*Building Access* Aimi Hamraie, 2017-11-01 "All too often," wrote disabled architect Ronald Mace, "designers don't take the needs of disabled and elderly people into account." *Building Access* investigates twentieth-century strategies for designing the world with disability in mind. Commonly understood in terms of curb cuts, automatic doors, Braille signs, and flexible kitchens, Universal Design purported to create a built environment for everyone, not only the average citizen. But who counts as "everyone," Aimi Hamraie asks, and how can designers know? Blending technoscience studies and design history with critical disability, race, and feminist theories, *Building Access* interrogates the historical, cultural, and theoretical contexts for these questions, offering a groundbreaking critical history of Universal Design. Hamraie reveals that the twentieth-century shift from "design for the average" to "design for all" took place through liberal political, economic, and scientific structures concerned with defining the disabled user and designing in its name. Tracing the co-evolution of accessible design for disabled veterans, a radical disability maker movement, disability rights law, and strategies for diversifying the architecture profession, Hamraie shows that Universal Design was not just an approach to creating new products or spaces, but also a sustained, understated activist movement challenging dominant understandings of disability in architecture, medicine, and society. Illustrated with a wealth of rare archival materials, *Building Access* brings together scientific, social, and political histories in what is not only the pioneering critical account of Universal Design but also a deep engagement with the politics of knowing, making, and belonging in twentieth-century United States.

**Ultrasound of the Musculoskeletal System** Stefano Bianchi, Carlo Martinoli, 2007-12-03 A comprehensive reference and practical guide on the technology and application of ultrasound to the musculoskeletal system. It is organized into two main sections. The first is devoted to general aspects, while the second provides a systematic overview of the applications of musculoskeletal ultrasound in different areas of the body. Ultrasound scans are correlated with drawings, photographs, images obtained using other modalities, and anatomic specimens. There is a generous complement of high-quality illustrations based on high-end equipment. This book will acquaint beginners with the basics of musculoskeletal ultrasound, while more advanced sonologists and sonographers will learn new skills, means of avoiding pitfalls, and ways of effectively relating the ultrasound study to the clinical background.

The Cosmic Spirit Roland Faber, 2021-03-04 Are we more than stardust? Is the appearance of the fragile Earth in the vast universe more than an accident? Are we not children of a Spirit that pervades the dust, rejuvenates life, and embraces the ever-evolving universe? Is there a cosmic Spirit that wants us to awaken to a consciousness of universal meaning, sacred purpose, and mutual friendship with all beings? This book answers these questions with a spirituality of the numinous in our relation to the elements of the Earth in the matrix of the multiverse by taking you on a journey through nine paths and nineteen meditations of awakening. Not bound by any religion, but in deep appreciation of the religious and spiritual heritage of human encounters with the divine depth of existence in our selves and in nature, they invite you to become sojourners by engaging the most profound

embodiments of the intangible Spirit by which it facilitates its own materialization in the cosmos and our spiritualization of the cosmos. Use—says this Spirit—the stardust that you are to become a spirit-faring species in an eternal journey of the cosmos to realize its ultimate motive of existence—the attraction of love!

**Theoretical Issues in Psychology** John R. Morss, Niamh Stephenson, Hans van Rappard, 2013-06-29 Theoretical Issues in Psychology is published as the discipline of psychology enters its (at least) third century. The year 2001 brings with it millennial reflections, as well as the strange sense of déjà vu that we derive from the Kubrick movie. As to the former, a glance at the contents list of this volume will demonstrate both the maturity and the vigour of theoretical debate within psychology. There is a level of sophistication here that should be the cause of quiet celebration. Recent ideas about discursive practice and subjectivity, chaos theory and autopoiesis, are effortlessly entrained with classical issues. Canonical texts are looked at with fresh eyes. Unresolved social and political questions are doggedly persisted with, and new perspectives on the human experience are pioneered. We are not afraid of long words, even if French in origin, but nor are we afraid to recognise that we are physical beings who touch other beings, who hold, desire, and remember - and who talk, talk, talk. For surely it is theoretically-sensitive work in psychology - whether critical or not - that best represents what the discipline has to offer the wider community.

**Decentered Playwriting** Carolyn M. Dunn, Eric Micha Holmes, Les Hunter, 2023-12-01 Decentered Playwriting investigates new and alternative strategies for dramatic writing that incorporate non-Western, Indigenous, and underrepresented storytelling techniques and traditions while deepening a creative practice that decenters hegemonic methods. A collection of short essays and exercises by leading teaching artists, playwrights, and academics in the fields of playwriting and dramaturgy, this book focuses on reimagining pedagogical techniques by introducing playwrights to new storytelling methods, traditions, and ways of studying, and teaching diverse narratological practices. This is a vital and invaluable book for anyone teaching or studying playwriting, dramatic structure, storytelling at advanced undergraduate and graduate levels, or as part of their own professional practice.

**Theopoetic Folds** Roland Faber, Jeremy Fackenthal, 2013-08-01 In complex philosophical ways, theology is, should, and can be a theopoetics of multiplicity. The ambivalent term theopoetics is associated with poetry and aesthetic theory; theology and literature; and repressed literary qualities, myths, and metaphorical theologies. On a more profound basis, it questions the establishment of the difference between philosophy and theology and resides in the dangerous realm of relativism. The chapters in this book explore how the term theopoetics contributes to cutting-edge work in theology, philosophy, literature, and sociology.

**Nutrition Support for Athletic Performance** Mark Russell, Jill Parnell, 2020-05-13 Athletes and their support

personnel are constantly seeking evidence-informed recommendations to enhance athletic performance during competition and to optimize training-induced adaptations. Accordingly, nutritional and supplementation strategies are commonplace when seeking to achieve these aims, with such practices being implemented before, during, or after competition and/or training in a periodized manner. Performance nutrition is becoming increasingly specialized and needs to consider the diversity of athletes and the nature of the competitions. This Special Issue, Nutrition Support for Athletic Performance, describes recent advances in these areas.

*Robert Maynard Hutchins* Milton Mayer,2023-11-10 At age 28, he was dean of Yale Law School; at 30, president of the University of Chicago. By his mid-thirties, Robert Maynard Hutchins was an eminent figure in the world of educational innovation and liberal politics. And when he was 75, he told a friend, I should have died at 35. Milton Mayer, Hutchins's colleague, and friend, gives an intimate picture of the remarkably outstanding, and fallible, man who participated in many of this century's most important social and political controversies. He captures the energy and intellectual fervor Hutchins could transmit to others, and which the man brought to the fields of law, politics, civil rights, and public affairs. Rich in detail and anecdote, this memoir vividly brings to life both a man and an age. This title is part of UC Press's *Voices Revived* program, which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice, reach, and impact. Drawing on a backlist dating to 1893, *Voices Revived* makes high-quality, peer-reviewed scholarship accessible once again using print-on-demand technology. This title was originally published in 1993.
