The Horological Journal ,1880

Timekeeper Tara Sim,2016-11-08 "I was in an accident. I got out. I'm safe now." An alternate Victorian world controlled by clock towers, where a damaged clock can fracture time—and a destroyed one can stop it completely. A prodigy mechanic who can repair not only clockwork, but time itself, determined to rescue his father from a Stopped town. A series of mysterious bombings that could jeopardize all of England. A romance that will shake the very foundations of time. The first book in a dazzling new steampunk-fantasy trilogy, *Timekeeper* introduces a magical world of mythology and innovation that readers will never want to leave.

A New English Dictionary on Historical Principles

James Augustus Henry Murray,1893

Tower of Thieves, AIG Andrew Spencer,2010-03-11

This is a true story of personal greed and downfall, corporate greed fueled with economic and social treachery, shareholder waste and discrimination at AIG, 70 Pine Street in the heart of the financial district. This address is know as the AIG Tower, hence our working title ***
TOWER OF THIEVES *** The central character is a man with a wife, a family, who has cheated his way to the top BY DOING GOOD. What he sees and what he does validates what unchecked power on Wall Street will do to a

man and what it has done to an entire company and country. The events at AIG lead right to the CEO and Senior Vice Chairman and how our guy fights an entire corrupt organization and how he became one of those he despised. "We found each other pretty easily - he recognized me from a photo that had appeared in the local paper about the book I was writing about Bear Stearns - and he asked if we could go 'somewhere more private' to talk. Part of me thought this was ridiculous. A big part of me, in fact. All this cloak-and-dagger nonsense seemed out of place in early summer Nantucket, Massachusetts, of all places. But there was some little sliver inside that told me this could be good. So I went along with it. We went to a park, sat down and, once we'd gotten through the formalities about how the Bear book was going, we got down to business. 'I should tell you that I'm going to federal prison at the end of the year,' he began. "In my admittedly limited experience with such introductions, I have to say that any time a conversation starts with someone's announcing their impending sentencing date, fasten your seatbelt, because the story that follows is usually related to the sentencing date itself and is also usually pretty interesting. I took notes as John rolled out his story, the same story you're about to read here. After about five minutes, though, I realized I was no longer writing. I was just listening in disbelief to what he was telling me. This meeting took place long before AIG was the poster child for corporate greed and chutzpah. For that matter, this was before a lot of people had ever even heard of AIG, and even fewer people knew what they did as a corporation." This is a story of what our taxpayer dollars have purchased.

Shaping the Day Paul Glennie,Nigel Thrift,2009-02-12
Timekeeping is an essential activity in the modern world, and we take it for granted that our lives are shaped by the hours of the day. Yet what seems so ordinary today is actually the extraordinary outcome of centuries of technical innovation and circulation of ideas about time. *Shaping the Day* is a pathbreaking study of the practice of timekeeping in England and Wales between 1300 and 1800. Drawing on many unique historical sources, ranging from personal diaries to housekeeping manuals, Paul Glennie and Nigel Thrift illustrate how a particular kind of common sense about time came into being, and how it developed during this period. Many remarkable figures make their appearance, ranging from the well-known, such as Edmund Halley, Samuel Pepys, and John Harrison, who solved the problem of longitude, to less familiar characters, including sailors, gamblers, and burglars. Overturning many common perceptions of the past—for example, that clock time and the industrial revolution were intimately related—this unique historical study will engage all readers interested in how 'telling the time' has come to dominate our way of life.

Lost Discoveries Colin A. Ronan,1981

William Wenton and the Lost City Bobbie Peers,2019-07-09 William Wenton is a code-breaking

genius, but when his secret talent is suddenly revealed, he has to face the danger that has been lurking around him for years in the third book in the series that School Library Journal calls “part Alex Rider, part The Da Vinci Code for kids, and part Artemis Fowl.” When a mysterious figure presents William with a strange pyramid-shaped puzzle, it sets in motion a series of events that sends William on a wild ride from Norway to England to the Mariana Trench, the deepest part of the ocean. Along the way, he’ll discover that some of the people he knows can no longer be trusted and that the Institute for Post-Human Research is hiding a dark secret. He’ll also discover an ancient civilization hidden under the ocean and a giant, mechanical, teleportation octopus. And all the while the clock is ticking as William races to prevent the return of the man who wants to kill him and tries to solve the mystery of luridium.

English Mechanics and the World of Science, 1882

A General History of Horology Anthony Turner, James Nye, Jonathan Betts, 2022-06-28 *A General History of Horology* describes instruments used for the finding and measurement of time from Antiquity to the 21st century. In geographical scope it ranges from East Asia to the Americas. The instruments described are set in their technical and social contexts, and there is also discussion of the literature, the historiography and the collecting of the subject. The book features the use of case studies to represent larger topics that cannot be completely covered in a single book. The international body of authors have endeavoured to offer a fully world-wide survey accessible to students, historians, collectors, and the general reader, based on a firm understanding of the technical basis of the subject. At the same time as the work offers a synthesis of current knowledge of the subject, it also incorporates the results of some fundamental, new and original research.

Clock Dance Anne Tyler, 2018-07-10 NEW YORK TIMES BESTSELLER • A novel of self-discovery and second chances from the beloved Pulitzer Prize-winning author—Willa Drake has had three opportunities to start her life over: in 1967, as a schoolgirl whose mother has suddenly disappeared; in 1977, when considering a marriage proposal; and in 1997, as a young widow trying to hold her family together. So she is surprised when in 2017 she is given one last chance to change everything, after receiving a startling phone call from a stranger. Without fully understanding why, she flies across the country to Baltimore to help a young woman she's never met. This impulsive decision, maybe the first one she's consciously made in her life, will lead Willa into uncharted territory—surrounded by eccentric neighbors who treat each other like family, she finds solace and fulfillment in unexpected places. A bewitching novel of hope and transformation, *Clock Dance* gives us Anne Tyler at the height of her powers.

Heavenly Clockwork Joseph Needham, Ling Wang, Derek J. De Solla Price, 1986-09-18 A reissue with a foreword and supplement, of a modern classic published in 1960. The invention of the mechanical clock was one of the most important turning points in the history of science and technology. This study revealed six centuries of mechanical clockwork preceding the first mechanical escapement clocks of the West of about AD 1300. Detailed and fully illustrated accounts of elaborate Chinese clocks are accompanied by a discussion of the social context of the Chinese inventions and an assessment of their possible transmission to medieval Europe. For this revised edition, Dr Joseph Needham has contributed a new foreword on recent research and perceptions. In a supplement John H. Combridge details a modern reconstruction of Su Sung's

timekeeping device, which together with textual studies modifies our understanding of this important early technology.

 CLOCKWORK PHOENIX 3 Allen's third volume of
 extraordinary short stories reaches new heights of rarity
 and wonder. Marie Brennan sets the bar high with "The
 Gospel of Nachash," a fine reinterpretation of the Adam
 and Eve legend from a fresh perspective. Tori Truslow's
 scholarly "Tomorrow Is Saint Valentine's Day" tells the
 story of the Great Ice Train and its encounter with the
 merfolk on the Moon. Gemma Files's "Hell Friend" and
 C.S.E. Cooney's "Braiding the Ghosts" are sinister, spine-
 tingling ghost stories. Cat Rambo deals with realism and
 escapism in her futuristic "Surrogates," where
 appearances and reality are mutable. Shweta Narayan's
 "Eyes of Carven Emerald" eloquently rewrites the history
 of Alexander the Great to include mechanical entities.
 Without a wrong note, all the stories in this anthology
 admirably fulfill Allen's promise of "beauty and
 strangeness." — Publishers Weekly, Starred Review With a
 balance of new names and established authors, the third
 Clockwork Phoenix installment collects some magnificent
 interpretations of fantastic ideas. "The Gospel of Nachash"
 opens, Marie Brennan's haunting tale of the beginning of
 time, and a very interesting reinterpretation of a gospel it
 is, too. Tanith Lee's "Fold" is a story of a man who wrote
 love letters to the people he saw passing beneath his
 window, and only left his apartment once. Gemma Files'
 "Hell Friend" is really a heart-warming ghost story;

Georgina Bruce's "Crow Voodoo" is an unnerving take on something common to fairy tales; and Gregory Frost's "Lucyna's Gaze" starts off sweet, and grows more awful with every revealed detail. Clockwork Phoenix delivers on its promise of both beauty and strangeness, and adds in some fright and a few new ways of looking at old tropes. All in all, it's a very successful collection of thematically similar, but wildly varied in subject, works. — Booklist

CLOCKWORK PHOENIX is a series of anthologies from Norilana Books, edited by Mike Allen, that bears the subtitle "New Tales of Beauty and Strangeness". This seems a quite appropriate subtitle — the stories really do seem attempts at evoking both beauty and the strange. This makes them consistently interesting . . . There is a mixture of wild science fiction (as with John C. Wright's "Murder in Metachronopolis", a convoluted time travel mystery) with what seems best called slipstream (say, Tanith Lee's curious "Fold", about a man who sends people paper airplane love letters) with out and out fantasy. One of the latter is my favorite here: C. S. E. Cooney's "Braiding the Ghosts", in which a girl goes to her grandmother after her mother's death, and learns from the older woman the secret of "braiding" ghosts — which is to say enslaving them. So ghosts are the servants of the older woman. But the girl is not so happy with this . . . especially when she falls for the ghost she is forced to braid. And the ghosts — are they happy? Read the story and find out . . . lovely stuff. — Locus

For the past three years editor Mike Allen has been publishing his unique CLOCKWORK PHOENIX anthologies, inviting authors like Tanith Lee and Catherynne M. Valente to give us their take on the concepts of, as the title has it, "beauty and strangeness." The result has been a critical and artistic success and, if volume three is any indication, the spell won't be lifting

any time soon. Allen continues to assemble some of the most adventurous, beautiful, and just plain weird stuff our current crop of speculative authors are capable of producing. Adventurous minds are invited to attend. —
