Handbook of Consumer Behavior, Tourism, and the Internet Juline E. Mills, Rob Law, 2013-07-04 Make the most of your online business resources The growing acceptance and use of the Internet as an increasingly valuable travel tool has tourism and hospitality businesses taking a critical look at their business-to-customer online environments while pondering such questions as, "How do I get people to visit my Web site?" "Is my Web site attracting the 'right' kind of e-consumers?" and "How do I turn browsers into buyers?" The Handbook of Consumer Behavior, Tourism, and the Internet analyzes the latest strategies involving Internet business applications that will help you attract—and keep—online travel customers.

Researchers from the United States, Europe, and Asia present the latest findings you need to make the right decisions regarding long-term e-commerce development and planning. The Handbook of Consumer Behavior, Tourism, and the Internet examines vital issues affecting the travel and tourism industry from an online perspective. This book analyzes the latest theory and research on general online buyer characteristics, the differences between online and offline consumer behavior, the differences between broadband and narrowband users, the online search process, quality and perception of lodging brands, and Web site design, maintenance, and development. Each section of the book includes a model/diagram that serves as an overview of the topic, followed by a thorough discussion on the topic from several sources. Each section ends with commentary on the areas where future research is

needed. The book's contributors use a variety of research methodologies ranging from qualitative data analyses using artificial neural network analysis, to experimental design, non-parametric statistical tests, and structural equation modeling. Topics examined in the Handbook of Consumer Behavior, Tourism, and the Internet include: the need for businesses to use internal examinations to determine and meet online consumer needs the emerging field of e-complaint behavior—consumers taking to the Web to voice complaints about travel services how to use e-tools to measure guest satisfaction how to measure consumer reaction to Web-based technology the Internet's impact on decision making for travel products and how to use e-mail marketing, electronic customer relationship management (eCRM), Web positioning, and search engine placement The Handbook of Consumer Behavior, Tourism, and the Internet is equally valuable as a classroom resource or professional reference, providing up-to-date material on Internet applications and their impact on consumers and e-commerce.

Social Informatics Akiyo Nadamoto, Adam Jatowt, Adam Wierzbicki, Jochen L. Leidner, 2014-04-15 This book constitutes the refereed post-proceedings of two workshops held at the 5th International Conference on Social Informatics, SocInfo 2013, in Kyoto, Japan, in November 2013: the First Workshop on Quality, Motivation and Coordination of Open Collaboration, QMC 2013 and the First International Workshop on Histoinformatics, HISTOINFORMATICS 2013. The 11 revised papers presented at the workshops were carefully reviewed and selected from numerous submissions. They cover specific areas of social informatics. The QMC 2013 workshop attracted papers on new algorithms and methods to improve the quality or to increase the motivation of open collaboration, to reduce the cost of financial motivation or to decrease the time needed to finish collaborative tasks. The papers presented at HISTOINFORMATICS 2013 aim at improving the interaction between computer science and historical science towards fostering a new research direction of computational history.

Google's PageRank and Beyond Amy N. Langville, Carl D. Meyer, 2011-07-01 Why doesn't your home page appear on the first page of search results, even when you query your own name? How do other web pages always appear at the top? What creates these powerful rankings? And how? The first book ever about the science of web page rankings, Google's PageRank and Beyond supplies the answers to these and other questions and more. The book serves two very different audiences: the curious science reader and the technical

computational reader. The chapters build in mathematical sophistication, so that the first five are accessible to the general academic reader. While other chapters are much more mathematical in nature, each one contains something for both audiences. For example, the authors include entertaining asides such as how search engines make money and how the Great Firewall of China influences research. The book includes an extensive background chapter designed to help readers learn more about the mathematics of search engines, and it contains several MATLAB codes and links to sample web data sets. The philosophy throughout is to encourage readers to experiment with the ideas and algorithms in the text. Any business seriously interested in improving its rankings in the major search engines can benefit from the clear examples, sample code, and list of resources provided. Many illustrative examples and entertaining asides MATLAB code Accessible and informal style Complete and self-contained section for mathematics review

Collaborative Networks for a Sustainable World
Luis M. Camarinha-Matos,Xavier Boucher,Hamideh Afsarmanesh,2010-10-02 Collaborative Networks for a Sustainable World Aiming to reach a sustainable world calls for a wider collaboration among multiple stakeholders from different origins, as the changes needed for sustainability exceed the capacity and capability of any individual actor. In recent years there has been a growing awareness both in the political sphere and in civil society

including the business sectors, on the importance of sustainability. Therefore, this is an important and timely research issue, not only in terms of systems design but also as an effort to borrow and integrate contributions from different disciplines when designing and/or generating those systems. The discipline of collaborative networks especially, which has already emerged in many application sectors, shall play a key role in the implementation of effective sustainability strategies. PRO-VE 2010 focused on sharing knowledge and experiences as well as identifying directions for further research and development in this area. The conference - dressed models, infrastructures, support tools, and governance principles developed for collaborative networks, as important resources to support multi-stakeholder sustainable developments. Furthermore, the challenges of this theme open new research directions for CNs. PRO-VE 2010 held in St.

Neo-Victorian Literature and Culture Nadine Boehm-Schnitker, Susanne Gruss, 2014-06-05 This book provides a comprehensive reflection of the processes of canonization, (un)pleasurable consumption and the emerging predominance of topics and theoretical concerns in neo-Victorianism. The repetitions and reiterations of the Victorian in contemporary culture document an unbroken fascination with the histories, technologies and achievements, as well as the injustices and atrocities, of the nineteenth century. They also reveal that, in many ways, contemporary identities are constructed through a Victorian mirror image fabricated by the desires, imaginings and critical interests of the present. Providing analyses of current negotiations of nineteenth-century texts, discourses and traumas, this volume explores the contemporary commodification and nostalgic recreation of the past. It brings together critical perspectives of experts in the fields of Victorian literature and

culture, contemporary literature, and neo-Victorianism, with contributions by leading scholars in the field including Rosario Arias, Cora Kaplan, Elizabeth Ho, Marie-Luise Kohlke and Sally Shuttleworth. Neo-Victorian Literature and Culture interrogates current fashions in neo-Victorianism and their ideological leanings, the resurrection of cultural icons, and the reasons behind our relationship with and immersion in Victorian culture.
