The American Aberdeen-Angus Herd-book American Aberdeen-Angus Breeders' Association,1949

Annual Report on the Statistics of Railways in the United States, the Interstate Commerce Commission for the Year Ending ... ,1906 1921-1942 contain abstracts of periodical reports.

The United Nations Security Council and War Vaughan Lowe,Adam Roberts,Jennifer Welsh,Dominik Zaum,2010-04-15 This is the first major exploration of the United Nations Security Council's part in addressing the problem of war, both civil and international, since 1945. Both during and after the Cold War the Council has acted in a limited and selective manner, and its work has sometimes resulted in failure. It has not been - and was never equipped to be - the centre of a comprehensive system of collective security. However, it remains the body charged with primary responsibility for international peace and security. It offers unique opportunities for international consultation and military collaboration, and for developing legal and normative frameworks. It has played a part in the reduction in the incidence of international war in the period since 1945. This study examines the extent to which the work of the UN Security Council, as it has evolved, has or has not replaced older systems of power politics and practices regarding the use of force. Its starting point is the failure to implement the UN Charter scheme of having combat forces under direct UN command. Instead, the Council has advanced the use of international peacekeeping forces; it has authorized coalitions of states to take military action; and it has developed some unanticipated roles such as the establishment of post-conflict transitional administrations, international criminal tribunals, and anti-terrorism committees. The book, bringing together distinguished scholars and practitioners, draws on the methods of the lawyer, the historian, the student of international

relations, and the practitioner. It begins with an introductory overview of the Council's evolving roles and responsibilities. It then discusses specific thematic issues, and through a wide range of case studies examines the scope and limitations of the Council's involvement in war. It offers frank accounts of how belligerents viewed the UN, and how the Council acted and sometimes failed to act. The appendices provide comprehensive information - much of it not previously brought together in this form - of the extraordinary range of the Council's activities. This book is a project of the Oxford Leverhulme Programme on the Changing Character of War.

Electromagnetic Methods in Geophysics Fabio

Giannino,Giovanni Leucci,2021-10-05 Discover the utility of four popular electromagnetic geophysical techniques In GeoRadar, FDEM, TDEM, and AEM Methods, accomplished researchers Fabio Giannino and Giovanni Leucci deliver an in-depth exploration of the theory and application of four different electromagnetic geophysical techniques: ground penetrating radar, the frequency domain electromagnetic method, the time domain electromagnetic method, and the airborne electromagnetic method. The authors offer a full description of each technique as they relate to the economics, planning, and logistics of deploying each of them on-site. The book also discusses the potential output

of each method and how it can be combined with other sources of below- and above-ground information to create a digitized common point cloud containing a wide variety of data. Giannino and Leucci rely on 25 years of professional experience in over 40 countries around the world to provide readers with a fulsome description of the optimal use of GPR, FDEM, TDEM, and AEM, demonstrating their flexibility and applicability to a wide variety of use cases. Readers will also benefit from the inclusion of: A thorough introduction to electromagnetic theory, including the operative principles and theory of ground penetrating radar (GPR) and the frequency domain electromagnetic method (FDEM) An exploration of hardware architecture and surveying, including GPR, FDEM, time domain electromagnetic method (TDEM), and airborne electromagnetic (AEM) surveying A collection of case studies, including a multiple-geophysical archaeological GPR survey in Turkey and a UXO search in a building area in Italy using FDEM /li> Discussions of planning and mobilizing a campaign, the shipment and clearance of survey equipment, and managing the operative aspects of field activity Perfect for forensic and archaeological geophysicists, GeoRadar, FDEM, TDEM, and AEM Methods will also earn a place in the libraries of anyone seeking a one-stop reference for the planning and deployment of GDR, FDEM, TDEM, and AEM surveying techniques.

Beef Cattle Production Systems Andy D. Herring,2014-10-24

This textbook provides an integrated view of beef cattle production with a systems based approach, discussing the

interrelationships of a broad range of aspects with the overall goal of optimising cattle production. This book provides the background to allow cattle producers to match their production environments with genetic, management, and marketing opportunities for sustainable beef production globally. This logic and resulting considerations can then be tailored to address specific regional challenges and opportunities worldwide. Considerations and examples for extreme situations will be provided, such as very small herds, very large herds, communal-group situations, and minimal artificial input systems.
