Leading for High Performance in Asia Sen Sendjaya,2019-02-15 How do leaders lead for high performance in Asia, the fastest growing region in the world? What are the new leadership influential processes and skillsets needed to engage the organizational members in creative and meaningful ways? In this book, readers will find strategic insights and tips derived from cutting-edge studies on specific leadership and management issues in Asia. Using a range of methodologies from in-depth interviews, field surveys, and computer simulation, the studies include the following topics: Strategies to foster citizenship and pro-social behaviors in high-performing firms; the roles of culture-specific values such as paternalism and collectivism, the construction of leader identity, the effects of leadership on team satisfaction, the development of female leaders, and key lessons in strategic leadership development. Featuring studies conducted in China, Indonesia, Singapore, and Australia, this book will equip readers with a set of strategic and actionable tools for tackling the leadership

challenges in Asia. Further, each chapter includes a 'Managerial Implications' section, in which subject experts share evidence-based practical and contextual recommendations.

Emotional Intelligence and Cognitive Abilities

Pablo Fernández-Berrocal,Purificación

Checa,2016-09-07 Nowadays, not only psychologists are interested in the study of Emotional

Intelligence (EI). Teachers, educator, managers, employers, and people, in general, pay attention to EI. For example, teachers would like to know how EI could affect student's academic results, and managers are concerned about how EI influences their employees' performance. The concept of EI has been widely used in recent years to the extent that people start to applying it in daily life. EI is broadly defined as the capacity to process and use emotional information. More specifically, according to Mayer and Salovey, EI is the ability to: "1) accurate perception, appraise, and expression of emotion; 2) access and/or generation of feelings when they facilitate thought; 3) understand emotions and emotional knowledge; and 4) regulate emotions to promote emotional and intellectual growth" (Mayer and Salovey 1997, p. 10). When new information arises into one specific area of knowledge, the work of the scientists is to investigate the relation between this new information and other established concepts. In this sense, EI could be considered as a new framework to explain human behaviour. As a young

concept in Psychology, EI could be used to elucidate the performance in the activities of everyday life. Over the past two decades, studies of EI have tried to delimitate how EI is linked to other competences. A vast number of studies have reported a relation between EI and a large list of competences such as academic and work success, life satisfaction, attendee to emotions, assertiveness, emotional expression, emotional-based decision making, impulsive control, stress management, among others. Moreover, recent researches have shown that EI plays an important role in the prediction of behaviour besides personality and cognitive factors. However, it is not until quite recently, that studies on EI have considered the importance of individual differences in EI and their interaction with cognitive abilities. The general issue of this Research Topic was to expose the role of individual differences on EI in the development of a large number of competencies that support a more efficient performance in people's everyday life. The present Research Topic provide an extensive review that may give light to the better understanding of how individual differences in EI affect human behaviour. We have considered studies that analyse: 1) how EI contributes to emotional, cognitive and social process beyond the well-known contribution of IQ and personality traits, as well as the brain system that supports the EI; 2) how EI contributes to relationships among emotions and health and well-being, 3) the roles of EI during early development and the evaluation in different populations, 4) how implicit beliefs about

emotions and EI influence emotional abilities.

Principles of Management David S.

Bright, Anastasia H. Cortes, Eva Hartmann, 2023-05-16
Black & white print. Principles of Management is designed to meet the scope and sequence requirements of the introductory course on management. This is a traditional approach to management using the leading, planning, organizing, and controlling approach. Management is a broad business discipline, and the Principles of Management course covers many management areas such as human resource management and strategic management, as well as behavioral areas such as motivation. No one individual can be an expert in all areas of management, so an additional benefit of this text is that specialists in a variety of areas have authored individual chapters.
