About cats Nicolae Sfetcu,2014-04-29 A guide for the cat lovers about the cat behavior, cat attractants, cat breeds, cat health and food, type of cats, cats as pets, fictional cats, films about cats, historical cats. A book full with pictures of the most important cat breeds, tips and advice for cat behavior, cat diseases and how to take care of the cats. The cat, also called the domestic cat or house cat, is a small feline carnivorous mammal of the subspecies *Felis silvestris catus*. Its most immediate pre-domestication ancestor is the African wild cat, *Felis silvestris lybica*. The cat has been living in close association with humans for at least 3,500 years; the Ancient Egyptians routinely used cats to keep mice and other rodents (mostly rats) away from their grain (and also believed that cats were sacred to the goddess Bastet). The history of the domestic cat may stretch back even further, as 8,000-year-old bones of humans and cats were found buried together on the island of Cyprus.

Biodiversity Databases Gordon B. Curry,Chris J. Humphries,2016-04-19 Computing and database management has shifted from cottage industry-style methods – the small independent researcher keeping records for a particular project – to state-of-the-art file storage systems, presentation, and distribution over the Internet. New and

emerging techniques for recognition, compilation, and data management have made managing data a discipline in its own right. Covering all aspects of this data management, Biodiversity Databases: Techniques, Politics, and Applications brings together input from social scientists, programmers, database designers, and information specialists to delineate the political setting and give institutions platforms for the dissemination of taxonomic information. A practical and logical guide to complex issues, the book explores the changes and challenges of the information age. It discusses projects developed to provide better access to all available biodiversity information. The chapters make the case for the need for representation of concepts in taxonomic databases. They explore issues involved in connecting databases with different user interfaces, the technical demands of linking databases that are not entirely uniform in structure, and the problems of user access and the control of data quality. The book highlights different approaches to addressing concerns associated with the taxonomic impediment and the low reproducibility of taxonomic data. It provides an in-depth examination of the challenge of making taxonomic information more widely available to users in the wider scientific community, in government, and the general population.

Reactive and Functional Polymers Volume Two Tomy J. Gutiérrez,2020-10-01 Reactive and functional polymers are manufactured with the aim of improving the performance of unmodified polymers or providing functionality for different applications. These polymers are created mainly through chemical reactions, but there are other important modifications that can be carried out by physical alterations in order to obtain reactive and functional polymers. This volume presents a comprehensive analysis of these reactive and functional polymers. Reactive and Functional Polymers Volume Two considers the coupling, crosslinking and grafting reactions to improve the compatibility of reactive and functional polymer blends. In this book, world-renowned researchers have participated, including Dr. Sabu Thomas (Editor-in-chief for the journal ‘Nano-Structures & Nano-Objects’). With its comprehensive scope and up-to-date coverage of issues and trends in Reactive and Functional Polymers, this is an outstanding book for students, professors, researchers and industrialists working in the field of polymers and plastic materials.

How We Became Human Julio Moreno,2014-03-06 How We Became Human: A Challenge to Psychoanalysis tackles the question of what distinguishes human beings from other animals. By interweaving psychoanalysis, biology, physics, anthropology, and philosophy, Julio Moreno advances a novel thesis: human beings are faulty animals in their understanding of the world around them. From this perspective, Moreno seeks to reformulate many of the classic psychoanalytic, psychological, and

anthropological postulates on childhood, links, and psychic change.

RF Photonic Technology in Optical Fiber Links William S. C. Chang,2007-05-14 In many applications, radio frequency (RF) signals need to be transmitted and processed without being digitalized. Optical fiber provides a transmission medium in which RF modulated optical carriers can be transmitted and distributed with very low loss, making it more efficient and less costly than conventional electronic systems. This volume presents a review of RF photonic components, transmission systems, and signal processing examples in optical fibers from leading academic, government, and industry scientists working in this field. It also introduces the reader to various related technologies such as direct modulation of laser sources, external modulation techniques, and detectors. The text is aimed at engineers and scientists engaged in the research and development of optical fibers and analog RF applications. With an emphasis on design, performance and practical application, this book will be of particular interest to those developing systems based on this technology.
