Being Good in a World of Need Larry S. Temkin,2022-01-27 Ours is a rich world filled with misery. This gives rise to a pressing question: how should the well-off respond to the needy? Peter Singer famously argued that just as we have an obligation to save a drowning child, we have an obligation to support charities like Oxfam. Inspired by Singer, Effective Altruism holds that we ought to support those charities doing the most good. Being Good in a World of Need powerfully challenges these views. Drawing on many sources, Temkin illustrates many disanalogies between saving a drowning child and supporting international charities, involving: intervening agents; effects of one's actions; corruption; responsibility; accidents versus injustice; and aid beneficiaries. These disanalogies raise complex issues requiring a pluralistic approach, rather than Effective Altruism's monistic, do the most good approach. Being Good discusses: ways aid may reward corrupt leaders and incentivize disastrous policies; charities ignoring or covering up negative impacts; the ethical disaster of aid efforts in Goma; brain and character drains; difficulties in replicability or scaling up model aid projects; ethical imperialism, paternalism, autonomy, and respect; Angus Deaton's contention that aid undermines government responsiveness; Jeffrey Sachs and the Millennium Villages Project; conflicts between individual and collective morality; fairness and responsibility; focusing on badly off people rather than countries; humanitarian versus development aid; and ways of aiding other than on-the-ground charities--

**A new era of Value Selling** Thomas Menthe,2019-04-04 With this book, Thomas Menthe provides new insights into the era of value-selling, which has been the Number 1 method in selling complex products and services. Today, customers are expecting more while paying less and the value of your offer is defined by the customer not by the seller. Data is the new oil - the new digital age allows different ways with technology like

machine learning to better analyze customer journeys, get insights, predict behaviors and personalize communication to improve customer retention. Digitalization will change the buying behavior much more towards e-commerce and self-service consultation with the support of sales robots. Value can be created from data, which needs to be structured, analyzed and used for the individual customer engagement. Does this mean the end of the sales representative and solution sales? Value is not based solely on product dimensions, much more emotional value created counts during the decision making process. The new era of value-selling explains, how value can be made tangible by the value quotient and ways to generate rational and emotional ROI for customers through story-telling and relationship benefits. Value is always first on the buyer's mind and the new value-selling concept will dramatically improve your business and show how to respond to the customer of tomorrow. Thomas Menthe (MBA) is a sales expert, experienced seller, recognized speaker and author of many publications about customer value, new ways of selling, selling strategy, leadership and coaching. His best selling book Kundennutzen has sold thousands of copies and others are available in their 4th edition. He served global companies like Bearing Point, Canon, Carlsberg, Cisco Systems, Global Knowledge, KWS, Microsoft, RIM, Xerox and others.
