Surfing Long Beach Island Caroline Unger,2003-07-15 This book is a must read for all East Coast surfers who may have felt at sometime that they should apologize for where they are from. The stories and pictures in this book are sure to make the East Coast surfer proud, while sharing a universal story line with surfers all around the world. These stories could very well have taken place in Hawaii or California but, they didnt. The major theme is an eighteen-mile barrier island off the New Jersey coastline known as Long Beach Island (LBI). Every individual in this book is somehow connected to the island. Through a series of short stories from the 1930s to the 21st Century, you will be moved by what these individuals have accomplished in the surfing community as well as the real world. Turn the pages to find out who is an innovator of snowboard technology; a photo editor for Surfer magazine; writer/producer of a Nickelodeon cartoon; and an award recipient from the president of the United States. Meet local surfing legends: Wimpy, Tinker, and Huckleberry. Find out what surfing pioneers did in the days before surfing wetsuits and wax. Travel around the world and through time for: Surfing in Vietnam during the Vietnam War; Running a surf hostile in Puerto Rico in the 1990s; Capturing storm surf on film for the last twenty years from all over the globe. Learn what unique surfing product came to a local surfer in a dream and how the internationally known franchise - Ron Jon Surf Shop, got its start on LBI. You're sure to enjoy the Why We Surf section with unedited material from our local surfers, ages fifteen to sixty-three. Hear about some of their most memorable surfing experiences and gain their deepest insights about this incredible sport and lifestyle. The book has over one hundred pictures from family collections, 60s surf magazines, and professional portfolios of some of the top surfing photographers. Surfing collectors will especially enjoy some of the vintage material. Surfing the Web will give you the links you need for everything from weather information to lodging on LBI. For those of you who are still learning about LBI, Local Breaks gives you the low-down about surfing conditions and even parking. There is something in Surfing LBI for surfers of every age and level of expertise. Its a feel good book that will leave you stoked every time you open it.

Surf Tribe Stephan Vanfleteren,Cultureel Centrum Scharpoord (Knokke, Belgium),2018 - An incomparable new photo book about the international surf culture by Stephan Vanfleteren- Showcases captivating portraits of some of the world's surf iconsWith Surf Tribe, photographer Stephan Vanfleteren shows that there is far more to surf culture than just sport and competition. Surfing is also about a deep admiration and respect for the ocean, as well as the feeling of insignificance when confronted with the forces of nature. Surfers use the waves for fun, but also to forget and to battle, both with others and with themselves. Vanfleteren looks beyond the traditional borders of the United States and Australia and searches the globe for people who live in places where sea and land meet. He documents a fluid community, with nature as its sole leader. He has sought out young

talent, living icons, and old legends, both competitive and free surfers. The photographs here are serene black and white portraits in Vanfleteren's well-known, haunting style; as always, he reaches below the surface and goes to the core of his subjects. Included, amongst many others, are Kelly Slater, Gerry Lopez, John Florence, Mickey Munoz, Filipe Toledo and Stephanie Gilmore. Surfer, journalist, and actor Gerry Lopez has contributed the Foreword. Surf Tribe has been exhibited in Knokke-Heist (Belgium), Kunsthal Rotterdam (Netherlands), Gallery Kahmann Amsterdam (Netherlands). The next exhibition will be in June 2019 in France. The Lost Coast Drew Kampion, 2004 As energy passing through matter organizes matter, so years of intimacy with the ocean and its waves organizes and alters the perceptions of the surfer. The lulls, sets, and rogue waves; the briny stew in which they tumble and struggle; the continual oscillations of reflective surfaces under shifting skies; the lurking presence of The Landlord -- all of this alters the senses while it educates the surfer, revealing the laws of the universe on a scale that can be engaged and understood. This collection of stories will pull you into the world of the surfer -- capturing your emotion and engaging your mind. As varied as the patterns of waves, these stories reveal the joy, fear, longing, and ever-present questions of human emotion and existence. Book jacket.

Surfing Virginia Beach and the Outer Banks Tony Lillis, 2020 Virginia Beach and the Outer Banks share an incredibly rich surfing history. Virginia Beach is home to major surfing institutions so iconic and long lasting they are simply referred to as ECSC, WRV and 17th Street. Of course, the Outer Banks has the consistent waves. The barrels. The lighthouse. Its beaches have been the setting for iconic moments in the history of the Eastern Surfing Association. Local surfing historian Tony Lillis chronicles the rich history of surfing along Virginia Beach and the Outer Banks from the early twentieth century, when world travelers brought home tales of Hawaiian surfing, through the heyday of the 1960s and into the twenty-first century.

The Encyclopedia of Surfing Matt Warshaw, 2005 With 1,500 alphabetical entries and 300 illustrations, this resource is a comprehensive review of the people, places, events, equipment, vernacular, and lively history of this fascinating sport.

Ethno-Aesthetics of Surf in Florida Anne Barjolin-Smith, 2020-09-21 Ethno-aesthetics of Surf in Florida discusses surf and music as glocal sociocultural constructs. Focusing on Florida's unexplored surfing culture, the book illustrates how musical experience begets representations about the world that highlight ways of acting and being of various sociocultural communities. Based on the conceptualization of ethno-aesthetics, this ethnographic study provides an analysis of the Space Coast surfers community's collaborative effort to build social cohesion through their musicking. This transdisciplinary research in American Studies draws upon various theoretical perspectives from both the humanities and social sciences, including ethnomusicology, social psychology, and sociolinguistics, to propose new ways of exploring the links between surfing and musicking. This monograph looks past the myth of iconic 1960s Californian surf music to show how, as a result of the globalization of surfing, the musicking of Floridian surfers has allowed them to express their subjectivities and to make sense of their world. This book contributes to the debate on the disputed notions of identity and representations by establishing connections between a local expression of the surf lifestyle and its music. It proposes theoretical models that explain cultural hybridization, appropriation, and belonging in surfing. It also develops concepts and notions, such as surfanization, surf strand, lifestyle crossover, and identity marking, to illustrate how global practices, such as surfing, are endowed with various modes of expression exemplified by the emergence of unique regional subcultures of surfing.

Surf Is Where You Find It Gerry Lopez, 2015-04-17 Written by one of the most revered surfers of his generation, Gerry Lopez's Surf Is Where You Find It is a collection of stories about a lifetime of surfing. But more than that, it is a collection of stories about the lessons learned from surfing. It presents 38 stories about those who have been influential in the sport — surfing anytime, anywhere, and in any way. Surfing in South Carolina Lilla O'Brien Folsom and Foster Folsom, 2016 For centuries, the ocean waters of the Atlantic have impacted the daily lives of those on the South Carolina coast. Beginning in the 1960s, those waves caught the imagination of young beachgoers who studied magazines and Super 8 films and refined their moves on rent-a-floats until the first surfboards became available in the area. The buildup to the Vietnam War brought GIs and their families from the West Coast and Hawaii to South Carolina, and their surfboards came along with them. Unbeknownst to each other, local surfers concentrated in the beach and military base areas of Beaufort/Hilton Head, Charleston, and Pawley's Island/Grand Strand began to conquer nearby surf breaks. When contests finally brought these groups together, a statewide sport was born.

Soil Physics with Python Marco Bittelli,Gaylon S. Campbell,Fausto Tomei,2015-05-14 This innovative study presents concepts and problems in soil physics, and provides solutions using original computer programs. It provides a close examination of physical environments of soil, including an analysis of the movement of heat, water and gases. The authors employ the programming language Python, which is now widely used for numerical problem solving in the sciences. In contrast to the majority of the literature on soil physics, this text focuses on solving, not deriving, differential equations for transport. Using numerical procedures to solve differential equations allows the solution of quite difficult problems with fairly simple mathematical tools. Numerical methods convert differential into algebraic equations, which can be solved using conventional methods of linear algebra. Each chapter introduces a soil physics concept, and proceeds to develop computer programs to solve the equations and illustrate the points made in the discussion. Problems at the end of each chapter help the reader practise using the concepts introduced. The text is suitable for advanced undergraduates, graduates and researchers of soil physics. It employs an open source philosophy where computer code is presented, explained and discussed, and provides the reader with a full understanding of the solutions. Once mastered, the code can be adapted and expanded for the user's own models, fostering further developments. The Python tools provide a simple syntax, Object Oriented Programming techniques, powerful mathematical and numerical tools, and a user friendly environment.
