Richard J. Chasdi

The Crossroads of Norm and Nature May Sim, 1995 A discussion of the intersections between Aristotle's works: Ethics and Metaphysics. It debates the ways in which - and even the extent to which - the two texts illuminate one another, examine Aristotle's methods and intellectualism and analyse issues of matter, form, potency and art.

Corporate Security Crossroads Richard J. Chasdi, 2017-11-10 Even though terrorism poses an increasing threat to multinational companies, corporate leaders can thwart attacks by learning to navigate the complexities of foreign governments, social unrest, and cultural dissonance. Multinational corporations are on the front lines of terrorism and cyberattacks—two of the world's biggest threats to global security. How can corporate leaders mitigate their organizations' risks and develop an infrastructure that detects and deters a security menace before it happens? This timely reference lays out essential political context and historical background to help executives identify contemporary threats and understand the interconnections between threat dynamics in an increasingly dangerous international environment. This compelling work is organized into seven chapters. The beginning chapters profile the specific risks for multinational companies and detail which global—and regional—factors might propagate violence targeted at American-based businesses. Next, two historical case studies on terrorist assaults at Tigantourine and Mombasa illustrate how counterterrorism can successfully thwart potential attacks against business targets. The final part describes industrial espionage and criminal activity and then outlines a corporate counterterror blueprint to combat the prospect of terrorism, providing specific recommendations for preventative measures.

Empiricism at the Crossroads Thomas Uebel, 2015-11-02 Rather than a monolithic movement of naïve empiricists, the Vienna Circle represented a discussion forum for what were sometimes compatible, sometimes conflicting philosophical approaches to empirical evidence. The Circle's protocol-sentence debate – here reconstructed and analyzed – provides an exceptional vantage point from which to survey the various options and choices of the participants. Author Thomas Uebel mines the diaries, letters, and notes of the group's leading philosophers to show how their ideas emerged from real-world arguments, personal relationships, and historical settings.

Sign Crossroads in Global Perspective Susan Petrilli, 2017-09-08 Language is the species-specific human version of the animal system of communication. In contrast to non-human animals, language enables humans to invent a plurality of possible worlds; reflect upon signs; be responsible for our actions; gain conscious awareness of our inevitable mutual involvement in the network of life on this planet; and be responsibly involved in the destiny of the planet. The author looks at semiotics, the study of signs, symbols, and communication as developing sequentially rather than successively, more synchronically than diachronically. She discusses the contemporary phenomenon that people in today's society have witnessed and participated in, as part of the development of semiotics. Although there is a long history preceding semiotics, in a sense the field is, as a phenomenon, more of our time than of any time past. Its leading figures, whom Petrilli examines, belong to the twentieth and twenty-first century. Semiotics is associated with a capacity for listening. This capacity is also the condition for reconnecting to and recovering the ancient vocation of semiotics as that branch of medical science relating to the interpretation of signs or symptoms. The pragmatic aspect of global semiotics studies the impact of language or signs on those who use them, and looks for consequences in actual practice. In this respect, Petrilli theorizes that the task for semiotics in the era of globalization is nothing less than to take responsibility for life in its totality.

The Bible at Cultural Crossroads Harriet Hill, 2014-07-16 Bible translators have focused their efforts on preparing a text that is clear, natural and accurate, with the expectation that audiences will understand the message if it is in their language. Field research among the Adioukrou of Côte d'Ivoire shows that audiences also need to have access to the contextual information the author expected his audience to bring to the text. When such information is provided, both understanding of and interest in the message increase dramatically. These findings support Relevance Theory's claim that meaning is inferred from the interaction of text and context. To the extent that the contextual knowledge evoked by the text for contemporary audiences differs from that evoked for the first audience, understanding is impaired. The Bible at Cultural Crossroads presents a model to assist translators in identifying contextual mismatches and applies it on the thematic level to mismatches between first-century Jewish and Adioukrou views of the unseen world, and on the passage level to contextual mismatches arising from four Gospel passages. In-text and out-of-text solutions for adjusting contextual mismatches are explored, with field research results showing the effectiveness of various solutions. Context is shown to be both a significant factor in communication and a dynamic one. Translations of the text alone are not sufficient for successful communication.

Stumbling over the Cross Joni S. Sancken, 2016-04-21 It has never been easy to preach about the cross and resurrection of Jesus, but difficulties today are particularly challenging. Hearers ask tough questions of the church and the Christian faith, and they are not satisfied by formulaic answers. People are often suspicious of doctrine and are attracted to a broad but vague or pluralistic spirituality rather than the classical claims of Christianity. In this climate, preachers often see preaching on the central events of the Christian story, the crucifixion and resurrection, as more of a problem than a possibility, more of a burden than a joy. They wonder not only how to preach the old, old story of cross and resurrection but whether they should preach these themes at all. This book addresses these concerns and shows preachers how to preach the cross and resurrection in fresh, culturally relevant ways that deepen Christian discipleship. Each chapter shows the relevance of preaching the cross for addressing a particular congregational concern. What has ironically become a stumbling block in the pulpit, the stone that preachers often reject--preaching on the cross and resurrection of Jesus--can serve as the cornerstone for building up the congregation for discipleship in our world.

The Global Muslim Community at a Crossroads Abdul Basit Ph.D., 2012-01-16 Tackling a subject that is as timely as it is complex, this expert work examines the turmoil inside Muslim communities, helping outsiders to understand and insiders to examine ways in which Islam can be reinterpreted for a modern world. The Global Muslim Community at a Crossroads: Understanding Religious Beliefs, Practices, and Infighting to End the Conflict is an illuminating work. Written by an eminent psychologist who was raised as a Muslim in India and now resides in the United States, it examines the core reasons for the current state of affairs in Muslim communities, explaining the psychological underpinnings of Muslim religion and practices and the reasons they can fuel violence. Drawing on the editor's exposure to Eastern and Western cultures and his longstanding interest in the study of comparative world religions, this impartial analysis takes a multidimensional approach to explaining the current plight of Muslim countries. It candidly discusses issues such as the influence of Islamic schools, the negative and positive roles of Ulema

(religious scholars), a lack of critical inquiry into religious thought, Sharia, and the status of women in Islam. Finally, there are positive suggestions about a road to recovery, explaining how Muslim communities can address the interlocking problems they face while retaining the positive aspects of their beliefs.

Iconography Beyond the Crossroads Pamela A. Patton, Catherine A. Fernandez, 2023-03-23 This volume assesses how current approaches to iconology and iconography break new ground in understanding the signification and reception of medieval images, both in their own time and in the modern world. Framed by critical essays that apply explicitly historiographical and sociopolitical perspectives to key moments in the evolution of the field, the volume's case studies focus on how iconographic meaning is shaped by factors such as medieval modes of dialectical thought, the problem of representing time, the movement of the viewer in space, the fragmentation and injury of both image and subject, and the complex strategy of comparing distant cultural paradigms. The contributions are linked by a commitment to understanding how medieval images made meaning; to highlighting the heuristic value of new perspectives and methods in exploring the work of the image in both the Middle Ages and our own time; and to recognizing how subtle entanglements between scholarship and society can provoke mutual and unexpected transformations in both. Collectively, the essays demonstrate the expansiveness, flexibility, and dynamism of iconographic studies as a scholarly field that is still heartily engaged in the challenge of its own remaking. Along with the volume editors, the contributors include Madeline H. Caviness, Beatrice Kitzinger, Aden Kumler, Christopher R. Lakey, Glenn Peers, Jennifer Purtle, and Elizabeth Sears.

Transcultural Feminist Philosophy Yuanfang Dai, 2020-01-15 The question of difference—how to accommodate the complexity and diversity of women's experiences—remains a central point of reference in debates among feminist thinkers. In *Transcultural Feminist Philosophy: Rethinking Difference and Solidarity Through Chinese-American Encounters*, Yuanfang Dai addresses influential approaches to the feminist difference critique. Acknowledging that gender oppression assumes different forms in different social and cultural locations, Dai denies that this rules out generalizing about women's experiences. She proposes a category of women that captures and respects differences and dynamics among women and that can inform possibilities for women in the future. Through a critical examination of multicultural and postcolonial feminisms, she argues that we need both to rethink the concept of culture and to rework multiculturalism as an analytical and political idea. Developing a notion of transculturalism, she draws on Chinese feminist scholarship as she explores how a transcultural approach can address tensions between cultural differences and feminist solidarity. Transcultural thought and action offers a new way to explore the conditions of women's collective struggles.

Pentecostal Churches in Transition Shane Clifton, 2009 The global growth of Pentecostal movements during the course of the twentieth century has been widely documented although, to date, there has been little written on their developing ecclesiology. After making the case for a concrete rather than idealised approach to ecclesiology, this book describes and analyses the transitions that have framed the ways in which Australian Pentecostals have understood church life and mission. From a loosely knit faith missions movement, to congregational free church structures, to the so-called apostolic models of mega-churches, Australian pentecostalism stands as a microcosmos of ecclesial developments that have occurred throughout the world. This book, therefore, provides a means of reflecting upon what has been gained and lost in the process of ecclesiological change.

The Routledge Handbook of Logical Empiricism Thomas Uebel, Christoph Limbeck-Lilienau, 2021-12-27 Logical empiricism is a philosophical movement that flourished in the 1920s and 30s in Central Europe and in the 1940s and 50s in the United States. With its stated ambition to comprehend the revolutionary advances in the empirical and formal sciences of their day and to confront anti-modernist challenges to scientific reason itself, logical empiricism was never uncontroversial. Uniting key thinkers who often disagreed with one another but shared the aim to conceive of philosophy as part of the scientific enterprise, it left a rich and varied legacy that has only begun to be explored relatively recently. The Routledge Handbook of Logical Empiricism is an outstanding reference source to this challenging subject area, and the first collection of its kind. Comprising 41 chapters written by an international and interdisciplinary team of contributors, the Handbook is organized into four clear parts: The Cultural, Scientific and Philosophical Context and the Development of Logical Empiricism Characteristic Theses of and Specific Issues in Logical Empiricism Relations to Philosophical Contemporaries Leading Post-Positivist Criticisms and Legacy Essential reading for students and researchers in the history of twentieth-century philosophy, especially the history of analytical philosophy and the history of philosophy of science, the Handbook will also be of interest to those working in related areas of philosophy influenced by this important movement, including metaphysics and epistemology, philosophy of mind and philosophy of language.

Games, Norms and Reasons Johan van Benthem, Amitabha Gupta, Eric Pacuit, 2011-03-30 *Games, Norms, and Reasons: Logic at the Crossroads* provides an overview of modern logic focusing on its relationships with other disciplines, including new interfaces with rational choice theory, epistemology, game theory and informatics. This book continues a series called *Logic at the Crossroads* whose title reflects a view that the deep insights from the classical phase of mathematical logic can form a harmonious mixture with a new, more ambitious research agenda of understanding and enhancing human reasoning and intelligent interaction. The editors have gathered together articles from active authors in this new area that explore dynamic logical aspects of norms, reasons, preferences and beliefs in human agency, human interaction and groups. The book pays a special tribute to Professor Rohit Parikh, a pioneer in this movement.

Flexible Crossroads Roger Hayter, 2011-11-01 British Columbia's forest economy is at a crucial crossroads. Its survival, Roger Hayter argues, rests on its ability to remain flexible and open to innovation -- a future by no means assured given recent policy initiatives and the current contested nature of British Columbia's forests. *Flexible Crossroads* looks at the contemporary restructuring of British Columbia's forest economy, demonstrating how both resource dynamics -- the transition from old growth to managed forests -- and industrial dynamics -- changing technology and global market forces -- have shaped this transformation. Conceptually, the restructuring is portrayed as a shift from a commodity-based, cost-minimizing production system (Fordism) to a more product-differentiated, value-maximizing production system informed by the imperative of flexibility. The first part of the book provides global and historical perspectives by situating British Columbia's forest economy within the wider context of global industrialization, the history of resource dynamics, and the current shift from Fordist to more flexible systems of production. In the second part, Hayter assesses the extent to which British Columbia's forest economy is enacting this shift by focusing on factors such as foreign ownership, the strategies and structure of MacMillan Bloedel, the role of small firms, traderelations, employment and labour relations, forest community development,

environmentalism and resource use, and innovation policy. Flexible Crossroads will appeal to geographers, political economists and forestry professionals, as well as to students of British Columbia's economy and forest economies generally.

The Joy of the Gospel Pope Francis, 2014-10-07 The perfect gift! A specially priced, beautifully designed hardcover edition of The Joy of the Gospel with a foreword by Robert Barron and an afterword by James Martin, SJ. "The joy of the gospel fills the hearts and lives of all who encounter Jesus... In this Exhortation I wish to encourage the Christian faithful to embark upon a new chapter of evangelization marked by this joy, while pointing out new paths for the Church's journey in years to come." – Pope Francis This special edition of Pope Francis's popular message of hope explores themes that are important for believers in the 21st century. Examining the many obstacles to faith and what can be done to overcome those hurdles, he emphasizes the importance of service to God and all his creation. Advocating for "the homeless, the addicted, refugees, indigenous peoples, the elderly who are increasingly isolated and abandoned," the Holy Father shows us how to respond to poverty and current economic challenges that affect us locally and globally. Ultimately, Pope Francis demonstrates how to develop a more personal relationship with Jesus Christ, "to recognize the traces of God's Spirit in events great and small." Profound in its insight, yet warm and accessible in its tone, The Joy of the Gospel is a call to action to live a life motivated by divine love and, in turn, to experience heaven on earth. Includes a foreword by Robert Barron, author of Catholicism: A Journey to the Heart of the Faith and James Martin, SJ, author of Jesus: A Pilgrimage

Proof, Computation and Agency Johan van Benthem, Amitabha Gupta, Rohit Parikh, 2011-04-02 Proof, Computation and Agency: Logic at the Crossroads provides an overview of modern logic and its relationship with other disciplines. As a highlight, several articles pursue an inspiring paradigm called 'social software', which studies patterns of social interaction using techniques from logic and computer science. The book also demonstrates how logic can join forces with game theory and social choice theory. A second main line is the logic-language-cognition connection, where the articles collected here bring several fresh perspectives. Finally, the book takes up Indian logic and its connections with epistemology and the philosophy of science, showing how these topics run naturally into each other.

Formal Grammar Glyn Morrill, Reinhard Muskens, Rainer Osswald, Frank Richter, 2014-07-10 This book constitutes the refereed proceedings of the 19 International Conference on Formal Grammar 2014, collocated with the European Summer School in Logic, Language and Information in August 2014. The 10 revised full papers presented together with 2 invited contributions were carefully reviewed and selected from a total of 19 submissions. Traditionally linguistics has been studied from the point of view of the arts, humanities and letters, but in order to make concrete ideas which might otherwise be fanciful the study of grammar has been increasingly subject to the rigours of computer science and mathematization i.e. articulation in the language of science.

Readings in Formal Epistemology Horacio Arló-Costa, Vincent F. Hendricks, Johan van Benthem, 2016-06-07 This volume presents 38 classic texts in formal epistemology, and strengthens the ties between research into this area of philosophy and its neighbouring intellectual disciplines. The editors provide introductions to five subsections: Bayesian Epistemology, Belief Change, Decision Theory, Interactive Epistemology and Epistemic Logic. 'Formal epistemology' is a term coined in the late 1990s for a new constellation of interests in philosophy, the origins of which are found in earlier works of epistemologists, philosophers of science and logicians. It addresses a growing agenda of problems concerning knowledge, belief, certainty, rationality, deliberation, decision, strategy, action and agent interaction – and it does so using methods from logic, probability, computability, decision and game theory. The volume also includes a thorough index and suggestions for further reading, and thus offers a complete teaching and research package for students as well as research scholars of formal epistemology, philosophy, logic, computer science, theoretical economics and cognitive psychology.

A Baptist at the Crossroads Obbie Tyler Todd, 2021-08-23 South Carolina Baptist Richard Furman (1755-1825) personified a host of seeming contradictions. As a Regular Baptist baptized by a Separate Baptist, an ardent patriot with puritan sensibilities, a Federalist who zealously defended religious liberty, and a slave-owning aristocrat who associated with backwoods revivalists, Furman is a complex figure in American history. His doctrine of atonement exhibited this same complexity, as he uniquely held to both a penal substitutionary theory of the atonement as well as to a moral governmental view, models of the atonement that were often conceived as mutually exclusive in the nineteenth century. Furman was the first of his American Baptist kind to attempt to integrate these two models. As a Baptist standing at the political, cultural, and theological crossroads of America, Furman blended Edwardsean and confessional Calvinism, Regular and Separate Baptist traditions, and a host of other elements into his theology, laying the groundwork for an entire generation of Southern Baptists who followed in his theological footsteps.
