Cornel Ban

The HR Value Proposition David Ulrich, Wayne Brockbank, 2005-05-11 The international best seller Human Resource Champions helped set the HR agenda for the 1990s and enabled HR professionals to become strategic partners in their organizations. But earning a seat at the executive table was only the beginning. Today's HR leaders must also bring substantial value to that table. Drawing on their 16-year study of over 29,000 HR professionals and line managers, leading HR experts Dave Ulrich and Wayne Brockbank propose The HR Value Proposition. The authors argue that HR value creation requires a deep understanding of external business realities and how key stakeholders both inside and outside the company define value. Ulrich and Brockbank provide practical tools and worksheets for leveraging this knowledge to create HR practices, build organizational capabilities, design HR strategy, and marshal resources that create value for customers, investors, executives, and employees. Written by the field's premier trailblazers, this book charts the path HR professionals must take to help lead their organizations into the future. Ulrich is a professor at the University of Michigan School of Business and the author of 12 books and more than 100 articles on the subject of human resources. Brockbank is a clinical professor of business at the University of Michigan School of Business, the author of award-winning papers on HR strategy, and an adviser to top global organizations.

Critical Management Studies Christopher Grey, Hugh Willmott, 2005 'Critical Management

Studies', or 'CMS', describes a diverse group of work that has adopted a critical or questioning approach to the traditional concerns of Management Studies, and the growing interest in CMS has produced a vibrant and exciting body of research. Christopher Grey and Hugh Willmott, leading authorities in this area, introduce seventeen readings which reflect these developments, and show CMS' importance. As an assessment of CMS, the Reader will be of interest to academics, researchers, and students of Management Studies. As an introduction to CMS, it will prove invaluable to stu.

Ruling Ideas Cornel Ban, 2016-06-16 Neoliberal economic theories are powerful because their domestic translators make them go local, hybridizing global scripts with local ideas. This does not mean that all local translations shape policy, however. External constraints and translators' access to cohesive policy institutions filter what kind of neoliberal hybrids become policy reality. By comparing the moderate neoliberalism that prevails in Spain with the more radical one that shapes policy thinking in Romania, Ruling Ideas explains why neoliberal hybrids take the forms that they do and how they survive crises. Cornel Ban contributes to the literature by showing that these different varieties of neoliberalism depend on what competing ideas are available locally, on the networks of actors who serve as the local advocates of neoliberalism, and on their vulnerability to external coercion. Ruling Ideas covers an extended historical period, starting

with the Franco period in Spain and the Ceausescu period in Romania, discusses the economic integration of these countries into the EU, and continues through Europe's Great Recession and the European debt crisis. The broad historical coverage enables a careful analysis of how neoliberalism rules in times of stability and crisis and under different political systems.

Understanding the Creeping Crisis Arjen

Boin, Magnus Ekengren, Mark Rhinard, 2021-05-10 This open access book explores a special species of trouble afflicting modern societies: creeping crises. These crises evolve over time, reveal themselves in different ways, and resist comprehensive responses despite periodic public attention. As a result, these crises continue to creep in front of our eyes. This book begins by defining the concept of a creeping crisis, showing how existing literature fails to properly define and explore this phenomenon and outlining the challenges such crises pose to practitioners. Drawing on ongoing research, this book presents a diverse set of case studies on: antimicrobial resistance, climate change-induced migration, energy extraction, big data, Covid-19, migration, foreign fighters, and cyberattacks. Each chapter explores how creeping crises come into existence, why they can develop unimpeded, and the consequences they bring in terms of damage and legitimacy loss. The book provides a proof-of-concept to help launch the systematic study of

creeping crises. Our analysis helps academics understand a new species of threat and practitioners recognize and prepare for creeping crises.

Curried Cultures Krishnendu Ray, Tulasi Srinivas, 2012-05-01 Although South Asian cookery and gastronomy has transformed contemporary urban foodscape all over the world, social scientists have paid scant attention to this phenomenon. *Curried Cultures*—a wide-ranging collection of essays—explores the relationship between globalization and South Asia through food, covering the cuisine of the colonial period to the contemporary era, investigating its material and symbolic meanings. *Curried Cultures* challenges disciplinary boundaries in considering South Asian gastronomy by assuming a proximity to dishes and diets that is often missing when food is a lens to investigate other topics. The book's established scholarly contributors examine food to comment on a range of cultural activities as they argue that the practice of cooking and eating matter as an important way of knowing the world and acting on it.

The Imperative of Responsibility Hans Jonas, 1984
Hans Jonas here rethinks the foundations of ethics in light of the awesome transformations wrought by modern technology: the threat of nuclear war, ecological ravage, genetic engineering, and the like. Though informed by a deep reverence for human life, Jonas's ethics is grounded not in religion but in metaphysics, in a secular doctrine that makes explicit man's duties toward himself, his posterity, and the environment. Jonas offers an assessment of practical goals under present circumstances, ending with a critique of modern utopianism.

Entrepreneurship in a European Perspective

Christine K. Volkmann, Kim Oliver Tokarski, Marc Grünhagen, 2010-11-05
This textbook focuses on the management challenges of founding a new venture

and managing its rapid growth as the firm evolves. It covers crucial management areas in the entrepreneurship context such as entrepreneurial finance, marketing, and human resource management. Also, more hands-on management topics like writing a business plan and choosing a legal form for a venture are covered. A key chapter of the book is dedicated to leadership challenges in managing rapidly growing young firms located in new industries and technology areas. The book is written from a Continental European perspective to cater for its European target audience in entrepreneurship courses to be held in English.

The European Public Prosecutor's Office L. H. Erkelens, A.W.H. Meij, M. Pawlik, 2014-09-18 In 2013 the European Commission launched its legislative proposal to create a European Public Prosecutor's Office. The proposal provoked fierce debates, politically as well as on the academic level. Many national parliaments opposed and submitted formally their grievances to the Commission. Negotiations on the proposal between Member States are still ongoing. The T.M.C. Asser Instituut held the first international conference on this unprecedented proposal. This book reflects the main results of that conference. It provides a concise background of and reasoning for the introduction of this new EU body entrusted with far reaching judicial powers disclosing important legal and policy implications. Within its hitherto limited scope the existing system of judicial cooperation between EU Member States will change fundamentally, directly affecting the functioning of national courts and public prosecutions

offices. How will this evolve? This book will help answering fundamental questions involved.
