Accounting Standards Opperman,2009-05 This 13th edition introduces learners to general accounting principles and the disclosure requirements of company financial statements. In this comprehensive and up-to-date publication, principles are illustrated through questions and solutions. The learner's understanding of principles is gradually broadened by an increase in the degree of difficulty of the questions that are asked. Self-study is actively encouraged by the inclusion of questions for which the solutions are available to prescribing institutions only. Changes brought about by new accounting standards, issued as a consequence of the South African Institute of Chartered Accountants' Improvement of Accounting Standards Project, have once again been incorporated in this latest edition. Accounting Standards is intended to satisfy the specific requirements of learners and to reduce the workload of educators.

Object-oriented Programming with ActionScript 2.0 Jeff Tapper,James Talbot,Robin Haffner,2004 Updated to cover the functionality and ActionScripting changes that have come with the release of Flash MX Professional 2004, this edition brings more clarity to the use of object-oriented programming for developing Flash applications. Topics include object design, basic patterns, using components, and debugging applications, all covered with a backdrop of a sample application.

The Linux Command Line, 2nd Edition William Shotts,2019-03-07 You've experienced the shiny, point-and-click surface of your Linux computer—now dive below and explore its depths with the power of the command line. The Linux Command Line takes you from your very first terminal keystrokes to writing full programs in Bash, the most popular Linux shell (or command line). Along the way you'll learn the timeless skills handed down by generations of experienced, mouse-shunning gurus: file navigation, environment configuration, command chaining, pattern matching with regular expressions, and more. In addition to that practical knowledge, author William Shotts reveals the philosophy behind these tools and the rich heritage that your desktop Linux machine has inherited from Unix supercomputers of yore. As you make your way through the book's short, easily-digestible chapters, you'll learn how to: Create and delete files, directories, and symlinks Administer your system, including networking, package installation, and process management Use standard input and output, redirection, and pipelines Edit files with Vi, the world's most popular text editor Write shell scripts to automate common or boring tasks Slice and dice text files with cut, paste, grep, patch, and sed Once you overcome your initial shell shock, you'll find that the command line is a natural and expressive way to communicate with your computer. Just don't be surprised if your mouse starts to gather dust.

The Home Mortgage Book Dale Mayer,2014 Finding and arranging the best mortgage for your dream home purchase can be a confusing and daunting experience.

Accounting Standards HRB Oppermann,S. F. Booysen,C. S. Binnekade,J. G. I Oberholster,2008-04 Accounting Standards introduces students to general accounting principles and the disclosure requirements of company financial statements. The emphasis is on the requirements of Accounting Statements and Interpretations issued by the South African Institute of Chartered Accountants, which form the basis of

Generally Accepted Accounting Practice (GAAP) in South Africa. Incorporated into this latest edition are the changes brought about by new accounting standards, issued as a consequence of the South African Institute of Chartered Accountants' Harmonisation and Improvement of Accounting Standards Project. The book is intended to satisfy the specific requirements of students and to reduce the workload of educators.

A Fast Track to Structured Finance Modeling, Monitoring, and Valuation William Preinitz, 2009-02-17 This book is designed to start with simple examples that progressively develop the reader's confidence to take on more complex tasks. There is very little theoretical discussion about computer science, operations research algorithms, mathematics, or finance. The thrust of the book is to teach the reader to break complex tasks down into simple tasks. It then looks to implement those simple tasks into VBA code using a critical subset of the features of the language. The tentative contents is: (1) Why? What? Who? Where? and How? (2) Common Sense (3) Securitizing A Loan Portfolio (4) Understanding the Excel Waterfall (5) Designing the VBA Model (6) Laying the Model Groundwork (7) Recorded Macros: A First Look at the VBA Language (8) Writing Menus: An Introduction to Data, Ranges, Arrays, and Objects (9) Controlling the Flow of the Model (10) Building Messaging Capabilities (11) Designing the Model's Reports (12) Main Program and Menus (13) Writing the Collateral Selection Code (14) Calculating the Cash Flows (15) Running the Waterfall: Producing Initial Results (16) Debugging the Model (17) Validating the Model (18) Running the Model (19) Building Additional Capabilities (20) Documentation of the Model (21) Managing the Growth of the Model (22) Building Portfolio Monitoring Model (23) Valuation Techniques: How do we Determine Price?
