**Link Prediction in Social Networks** Srinivas Virinchi, Pabitra Mitra, 2016-01-22 This work presents link prediction similarity measures for social networks that exploit the degree distribution of the networks. In the context of link prediction in dense networks, the text proposes similarity measures based on Markov inequality degree thresholding (MIDTs), which only consider nodes whose degree is above a threshold for a possible link. Also presented are similarity measures based on cliques (CNC, AAC, RAC), which assign extra weight between nodes sharing a greater number of cliques. Additionally, a locally adaptive (LA) similarity measure is proposed that assigns different weights to common nodes based on the degree distribution of the local neighborhood and the degree distribution of the network. In the context of link prediction in dense networks, the text introduces a novel two-phase framework that adds edges to the sparse graph to form a boost graph.

**H.G. Wells and All Things Russian** Galya Diment, 2019-07-26 H. G. Wells and All Things Russian is a fertile terrain for research and this volume will be the first to devote itself entirely to the theme. Wells was an astute student of Russian literature, culture and history, and the Russians, in turn, became eager students of Wells's views and works. During the Soviet years, in fact, no significant foreign author was safer for Soviet critics to praise than H. G. Wells. The reason was obvious. He had met – and largely approved of – Lenin, was a close friend of the Soviet literary giant Maxim Gorky and, in general, expressed much respect for Russia's evolving Communist experiment, even after it fell into Stalin's hands. While Wells's attitude towards the Soviet Union was, nevertheless, often ambivalent, there is definitely nothing ambiguous about the tremendous influence his works had on Russian literary and cultural life.
