Music and the Functions of the Brain: Arousal, Emotions, and Pleasure Mark Reybrouck,Tuomas Eerola,Piotr Podlipniak,2018-04-12 Music impinges upon the body and the brain. As such, it has significant inductive power which relies both on innate dispositions and acquired mechanisms and competencies. The processes are partly autonomous and partly deliberate, and interrelations between several levels of processing are becoming clearer with accumulating new evidence. For instance, recent developments in neuroimaging techniques, have broadened the field by encompassing the study of cortical and subcortical processing of the music. The domain of musical emotions is a typical example with a major focus on the pleasure that can be derived from listening to music. Pleasure, however, is not the only emotion to be induced and the mechanisms behind its elicitation are far from understood. There are also mechanisms related to arousal and activation that are both less differentiated and at the same time more complex than the assumed mechanisms that trigger basic emotions. It is imperative, therefore, to investigate what pleasurable and mood-modifying effects music can have on human beings in real-time listening situations. This e-book is an attempt to answer these questions. Revolving around the specificity of music experience in terms of perception, emotional reactions, and aesthetic assessment, it presents new hypotheses, theoretical claims as well as new empirical data which contribute to a better understanding of the functions of the brain as related to musical experience.

Strategies for Business Sustainability in a Collaborative Economy Leon, Ramona-Diana,2020-06-19 Against the backdrop of globalization, digitalization, and the new entrance of Generation Z on the labor market, the economic environment has started to become more dynamic, complex, and uncertain. New management, marketing, and accounting tools and strategies are needed to improve a company's sustainability in the current collaborative economy. *Strategies for Business Sustainability in a Collaborative Economy* is a collection of innovative research that focuses on organizational tools and practices that may foster a company's success in the new economic context, which is defined by the faster pace of technological progress and the entrance of Generation Z on the labor market. Thus, it analyzes how Generation Z transforms human resources policies and practices and how they change the concept of sustainability through their needs and expectations. Highlighting a wide range of topics including resource management, knowledge-based firms, and business models, this publication examines how business models evolve given the success recorded by newer companies. This book is ideally designed for entrepreneurs, executives, managers, economists, academicians, researchers, and students.

Research Anthology on Social Media Advertising and Building Consumer Relationships Management Association, Information Resources,2022-05-13 Social media has become a key tool that businesses must utilize in all areas of their practices to build relationships with their customer base and promote their products. This technology is no longer optional as those who do not take advantage of the many benefits it offers continue to struggle with outdated practices. In order for businesses to flourish, further study on the advantages social media provides in the areas of marketing and developing consumer relationships is required. The *Research Anthology on Social Media Advertising and Building Consumer Relationships* considers best practices and strategies of utilizing social media successfully throughout various business fields to promote products, build relationships, and maintain relevancy. This book also discusses common pitfalls and challenges companies face as they attempt to create a name for themselves in the online world. Covering topics such as marketing, human aspects of business, and branding, this major reference work is crucial for managers, business owners, entrepreneurs, researchers, scholars, academicians, practitioners, instructors, and students.

The Informatics Handbook S.A. Fist,2012-12-06 This is not a dictionary - and nor is it an encyclopedia. It is a reference and compendium of useful information about the converging worlds of computers, communications, telecommunications and broadcasting. You could refer to it as a guide for the Information Super Highway, but this would be pretentious. It aims to cover most of the more important terms and concepts in the developing discipline of Informatics - which, in my definition, includes the major converging technologies, and the associated social and cultural issues. Unlike a dictionary, this handbook makes no attempt to be 'prescriptive' in its definitions. Many of the words we use today in computing and communications only vaguely reflect their originations. And with such rapid change, older terms are often taken, twisted, inverted, and mangled, to the point where any attempt by me to lay down laws of meaning, would be meaningless. The information here is 'descriptive' - I am concerned with usage only. This book therefore contains keywords and explanations which have been culled from the current literature - from technical magazines, newspapers, the Internet, forums, etc. This is the living language as it is being used today - not a historical artifact of 1950s computer science.

An Emerging Approach for Education and Care Susana Castro,Olympia Palikara,2017-08-07 *An Emerging Approach for Education and Care* provides a synthesis of the extensive research that has been conducted worldwide about the International Classification of Functioning, Disability and Health for Children and Youth in education and care. The main purpose of the ICF is to provide a classification of functioning for adults and children with difficulties, considering their everyday lives, all the activities they perform and the environments they are embedded in, in addition to their health condition, which has been the traditional focus of Special Education provision in many countries. Each chapter presents an evidence-based study describing how the ICF has been used to improve the provision of services for children and young people with Special Educational Needs around the world. Moreover, each chapter is written by an expert on the ICF from a different country, thus providing an overview of how the ICF can be applied in international educational contexts with different educational and health systems and cultural backgrounds. This synthesis of world-leading research focuses on the ICF as a framework to approach assessment, intervention and classification for children and young people with SEN, whilst also providing practical examples of how it can be implemented. *An Emerging Approach for Education and Care* will be essential reading for academics, researchers and practitioners working on Special Educational Needs provision and rehabilitation. It should also be of great interest to those involved in the study of early childhood education, and for postgraduate students aspiring to work in these settings.

Assessment and Learning John Gardner,2011-12-07 *Assessment and Learning* places learning at the centre of our concerns and explicitly underscores the importance of assessment in that learning. This new edition provides a comprehensive overview of assessment that is used to support learning, practice-based theory on assessment for learning, and formative assessment to support individual development and motivate learners. With a strong list of existing and new contributors, this second edition has been updated to include the latest work on assessment. Readers will find research-informed insights from a wide variety of international contexts. It features: - New chapters on e-assessment, the learner's perspective on assessment and learning and the influence of assessment on how we value learning - Teacher-friendly assessment topics - Practical examples and chapter summaries throughout This book is useful to teacher educators and researchers on postgraduate courses in education, teaching, learning and assessment. John Gardner is a professor of education at Queens University Belfast, and President of the British Educational

Research Association.

Social Computing and Social Media: Experience Design and Social Network Analysis Gabriele Meiselwitz,2021-07-03 This two-volume set LNCS 12774 and 12775 constitutes the refereed proceedings of the 13th International Conference on Social Computing and Social Media, SCSM 2021, held as part of the 23rd International Conference, HCI International 2021, which took place in July 2021. Due to COVID-19 pandemic the conference was held virtually. The total of 1276 papers and 241 posters included in the 39 HCII 2021 proceedings volumes was carefully reviewed and selected from 5222 submissions. The papers of SCSM 2021, Part I, are organized in topical sections named: Computer Mediated Communication; Social Network Analysis; Experience Design in Social Computing.

Changing the Game for Generation Alpha Valora Washington,2021-02-02 “Generation Alpha” applies to children born between 2011 and 2025. They will be raised in smaller and constantly evolving families, digital natives, more tech-savvy than previous generations, globally-connected, diverse, and will live and interact with many more generations. Because of these differences, the next generation and the nation is transforming in ways that adults have never experienced before. Valora Washington invites you to consider how to advocate for and influence the trajectories of this next generation. Raising Generation Alpha Kids looks at how this generation of young children presents new opportunities and challenges, and supports and informs the two principal groups of adults in children’s lives—their families and early childhood educators.

Understanding Quantitative and Qualitative Research in Psychology Samuel Fairlamb,2021-06-25 Understanding Quantitative and Qualitative Research in Psychology is the most hands-on, accessible and approachable guide to the entire research process, which fully explores both quantitative and qualitative methods to give students the knowledge and confidence they need. Students are presented with a practically-focused guide to carrying out psychological research and are taken from formulating a research question through to collecting data, analysing datasets statistically with SPSS or qualitatively with a range of approaches, and finally presenting and thinking critically about research findings. They are shown the importance of research ethics, and coverage of the replication crisis and the open science movement is considered throughout. The online resources present a wealth of opportunities for students to practice what they have learned, and the title is supported by an excellent range of video support materials for both the qualitative and quantitative sections, including SPSS screencasts for all relevant chapters, and a range of videos on interview skills. Digital formats and resources Understanding Quantitative and Qualitative Research in Psychology is available for students and institutions to purchase in a variety of formats, and is supported by online resources. The e-book offers a mobile experience and convenient access, along with self-assessment activities and multi-media content to provide additional learning support: www.oxfordtextbooks.co.uk/ebooks/. The online resources include: For students:- Videos demonstrating interview technique- SPSS screencasts showing students how to carry out the statistical analyses covered in the book- Flashcards- SPSS datasets- Audio files of sample interviews- Transcriptions of sample interviews- Initial codes for a sample thematic analysis- Memo template and transcription template to accompany the grounded theory chapter- SPSS output files- Answers to study questions- Web references- An example qualitative study For lecturers:- Customizable PowerPoint presentations- Image bank- Test bank- Additional worksheets- Answer sheets- Additional datasets- Additional SPSS output files

Engineering Biostatistics Brani Vidakovic,2017-11-06 Provides a one-stop resource for engineers learning biostatistics using MATLAB® and WinBUGS Through its scope and depth of coverage, this book addresses the needs of the vibrant and rapidly growing bio-oriented engineering fields while implementing software packages that are familiar to engineers. The book is heavily oriented to computation and hands-on approaches so readers understand each step of the programming. Another dimension of this book is in parallel coverage of both Bayesian and frequentist approaches to statistical inference. It avoids taking sides on the classical vs. Bayesian paradigms, and many examples in this book are solved using both methods. The results are then compared and commented upon. Readers have the choice of MATLAB® for classical data analysis and WinBUGS/OpenBUGS for Bayesian data analysis. Every chapter starts with a box highlighting what is covered in that chapter and ends with exercises, a list of software scripts, datasets, and references. Engineering Biostatistics: An Introduction using MATLAB® and WinBUGS also includes: parallel coverage of classical and Bayesian approaches, where appropriate substantial coverage of Bayesian approaches to statistical inference material that has been classroom-tested in an introductory statistics course in bioengineering over several years exercises at the end of each chapter and an accompanying website with full solutions and hints to some exercises, as well as additional materials and examples Engineering Biostatistics: An Introduction using MATLAB® and WinBUGS can serve as a textbook for introductory-to-intermediate applied statistics courses, as well as a useful reference for engineers interested in biostatistical approaches.

Computing In High Energy Physics: Chp '95 - Proceedings Of The International Conference Ronald Shellard,Trang D Nguyen,1996-10-24 CHEP (Computing in High Energy Physics) is the largest international meeting of the communities of High Energy Physics, Computing Science and the Computing Industry. The sixth conference in this series was held in Rio de Janeiro, Brazil in September 1995. The focus of the conference was “Computing for the next Millennium”. High Energy Physics is at a point where major changes in the way data acquisition and computing problems are addressed will be called for in the high energy physics programs of the year 2000 and beyond. The conference covered a wide spectrum of topics including Data Access, Storage, and Analysis; Data Acquisition and Triggering; Worldwide Collaboration and Networking; Tools, Languages, and Software Development Environments; and special purpose processing systems. The papers presented both recent progress and radical approaches to computing problems as candidates for the basis of future computing in the field of high energy physics.
