This all-new story focuses on 11-year-old Will Robinson and his closest friend and greatest protector--a mysterious Robot with a dangerous past. Thirty years in the future, Earth has become increasingly more uninhabitable, and a group of colonists--including Will, his two teenage sisters, and their parents--travels across the galaxy to establish a new home. But when the ship is attacked, the Robinsons are stranded on an alien planet where they must contend with disastrous technical issues, a hostile environment, and dangerous personalities to get off world and reach their colony. One day, while exploring a remote complex of caves with his Robot, Will discovers a strange portal that allows him to travel back to Earth--to a time before the Robinsons left on their mission. Realizing the portal could be a way for the colonists to escape the planet and finally make their way to their new home, Will and his sisters decide to investigate it, triggering a series of events that not only changes their reality, but threatens the group's very existence. With the beings who created the portal in pursuit, Will must find a way to right the wrongs of the past and save his family's future. © 2019 Legendary. All Rights Reserved.

The Galaxy Is Rated G R.C. Neighbors, Sandy Rankin, 2011-07-27 Through spaceships, aliens, ray guns and other familiar trappings, science fiction uses the future (and sometimes the past) to comment on current social, cultural and political ideologies; the same is true of science fiction in children's film and television. This collection of essays analyzes the confluences of science fiction and children's visual media, covering such cultural icons as Flash Gordon, the Jetsons and Star Wars, as well as more contemporary fare like the films Wall-E, Monsters vs. Aliens and Toy Story. Collectively, the essays discover, applaud and critique the hidden--and not-so-hidden--messages presented on our children's film and TV screens.

Dark Side of the Moon Gerard Degroot, 2006-11-01 A selection of the History, Scientific American, and Quality Paperback Book Clubs For a very brief moment during the 1960s, America was moonstruck. Boys dreamt of being an astronaut; girls dreamed of marrying one. Americans drank Tang, bought "space pens" that wrote upside down, wore clothes made of space age Mylar, and took imaginary rockets to the moon from theme parks scattered around the country. But despite the best efforts of a generation of scientists, the almost foolhardy heroics of the astronauts, and 35 billion dollars, the moon turned out to be a place of "magnificent desolation," to use Buzz Aldrin's words: a sterile rock of no purpose to anyone. In Dark Side of the Moon, Gerard J. DeGroot reveals how NASA cashed in on the Americans' thirst for heroes in an age of discontent and became obsessed with putting men in space. The moon mission was sold as a race which America could not afford to lose. Landing on the moon, it was argued, would be good for the economy, for politics, and for the soul. It could even win the Cold War. The great tragedy is that so much effort and expense was devoted to a small step that did virtually nothing for mankind. Drawing on meticulous archival research, DeGroot cuts through the myths constructed by the Eisenhower, Kennedy, and Johnson administrations and sustained by NASA ever since. He finds a gang of cynics, demagogues, scheming politicians, and corporations who amassed enormous power and profits by exploiting the fear of what the Russians might do in space. Exposing the truth behind one of the most revered fictions of American history, Dark Side

of the Moon explains why the American space program has been caught in a state of purposeless wandering ever since Neil Armstrong descended from Apollo 11 and stepped onto the moon. The effort devoted to the space program was indeed magnificent and its cultural impact was profound, but the purpose of the program was as desolate and dry as lunar dust.

Lost in Space Greg Klerkx, 2005-01-11 The daring, revolutionary NASA that sent Neil Armstrong to the moon has lost its meteoric vision, says journalist and space enthusiast Greg Klerkx. NASA, he contends, has devolved from a pioneer of space exploration into a factionalized bureaucracy focused primarily on its own survival. And as a result, humans haven't ventured beyond Earth orbit for three decades. Klerkx argues that after its wildly successful Apollo program, NASA clung fiercely to the spotlight by creating a government-sheltered monopoly with a few Big Aerospace companies. Although committed in theory to supporting commercial spaceflight, in practice it smothered vital private-sector innovation. In striking descriptions of space milestones spanning the golden 1960s Space Age and the 2003 Columbia tragedy, Klerkx exposes the "real" NASA and envisions exciting public-private cooperation that could send humans back to the moon and beyond.
