Final Report on the Validation of Physical Maintenance Standards for State Traffic Officer California. Department of the California Highway Patrol, 1984 In 1979, the Commissioner of the California Highway Patrol (CHP) requested that a joint study be conducted by the CHP and the California State Personnel Board (SPB) to develop a series of tests which assess whether a State Traffic Officer has the physical abilities necessary for field job readiness. To provide the broadest possible base, task lists developed by four major studies were utilized. These studies were: 1. The 1975 Women Traffic Officer Project (WTOP) designed to determine the feasibility of hiring women as state traffic officers and which identified 18 physically demanding tasks; 2. The 1978 Physical Demand Survey (PDS) designed to determine the frequency and duration of tasks performed by state traffic officers which identified 25 physically demanding tasks; 3. The SPB 1978 Job Analysis to support medical standards in which 11 physically demanding tasks were identified, and 4) The Commission on Peace Officers Standards and Training's 1978 California Entry-Level Law Enforcement Job Analysis which determined the physical demands placed on peace officers in general and identified 23 physically demanding tasks. Thus a total of 77 physically demanding tasks were identified in these four studies.
