world. *The Fictions of Translation* will thus be of interest to practising translators, students and scholars of translation and literary studies, as well as a more general readership.

**Text Typology and Translation** Anna Trosborg, 1997-11-27 This book breaks new ground in translation theory and practice. The central question is: In

what ways are translations affected by text types? The two main areas of investigation are: A. What are the advantages of focusing on text types when trying to understand the process of translation? How do translators tackle different text types in their daily practice? B. To what extent and in what areas are text types identical across languages and cultures? What similarities and dissimilarities can be observed in text types of original and translated texts? Part I deals with methodological aspects and offers a typology of translations both as product and as process. Part II is devoted to domain-specific texts in a cross-cultural perspective, while Part III is concerned with terminology and lexicon as well as the constraints of mode and medium involving dubbing and subtitling as translation methods. Sonnets, sagas, fairy tales, novels and feature films, sermons, political speeches, international treaties, instruction leaflets, business letters, academic lectures, academic articles, medical research articles, technical brochures and legal documents are but some of the texts under investigation. In sum, this volume provides a theoretical overview of major problems and possibilities as well as investigations into a variety of text types with practical suggestions that deserve to be weighted by anyone considering the relation between text typology and translation. The volume is indispensable for the translator in his/her efforts to become a “competent text-aware professional”.

**Translation Universals** Anna Mauranen, Pekka Kuusimäki, 2004-01-01 Translation universals is one of the most intriguing and controversial topics in recent translation studies. Can we discover general laws of translation, independent of the particularities of individual translations? Research into this is new: serious empirical work only began in the late nineties. The present volume offers the state of the art on the issue. It includes theoretical discussion on alternative conceptualisations and new distinctions around the basic concepts. Several papers test hypotheses on universals in the light of recent work in different languages, and some suggest new ones emerging from empirical work over the last two to three years. The book contributes to the search for generalities in translation, the methodological solutions available, and presents emerging evidence on the kinds of regularities that large-scale research is bringing forth. On a more practical level, the applicability of the hypotheses and findings to translator education is, as always, a concern for translation studies.

*Fundamentals of Translation* Sonia Colina, 2015-04-02 Clear and concise, this textbook provides a non-technical introduction to the basic and central concepts of translation theory and practice, including translation briefs, parallel texts and textual functions, cohesion and coherence, and old and new information. Colina focuses on the key concepts that beginning students of translation, practising translators, language students and language professionals need to understand. Numerous exercises (discussion, group and individual) at the end of each chapter and 'Practice' activities throughout each chapter allow students to self-assess their practical understanding of chapter topics. In addition, examples, figures and text extracts from a wide variety of world languages contextualise chapter material and produce a lively and accessible narrative. Suitable for non-specialists with no prior experience of translation, it will also be of interest to practising translators, language students and language industry professionals who wish to gain a wider and up-to-date understanding of translation.

**Literary Translator Studies** Klaus Kaindl, Waltraud Kolb, Daniela Schlager, 2021-04-15 This volume extends and deepens our understanding of Translator Studies by charting new territory in terms of theory, methods and concepts. The focus is on literary translators, their roles, identities, and personalities. The book introduces pertinent translator-centered approaches in four sections: historical-biographical studies, social-scientific and process-oriented methods, and approaches that use paratexts or translations to study literary translators. Drawing on a variety of concepts, such as identity, role, self, posture, habitus, and voice, the various chapters showcase forgotten literary translators and shed new light on some well-known figures; they examine literary translators not as functioning units but as human beings in their uniqueness. Literary Translator Studies as a subdiscipline of Translation Studies demonstrates how exploring the cultural, social, psychological, and cognitive facets of translatorial subjects contributes to a holistic understanding of translation.

**The Translator as Writer** Susan Bassnett, Peter Bush, 2007-11-15 Over the last two decades, interest in translation around the world has increased beyond any predictions. International bestseller lists now contain large numbers of translated works, and writers from Latin America, Africa, India and China have joined the lists of eminent, bestselling European writers and those from the global English-speaking world. Despite this, translators tend to be invisible, as are the processes they follow and the strategies they employ when translating. The Translator as Writer bridges the divide between those who study translation and those who produce translations, through essays written by well-known translators talking about their own work as distinctive creative literary practice. The book emphasises this creativity, arguing that translators are effectively writers, or rewriters who produce works that can be read and enjoyed by an entirely new audience. The aim of the book is to give a proper prominence to the role of translators and in so doing to move attention back to the act of translating, away from more abstract speculation about what translation might involve.

**Fictional Translators** Rosemary Arrojo, 2017-08-14 Through close readings of select stories and novels by well-known writers from different literary traditions, Fictional Translators invites readers to rethink the main clichés associated with translations. Rosemary Arrojo shines a light on the transformative character of the translator's role and the relationships that can be established between originals and their reproductions, building her arguments on the basis of texts such as the following: Cortázar's Letter to a Young Lady in Paris Walsh's Footnote Wilde's The Picture of Dorian Gray

and Poe’s The Oval Portrait Borges’s Pierre Menard, Author of the Quixote, Funes, His Memory, and Death and the Compass Kafka’s The Burrow and Kosztolányi’s Kornél Esti Saramago’s The History of the Siege of Lisbon and Babel’s Guy de Maupassant Scliar’s Footnotes and Calvino’s If on a Winter’s Night a Traveler Cervantes’s Don Quixote Fictional Translators provides stimulating material for reflection not only on the processes associated with translation as an activity that inevitably transforms meaning, but, also, on the common prejudices that have underestimated its productive role in the shaping of identities. This book is key reading for students and researchers of literary translation, comparative literature and translation theory.

*Corpus Use and Translating* Allison Beeby,Patricia Rodríguez Inés,Pilar Sánchez-Gijón,2009 Professional translators are increasingly dependent on electronic resources, and trainee translators need to develop skills that allow them to make the best use of these resources. The aim of this book is to show how CULT (Corpus Use for Learning to Translate) methodologies can be used to prepare learning materials, and how novice translators can become autonomous users of corpora. Readers interested in translation studies, translator training and corpus linguistics will find the book particularly useful. Not only does it include practical, technical advice for using and learning to use corpora, but it also addresses important issues such as the balance between training and education and how CULT methodologies reinforce student autonomy and responsibility. Not only is this a good introduction to CULT, but it also incorporates the latest developments in this field, showing the advantages of using these methodologies in competence-based learning.

*Who Translates?* Douglas Robinson,2001-02-01 Exploring this theme, Robinson examines Plato's Ion, Philo Judaeus and Augustine on the Septuagint, Paul on inspired interpreters, Joseph Smith on the Book of Mormon, and Schleiermacher, Marx, and Heidegger on translation. He traces the imaginative and historical linkages between twentieth-century conceptions of ideology and ancient conceptions of spirit-channeling, and the performative inversion of power relations by which the channel (or translator) comes to wield the source author as his or her tool.
